Official Guide for Kerasal Nail Renewal

## **INTRODUCTION TO KERASAL NAIL RENEWAL**

---

Kerasal Nail Renewal is a transformative solution designed to improve the appearance of discolored or damaged nails. It works by reducing discoloration and thickness, while also hydrating and exfoliating brittle nails. This product is America's best-selling fungal nail renewal product, with visible improvements often seen in as little as 2 days.

## **INGREDIENTS**

The active ingredients in Kerasal Nail Renewal are:

- Propylene Glycol
- Urea
- Glycerin
- Lactic Acid
- Water
- Sodium Hydroxide
- Disodium EDTA

Kerasal combines the keratolytic properties of urea and lactic acid with hydrating propylene glycol to deeply penetrate the nail plate, softening and rehydrating it.

## PREPARATION FOR USE

---

Before applying Kerasal Nail Renewal, ensure the affected nail(s) are clean and dry. It is recommended to trim and file the nails as needed to remove any excessively damaged or thickened parts, which can help the solution penetrate more effectively.

## DIRECTIONS FOR USE

---

1. **Initial Application (First Week):** Apply a thin layer of Kerasal Nail Renewal to the affected nail(s) twice per day. This should be done once in the morning and once at night. Ensure the solution is applied directly to the nail surface and under the free edge of the nail (both toenails and fingernails can be treated).
2. **Continued Application (After First Week):** After the first week, continue to apply the solution once per day, preferably at night. Continue this daily application for a minimum of 8 weeks total.
3. **Drying Time:** Allow a few minutes for the solution to dry after each application before putting on socks, shoes, or engaging in activities that might rub off the product.
4. **Duration of Treatment:** Depending on the severity of the nail condition, 3 to 6 months of consistent application may be needed to achieve the full desired effect and restore the nail's appearance.

## MAINTENANCE AND LONG-TERM CARE

---

For optimal and lasting results, it is crucial to maintain consistent application as directed. Even after visible improvements are achieved, continuing the daily application helps ensure the nail remains healthy and prevents recurrence of discoloration or damage. Continue using the product until the affected nail has fully grown out and appears healthy.

## TROUBLESHOOTING

---

- **No visible results after a few months:** Ensure consistent application as per directions. Some severe cases may require longer treatment periods (up to 6 months). If no improvement is seen after prolonged, consistent use, consult a healthcare professional.
- **Nails still discolored or thick:** Kerasal works to normalize thickness and reduce discoloration. Continue daily application. The process of nail renewal takes time as new, healthy nail grows out.
- **Irritation or discomfort:** Discontinue use if irritation or discomfort occurs. Review the safety information and

consult a healthcare professional if symptoms persist.
