## Aiphone GT-1D

# Aiphone GT-1D Indoor Audio Station User Manual

Model: GT-1D | Brand: Aiphone

## PRODUCT OVERVIEW

The Aiphone GT-1D Indoor Audio Station is a reliable and easy-to-use intercom system designed for internal communication and door access control. It features a handset for clear audio communication and intuitive buttons for managing calls and unlocking doors. This unit is ideal for apartment complexes, offices, and other multi-unit dwellings requiring secure and efficient entry management.

Figure 1: Aiphone GT-1D Indoor Audio Station. This white unit features a handset on the left and a panel with three circular buttons on the right. The handset is connected by a coiled cord at the bottom.

## SETUP AND INSTALLATION

---

The Aiphone GT-1D is designed for straightforward installation, typically requiring a 2-wire connection. It is intended for wall-mounted installation. For optimal performance and safety, professional installation is recommended.

### Mounting the Unit

- Ensure the mounting surface is clean and stable.
- Identify the appropriate location for the unit, typically near the main entrance or in a central living area.

- Secure the mounting bracket (if applicable, not included) to the wall using appropriate screws and anchors.
- Connect the 2-wire system wiring to the designated terminals on the back of the unit. Ensure correct polarity.
- Carefully attach the GT-1D unit to the mounted bracket, ensuring it is securely fastened.

After physical installation, test the unit's functionality by initiating a call from the street turntable and verifying audio communication and door release operation.

## OPERATING INSTRUCTIONS

---

The GT-1D audio station provides simple controls for managing incoming calls and granting access.

### Receiving a Call

1. When a visitor calls from the street turntable, the indoor station will ring.
2. Lift the handset from its cradle to answer the call and establish two-way audio communication.

### Unlocking the Door

- During an active call, press the **door release button** (often marked with a key icon) on the right panel of the unit. This will momentarily unlock the entrance door.

### Other Functions

- The unit typically includes a **monitor button** (often marked with a camera or monitor icon) to listen to the outdoor station without answering a call.
- A **talk button** (often marked with a microphone icon) may be present for initiating communication or switching between talk/listen modes if not automatic.

Ensure the handset is properly placed back in its cradle after use to terminate the call and prepare for the next incoming communication.

## MAINTENANCE

---

Regular maintenance helps ensure the longevity and optimal performance of your Aiphone GT-1D audio station.

### Cleaning

- Wipe the exterior of the unit with a soft, damp cloth.
- Do not use abrasive cleaners, solvents, or strong chemicals, as these can damage the finish.
- Ensure no liquid enters the unit's openings.

### General Care

- Avoid exposing the unit to excessive moisture or direct sunlight.
- Do not attempt to open the unit or perform repairs yourself, as this may void the warranty and cause damage.

## TROUBLESHOOTING

---

If you experience issues with your Aiphone GT-1D, refer to the following common troubleshooting steps:

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
No audio during a call.	Loose wiring connection; faulty handset; issue with outdoor station.	Check wiring connections. Ensure handset is properly seated. If problem persists, contact a qualified technician.
Door release button not working.	No active call; wiring issue to door strike; faulty button.	Ensure you are on an active call. Verify wiring to the door strike. Contact a technician if the issue continues.
Unit not ringing.	Outdoor station not calling; wiring issue; unit malfunction.	Test the outdoor station. Check wiring. If necessary, consult a professional.

For complex issues or repairs, always contact a certified Aiphone service technician.

## SPECIFICATIONS

- Model Name:** GT-1D
- Brand:** Aiphone
- Color:** White
- Connectivity Technology:** Wired
- Product Dimensions:** 3 x 4 x 9 inches (7.62 x 10.16 x 22.86 cm)
- Item Weight:** 14.4 ounces (0.41 kg)
- Material:** Stainless Steel (as per manufacturer specifications)
- Included Components:** Cable
- Specific Uses:** Internal communication, Doorbell
- Control Type:** Call Control, Push Button, Remote
- Ear Placement:** Open Ear (referring to handset design)
- Headphones Jack:** 3.5 mm Jack (for compatible accessories, if applicable)
