

Lorell LLR43512

Lorell LLR43512 5-Drawer Receding Lateral File Cabinet User Manual

Model: LLR43512

1. PRODUCT OVERVIEW

The Lorell LLR43512 is a 5-drawer receding lateral file cabinet designed for efficient document storage in office environments. It features heavy-duty, three-piece, ball-bearing slide suspension for smooth drawer operation. The top four drawers have receding fronts and roll-out shelves, while the bottom drawer has a fixed front. Integrated hangrails support letter, legal, or A4-size folders for versatile filing. A core-removable lock and an interlock system enhance security and safety.

Figure 1: Front view of the Lorell LLR43512 5-Drawer Receding Lateral File Cabinet in Putty color. The cabinet features five drawers with full-width pulls and a lock located at the top center.

2. SAFETY INFORMATION

- **Weight Capacity:** Do not exceed the weight capacity of 100 pounds per drawer. Overloading can compromise stability and functionality.
- **Stability:** Ensure proper installation and placement on a level surface to prevent tipping. Use the adjustable leveling guides for stabilization.
- **Pinch Points:** Exercise caution when opening or closing drawers to avoid pinching fingers.
- **Interlock System:** The cabinet is equipped with an interlock system that prohibits the extension of more than one drawer at a time. This is a safety feature to prevent tipping. Do not attempt to force multiple drawers open simultaneously.

- **Proposition 65 Warning:** This product may contain chemicals known to the State of California to cause cancer and birth defects or other reproductive harm.

3. SETUP AND INSTALLATION

The Lorell LLR43512 file cabinet comes fully assembled and is designed for freestanding installation. No assembly is required.

1. **Unpacking:** Carefully remove all packaging materials. Inspect the cabinet for any shipping damage.
2. **Placement:** Position the cabinet on a firm, level surface in your desired location. Ensure adequate clearance for opening drawers.
3. **Leveling:** The cabinet features four adjustable leveling guides at the base. Rotate these guides to ensure the cabinet is stable and level. A level cabinet prevents drawers from drifting open or closed and ensures proper operation of the interlock system.

Figure 2: Dimensions of the file cabinet: 70.88 inches high, 38.5 inches wide, and 21.12 inches deep. Ensure your chosen location

accommodates these measurements.

4. OPERATING INSTRUCTIONS

4.1 Drawer Operation

- **Opening Drawers:** Gently pull the full-width designer drawer pulls to open a drawer. The top four drawers have receding fronts that slide inward before extending.
- **Roll-Out Shelves:** The top four drawers feature roll-out shelves for easy access to files. The top two shelves are also designed for roll-out binder storage.
- **Bottom Drawer:** The bottom drawer has a fixed front and operates like a standard pull-out drawer.
- **Filing:** Included hangrails accommodate side-to-side filing of letter, legal, or A4-size folders. Position your hanging folders on these rails.

Figure 3: The top two drawers are shown open, revealing the roll-out shelves and hangrails designed for organizing files and binders.

4.2 Locking Mechanism

- **Locking:** Insert the key into the core-removable lock located at the top of the cabinet. Turn the key to engage the dual lock bars, which secure both ends of all drawers.
- **Unlocking:** Turn the key in the opposite direction to disengage the lock bars. Remove the key.
- **Key Management:** Two keys are included with the cabinet. Keep a spare key in a secure location.

