# Bose® Wave® Music System Multi-CD Changer

## USER MANUAL

Model: Wave music system (Changer Accessory) | Brand: Bose

### 1. Product Overview

This document provides instructions for the Bose® Wave® Music System Multi-CD Changer, an accessory designed to expand the capabilities of your compatible Bose® Wave® music system. This changer allows for continuous playback of up to three additional CDs or MP3 CDs, complementing the single CD slot of the main Wave® music system.

The changer integrates seamlessly with your existing system, maintaining a compact footprint. It includes a spare remote control and offers an auxiliary input for connecting other audio sources.

### 2. Important Compatibility Information

This Multi-CD Changer is designed exclusively for specific Bose® Wave® music system models. Please review the compatibility details carefully before attempting installation.

- **Compatible with:** Bose Wave Music System AWRCC1 and Bose Wave Music System AWRCC2 (with slot-loaded CD player).
- **Not compatible with:** Wave radio II, older Wave radio/CD players with top-loading CD design, Bose Wave Music System III, Bose Wave Music System IV, "Button Top" Bose players, or Acoustic Wave music systems.

A dedicated setup CD is required to enable your existing Bose Wave Music System to recognize and operate this CD changer. This changer functions as an accessory and cannot operate as a standalone unit.

### 3. Package Contents

Verify that all items are present in your package:

- Bose® Wave® Music System Multi-CD Changer
- Remote Control (spare)
- Aux Cable

- Setup CD (essential for initial configuration)

## 4. Setup Instructions

Follow these steps to connect and configure your Multi-CD Changer with your compatible Bose® Wave® music system:

1. **Placement:** Position the Multi-CD Changer directly beneath or adjacent to your compatible Bose® Wave® music system. Ensure adequate ventilation around both units.
2. **Connect Cables:** Locate the two connection ports on the back of the Multi-CD Changer. Connect the provided cables from these ports to the corresponding input ports on your Bose® Wave® music system.
3. **Power Connection:** Ensure both the Wave® music system and the Multi-CD Changer are connected to a power source.
4. **Run Setup CD:** Insert the included Setup CD into the main CD slot of your Bose® Wave® music system. Follow the on-screen or audio prompts to allow your system to recognize and configure the new Multi-CD Changer. This step is crucial for proper operation.
5. **Auxiliary Input (Optional):** If connecting an additional audio source (e.g., TV, DVD player), use the provided Aux Cable to connect it to the auxiliary input port on the Multi-CD Changer.

## 5. Operating Instructions

### 5.1 Loading and Playing CDs

1. **Loading Discs:**
  - For the main Wave® music system: Insert one CD or MP3 CD into the slot on the main unit.
  - For the Multi-CD Changer: Gently slide up to three additional CDs or MP3 CDs into the designated slots on the front panel of the changer. The slots are typically labeled (e.g., Disc 2, Disc 3, Disc 4).
2. **Selecting Discs:** Use the remote control provided with your Wave® music system (or the spare remote from the

changer). Press the "CD" button repeatedly to cycle through the loaded discs (Disc 1 from the main unit, then Disc 2, Disc 3, Disc 4 from the changer).

3. **Playback Controls:** Use the standard playback controls (Play, Pause, Skip, Stop) on your remote or main system to manage audio playback.

## 5.2 Using the Auxiliary Input

To play audio from a connected external device (e.g., TV, DVD player) through the Multi-CD Changer's auxiliary input:

1. Ensure the external device is properly connected to the auxiliary input port on the changer using the Aux Cable.
2. Select the auxiliary input source on your Bose® Wave® music system. Refer to your main system's manual for specific instructions on source selection.

## 6. Maintenance

### 6.1 Care and Cleaning

- **Cleaning the Exterior:** Use a soft, dry cloth to clean the exterior surfaces of the changer. Avoid abrasive cleaners or solvents.
- **Disc Care:** Handle CDs by their edges. Keep them clean and free of scratches to ensure optimal playback.
- **Ventilation:** Ensure the changer's ventilation openings are not blocked to prevent overheating.
- **Power:** Disconnect the power cord from the wall outlet if the unit will be unused for extended periods.

## 7. Troubleshooting

### 7.1 Common Issues and Solutions

- **Changer not recognized by Wave® system:**
  - Verify all cables are securely connected between the changer and the main system.
  - Ensure the Setup CD has been run successfully. If not, re-insert the Setup CD into the main Wave® system and follow the prompts.
  - Confirm your Wave® music system model is compatible with this changer (refer to "Important Compatibility Information").
- **Discs not playing or skipping:**
  - Check if discs are clean and free of scratches or smudges.

- Ensure discs are inserted correctly into the slots.
- Try a different disc to determine if the issue is with the disc or the changer.
- **No sound from auxiliary input:**
  - Verify the external audio source is properly connected to the changer's auxiliary input.
  - Ensure the correct input source is selected on your Bose® Wave® music system.
  - Check the volume levels on both the external device and the Wave® system.
- **Remote control not working:**
  - Check the battery in the remote control and replace if necessary.
  - Ensure there are no obstructions between the remote and the Wave® music system.
