Jamara 404311 1:14 27 MHz Porsche GT3 RS Deluxe Car Instruction Manual

Model: 404311 | Brand: Jamara

INTRODUCTION

Thank you for choosing the Jamara 404311 1:14 27 MHz Porsche GT3 RS Deluxe Car. This remote-controlled model car is designed for both indoor and outdoor use, offering an engaging driving experience. It features a detailed interior and is officially licensed by the manufacturer, ensuring an authentic replica.

This manual provides essential information for the safe and proper setup, operation, and maintenance of your new RC car. Please read it thoroughly before first use.

SAFETY INSTRUCTIONS

WARNING: This product is recommended for ages 6 and up. Use under the direct supervision of adults. Not suitable for children under 36 months due to small parts which can be swallowed, posing a risk of suffocation.

- Always operate the model in a safe environment, away from people, pets, and obstacles.
- Do not operate near roads, water, or high-voltage lines.
- Ensure all batteries are inserted with correct polarity.
- Do not mix old and new batteries, or different types of batteries.
- Remove batteries from the car and transmitter when not in use for extended periods.
- Keep packaging and instructions for future reference.

WHAT'S IN THE BOX

Upon opening the package, please ensure all the following components are present:

- 1 x Jamara Porsche GT3 RS Deluxe Car (Model)
- 1 x Transmitter (Remote Control)
- 1 x Instruction Manual

SETUP

1. Battery Installation

The Jamara Porsche GT3 RS Deluxe Car requires 5 AA batteries for operation (not included).

For the Car:

1. Locate the battery compartment on the underside of the car.
2. Use a screwdriver to open the battery compartment cover.

3. Insert the required AA batteries, ensuring correct polarity (+/-).
4. Replace the battery compartment cover and secure it with the screw.

For the Transmitter (Remote Control):

1. Locate the battery compartment on the back of the transmitter.
2. Open the battery compartment cover.
3. Insert the required batteries (typically 2 AA, check compartment for specific type/quantity), ensuring correct polarity (+/-).
4. Replace the battery compartment cover.

2. Initial Connection

1. Turn on the car using the ON/OFF switch, usually located on the underside.
2. Turn on the transmitter. The car and transmitter should automatically connect.
3. If the car does not respond, turn both devices off and then on again, ensuring they are close to each other.

OPERATING INSTRUCTIONS

The Jamara Porsche GT3 RS Deluxe Car is controlled via a 2-channel transmitter, allowing for precise movements.

Controls:

- **Forward/Reverse:** Use the designated control (e.g., joystick or trigger) on the transmitter to move the car forward or backward.
- **Left/Right:** Use the steering control (e.g., steering wheel or directional buttons) to turn the car left or right.

- **Stop:** Releasing the forward/reverse control will typically bring the car to a stop.

Driving Tips:

- **Indoor Use:** Ideal for smooth, flat surfaces. Be mindful of furniture and walls.
- **Outdoor Use:** Best on paved surfaces or short, dry grass. Avoid wet conditions, sand, or rough terrain to prevent damage.
- **Running Time:** Expect approximately 45-60 minutes of continuous operation on a fresh set of batteries. Performance may vary based on battery quality and driving style.
- Practice makes perfect! Start in an open area to get accustomed to the controls.

MAINTENANCE

Cleaning:

- After each use, especially outdoors, gently wipe the car with a soft, dry cloth to remove dust and dirt.
- Do not use water or chemical cleaners, as these can damage the electronics.
- Use a small brush or compressed air to clean hard-to-reach areas around the wheels and chassis.

Battery Care:

- Always remove batteries from the car and transmitter when storing for extended periods to prevent leakage.
- Dispose of used batteries responsibly according to local regulations.

Storage:

- Store the car and transmitter in a cool, dry place, away from direct sunlight and extreme temperatures.
- Keep the original packaging for safe storage and transport if desired.

TROUBLESHOOTING

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Car does not respond to transmitter.	<ul style="list-style-type: none"> Batteries are low or incorrectly installed. Car or transmitter is not turned on. Interference from other 27 MHz devices. 	<ul style="list-style-type: none"> Replace batteries in both car and transmitter, ensuring correct polarity. Ensure both car and transmitter are switched ON. Move to an area with less interference.
Car moves slowly or erratically.	<ul style="list-style-type: none"> Low batteries. Obstruction in wheels or chassis. 	<ul style="list-style-type: none"> Replace batteries. Check and clear any debris from wheels and axles.
Steering is not straight.	<ul style="list-style-type: none"> Wheel alignment issue. 	<ul style="list-style-type: none"> Adjust the steering trim on the underside of the car or on the transmitter (if available).
