EMPIRE Cordless Phone Battery User Manual for Vtech 2600 Compatible Models

Model: 74436-EM-CPH-482D

1. INTRODUCTION

This manual provides essential instructions for the safe and effective use of your EMPIRE NiMH 3.6V 1500mAh Cordless Phone Battery. This battery is designed to be compatible with Vtech 2600 cordless phones and other models requiring similar specifications. Please read this manual thoroughly before installation and use.

2. SAFETY INFORMATION

Observe the following safety precautions to prevent damage to the battery, phone, or personal injury:

- **DO NOT DISASSEMBLE:** Attempting to disassemble the battery can cause short circuits, fire, or exposure to hazardous materials.
- **DO NOT DISPOSE OF IN FIRE:** Batteries can explode or leak when exposed to fire.
- **DO NOT STORE IN HIGH TEMPERATURES:** Avoid storing the battery in temperatures exceeding 60°C (140°F). High temperatures can reduce battery life and pose a safety risk.
- **CHARGE ONLY WITH SPECIFIED CHARGER:** Use only the charger provided with your cordless phone or a compatible charger designed for NiMH batteries. Using an incompatible charger may damage the battery or phone.
- Keep batteries out of reach of children.
- If battery fluid comes into contact with skin or eyes, flush immediately with water and seek medical attention.

3. PACKAGE CONTENTS

- 1 x EMPIRE NiMH 3.6V 1500mAh Cordless Phone Battery (Model: 74436-EM-CPH-482D)

4. SETUP AND INSTALLATION

Follow these steps to install the battery into your compatible cordless phone:

1. **Locate the Battery Compartment:** On most cordless phones, the battery compartment is located on the

back of the handset. Refer to your phone's original user manual if you cannot locate it.

2. **Remove Old Battery (if applicable):** If replacing an old battery, carefully disconnect its connector from the phone's battery terminal and remove the old battery.
3. **Insert New Battery:** Place the new EMPIRE battery into the compartment, ensuring the wires are not pinched.
4. **Connect the Battery:** Align the battery connector with the terminal inside the phone's battery compartment and push firmly until it clicks into place. Ensure the connection is secure.
5. **Close Compartment:** Replace the battery compartment cover.

This image shows the battery with its rating label and connector wires.

Figure 2: Close-up view of the battery's white connector, showing the red and black wires. This connector must be securely plugged into the phone's battery terminal.

5. OPERATING INSTRUCTIONS

5.1 Initial Charging

For optimal performance, fully charge the new battery before its first use. Place the handset with the newly installed battery into its charging cradle for at least 12-16 hours, even if the phone indicates a full charge sooner. This initial charge helps to condition the NiMH battery.

5.2 Regular Use and Charging

- Return the handset to its charging cradle when not in use to ensure it is always ready.
- NiMH batteries benefit from occasional full discharge/recharge cycles to maintain capacity. If you notice reduced talk time, allow the battery to fully discharge before recharging it completely.
- Avoid leaving the battery completely discharged for extended periods, as this can reduce its lifespan.

6. MAINTENANCE AND CARE

- **Cleaning:** Keep the battery and phone contacts clean and free of dust or debris. Use a dry, soft cloth for cleaning.
- **Storage:** If storing the battery for an extended period, charge it to approximately 50% capacity and store it in a cool, dry place. Recharge every 3-6 months to prevent deep discharge.
- **Disposal:** Do not dispose of batteries in household waste. NiMH batteries contain recyclable materials. Consult your local waste management facility for proper recycling or disposal options.

7. TROUBLESHOOTING

Problem	Possible Cause	Solution
Phone does not turn on after battery installation.	Battery not properly connected or not charged.	Ensure the battery connector is securely plugged in. Place the handset on the charger for at least 12-16 hours.
Short talk time or standby time.	Battery not fully charged, battery conditioning needed, or battery nearing end of life.	Perform a full discharge/recharge cycle. Ensure the phone is on the charger when not in use. If the issue persists after several cycles, the battery may need replacement.
Phone displays "Low Battery" frequently.	Battery not holding charge effectively.	Ensure charging contacts are clean. Perform a full discharge/recharge cycle. If the problem continues, consider replacing the battery.

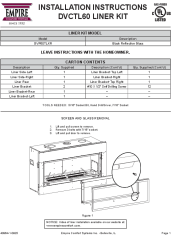

8. SPECIFICATIONS

Feature	Detail
Model Number	74436-EM-CPH-482D
Battery Type	Nickel-Metal Hydride (NiMH)
Voltage	3.6V
Capacity	1500 mAh (Milliampere-hour)
Compatibility	Vtech 2600 Cordless Phone and other compatible models
Dimensions	1.99 x 1.67 x 0.57 inches
Weight	2.36 ounces

9. WARRANTY AND SUPPORT

For warranty information or technical support, please refer to the documentation provided with your purchase or contact the seller directly. Keep your purchase receipt as proof of purchase.