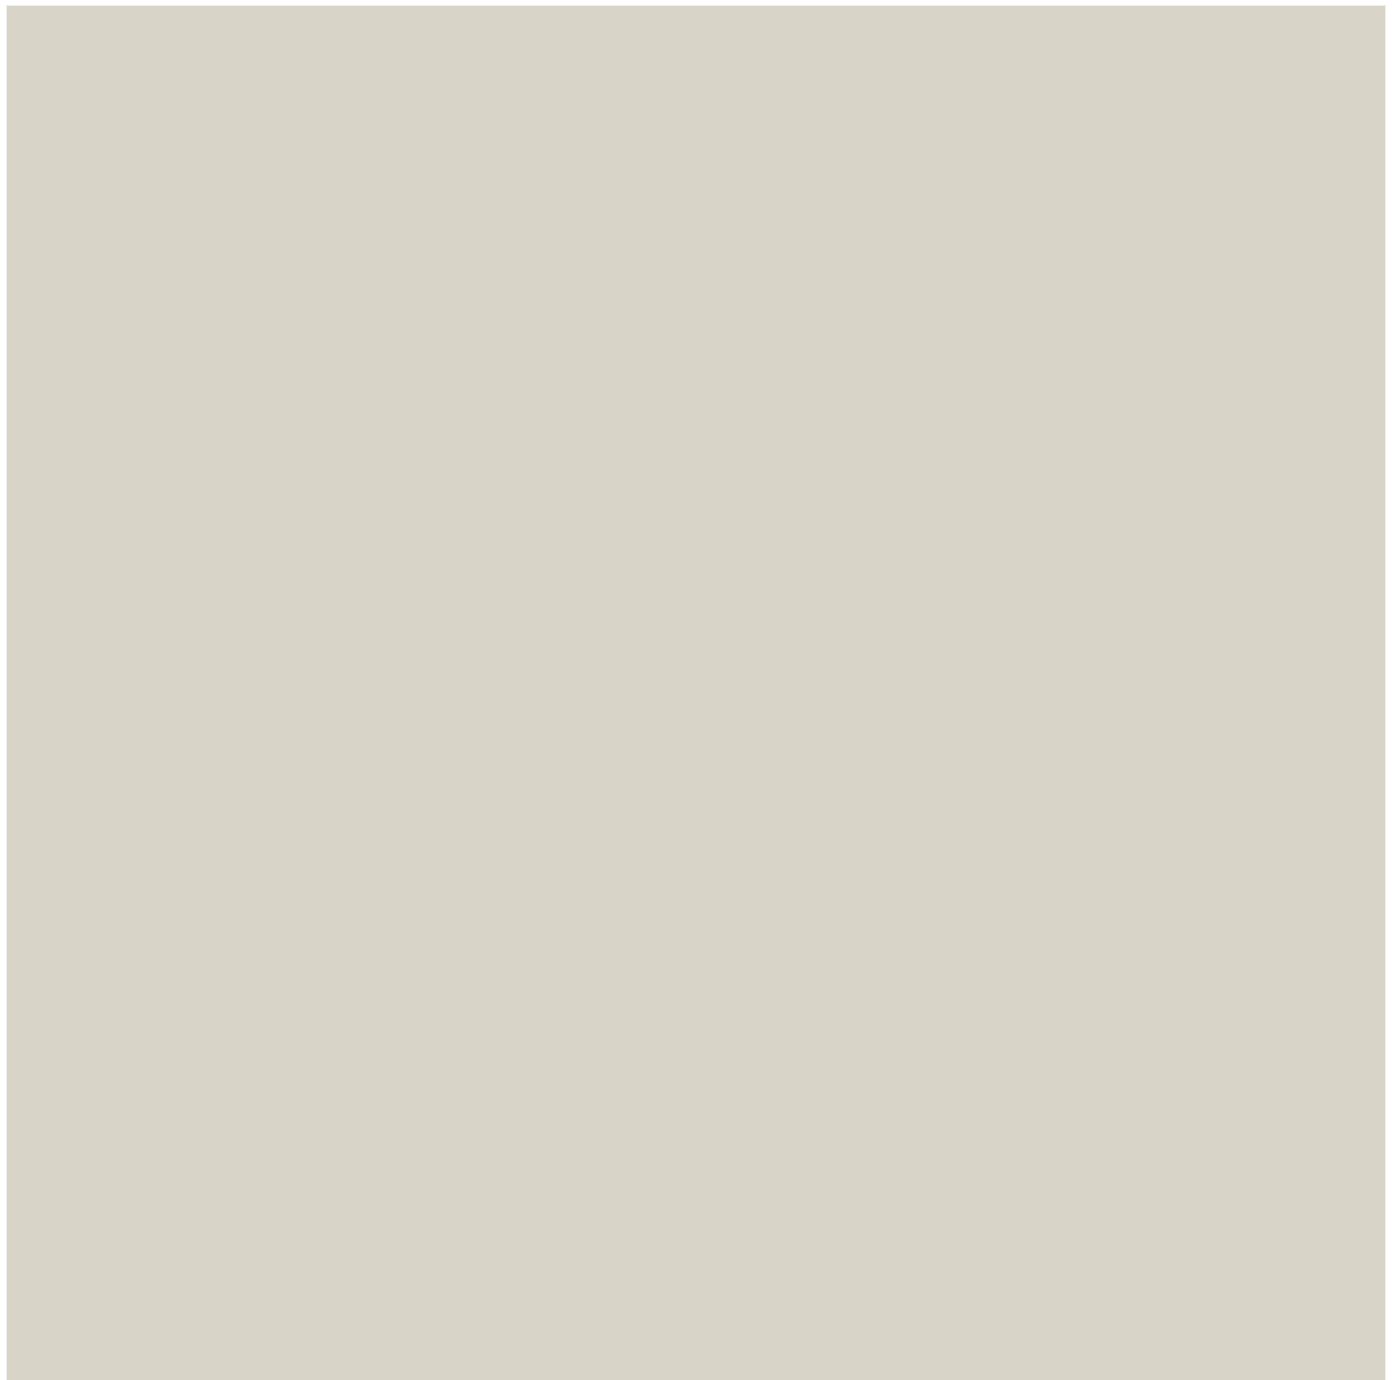

Figure 4: A close-up view of the core-removable lock mechanism and the two keys provided for securing the cabinet's contents.

5. MAINTENANCE

- **Cleaning:** To clean the cabinet, wipe surfaces with a damp cloth. Avoid abrasive cleaners or harsh chemicals that could damage the finish.
- **Drawer Slides:** The heavy-duty ball-bearing slide suspension is designed for long-lasting, smooth operation. If drawers become stiff, ensure they are not overloaded and that the cabinet is level. Lubrication is generally not required for these types of slides.

6. TROUBLESHOOTING

- **Drawer Not Opening:**
 - Ensure the cabinet is unlocked.
 - Check if another drawer is already open. The interlock system prevents more than one drawer from opening at

a time. Close any open drawers completely.

- If a drawer feels stuck, gently nudge other drawers to ensure they are fully closed and have engaged the safety interlock. You may hear a slight click when the safety engages.
- Verify the cabinet is level. An unlevel cabinet can affect drawer alignment.

• **Locking Mechanism Issues:**

- If the lock feels flimsy or only locks on one side, ensure all drawers are fully closed before attempting to lock the cabinet.
- Do not force the key. If it's difficult to turn, check for obstructions or ensure drawers are properly aligned.

• **Tipping Hazard:**

- Always ensure the cabinet is on a level surface and the leveling guides are properly adjusted.
- Never attempt to open more than one drawer at a time. The interlock system is a critical safety feature.
- Do not climb on or lean heavily on open drawers.

7. SPECIFICATIONS

Feature	Detail
Brand	Lorell
Model Number	LLR43512
Color	Putty
Product Dimensions (D x W x H)	21.12" x 38.5" x 70.88"
