Verbatim 53071

Verbatim 53071 1TB Store 'n' Go USB 3.0 2.5 Inch External Hard Drive - Silver User Manual

Model: 53071

INTRODUCTION

The Verbatim Store 'n' Go portable hard drive offers high-performance data storage through its USB 3.0 "Super Speed" interface. This interface provides significantly faster data transfer rates compared to USB 2.0, making it efficient for managing files on the go. This external drive is designed for portability, allowing users to store and transport digital and work-related files easily. Its sleek design complements modern desktop environments and laptops.

The drive is bus-powered via a single USB 3.0 interface, eliminating the need for an external power adapter. It is also backward compatible with USB 2.0 ports. The drive comes pre-formatted in FAT32, ensuring compatibility with both Windows OS and Mac OS systems.

SETUP

- 1. Unpack the Drive:** Carefully remove the Verbatim Store 'n' Go portable hard drive and its accompanying USB 3.0 cable from the packaging.
- 2. Connect to Computer:**
 - Locate an available USB 3.0 port on your computer (PC, laptop, or Mac). USB 3.0 ports are typically blue internally or marked with a "SS" (SuperSpeed) symbol.
 - Insert the smaller end of the provided USB 3.0 cable into the port on the Verbatim hard drive.
 - Insert the larger end of the USB 3.0 cable into the USB 3.0 port on your computer.

Figure 3: Detail of the USB 3.0 port on the drive.

- 3. Automatic Recognition:** The drive is plug-and-play and bus-powered, meaning it should be automatically recognized by your operating system (Windows or Mac) without requiring additional power or driver installation.
- 4. Access the Drive:** Once recognized, the drive will appear as a removable storage device in your computer's file explorer (Windows) or Finder (Mac). You can now access and manage your files.

OPERATING THE DRIVE

Data Transfer

To transfer files, simply drag and drop them to and from the Verbatim Store 'n' Go drive, or use your operating system's copy/paste functions. The USB 3.0 interface ensures fast transfer speeds for large files.

Included Software (Windows Only)

The Verbatim Store 'n' Go drive includes "Nero BackItUp and Burn Essentials" software for Windows users (compatible with Windows XP, Vista, and Windows 7; not compatible with Mac OS). This software offers three main functions:

- **Backup:** Create backups of your files, folders, and entire drives. You can perform manual backups or schedule automatic backups for enhanced data security.
- **Burning:** Use Nero Express to burn your files to CDs or DVDs.
- **Recovery:** Nero RescueAgent provides an option to recover files that may have become damaged.

For detailed instructions on using the Nero software, please refer to the software's internal help documentation.

MAINTENANCE

Safe Removal

Always ensure the drive is safely removed from your computer to prevent potential file corruption or damage to the disk. Use the "Safely Remove Hardware and Eject Media" option in Windows or drag the

drive icon to the Trash/Eject in Mac OS before disconnecting the USB cable.

Green Button Energy Saving Software (Windows Only)

The drive comes with Green Button energy-saving software for Windows. This software helps increase efficiency and save energy by suspending the hard drive from spinning when not in use. It offers three 'Sleep Setting' options:

- Set the suspend mode to activate after 10 minutes of inactivity.
- Adjust the suspend mode in increments of 10 minutes, up to 120 minutes.
- Set the drive to suspend immediately by double-clicking the Green Button icon on your desktop.
- Alternatively, you can set the drive to 'Never Suspend the disk' if continuous operation is preferred.

TROUBLESHOOTING

• Drive Not Recognized:

- Ensure the USB cable is securely connected to both the drive and the computer.
- Try connecting the drive to a different USB port on your computer.
- Test the drive on another computer to rule out computer-specific issues.
- If using a USB hub, try connecting the drive directly to the computer's USB port.

• Slow Data Transfer:

- Ensure you are connected to a USB 3.0 port for optimal speed. Connecting to a USB 2.0 port will result in slower transfer rates.
- Check for other applications or processes that might be heavily utilizing system resources or disk I/O.

• File System Issues (e.g., RAW format):

If the drive's file system becomes corrupted (e.g., showing as RAW), data recovery might be necessary. In such cases, it is recommended to consult professional data recovery services or specialized software. Reformatting the drive will erase all data.

SPECIFICATIONS

Feature	Detail
Capacity	1TB
Interface	USB 3.0 / 2.0 port
Data Transfer Rate	Up to 4800 Mbits/second (USB Bus Speed)
Rotational Speed	5400 RPM
Cache	8MB or greater
Dimensions (LxWxH)	121mm x 80mm x 15mm (4.76 x 3.15 x 0.59 inches)
Product Weight	184g (0.01 ounces)
Power	Bus powered via USB 3.0 cable (no external power required)

Hardware Platform	Mac, PC
System Requirements	USB 3.0 / 2.0 port, Windows 2000 / XP / Vista / 7 / 8, Mac OS X 10.1 or higher, Linux kernel 2.6 and higher
Color	Silver
