

## Jiffy Steamer 0221

# Jiffy Steamer J-2 Personal Clothes Steamer Instruction Manual

**Brand:** Jiffy Steamer

**Model:** 0221 (Plastic Steam Head)

## 1. INTRODUCTION

The Jiffy Steamer J-2 is designed for quick and efficient wrinkle removal from most fabrics, suitable for both home and light commercial use. Steaming offers a gentler alternative to traditional ironing, effectively smoothing wrinkles from clothing, tablecloths, bedspreads, and delicate materials without the need for temperature settings. This manual provides essential information for the safe and effective operation and maintenance of your Jiffy Steamer J-2.

## 2. IMPORTANT SAFETY INFORMATION

**WARNING: Failure to follow these instructions may result in electric shock, fire, serious injury, or property damage.**

- Always use distilled water to prevent mineral buildup and prolong the life of your steamer.
- Do not overfill the water tank.
- Keep the steamer out of reach of children and pets.
- Exercise caution when handling the steam head and hose, as they become very hot during operation. Avoid direct contact with skin.
- Never direct steam at people or animals.
- Ensure the steamer is placed on a stable, level surface during use.
- Unplug the steamer from the electrical outlet when not in use and before cleaning.
- Do not operate the steamer with a damaged cord or plug.

### 3. PACKAGE CONTENTS

---

Your Jiffy Steamer J-2 package should include the following components:

- J-2 Steamer Base Unit with 1300-watt heating element
- Removable Water Tank (3.79 liters capacity)
- Flexible Steam Hose with Plastic Steam Head
- Adjustable Aluminum Rod
- Garment Hanger Hook
- Wrench for assembly
- Instruction Manual

#### 4. SETUP INSTRUCTIONS

1. **Unpack Components:** Carefully remove all parts from the packaging.
2. **Attach Aluminum Rod:** Insert the adjustable aluminum rod into the designated opening on the top of the steamer base. Secure it by tightening the screw or clamp mechanism.
3. **Install Garment Hanger:** Place the garment hanger hook onto the top of the aluminum rod.
4. **Connect Steam Hose:** Screw the flexible steam hose securely into the brass fitting on the steamer base. Use the provided wrench to ensure a tight, leak-free connection.
5. **Fill Water Tank:** Remove the water tank from the base. Unscrew the cap and fill the tank with distilled water. Do not use tap water as it can cause mineral buildup. Replace the cap securely.
6. **Place Water Tank:** Carefully place the filled water tank back into the steamer base, ensuring it is seated correctly.

## 5. OPERATING INSTRUCTIONS

1. **Power On:** Plug the steamer into a standard 120V electrical outlet. Flip the power switch located on the base of the unit to the "ON" position. The steamer will begin to heat up, typically ready to produce steam in about 1 minute.
2. **Prepare Garment:** Hang the garment you wish to steam on the hanger hook. Gently pull the fabric taut with one hand.
3. **Steam Application:** Hold the plastic steam head a few inches away from the fabric. Move the steam head in a downward motion, allowing the steam to relax the fibers and remove wrinkles. For stubborn wrinkles, you may gently press the steam head against the fabric.
4. **Steaming Delicate Fabrics:** For very delicate fabrics like silk or certain synthetics, maintain a slightly greater distance between the steam head and the fabric to avoid potential damage or water marks.
5. **Steaming Sleeves and Collars:** For sleeves, you can insert the steam head inside the sleeve and steam from the inside out. For collars, gently steam along the edges.
6. **Power Off:** Once steaming is complete, flip the power switch to the "OFF" position and unplug the unit. Allow the steamer to cool down completely before storing.

## 6. MAINTENANCE

---

Proper maintenance ensures the longevity and optimal performance of your Jiffy Steamer. Always unplug the unit and allow it to cool completely before performing any maintenance.

- **Regular Cleaning:** Keeping your Jiffy Steamer clean ensures it will provide years of satisfactory performance. Wipe down the exterior of the unit with a damp cloth.
- **Descaling:** Over time, mineral deposits can accumulate, especially if non-distilled water is used. To descale, empty the water tank and fill it with a descaling solution (e.g., a mixture of white vinegar and water, or a commercial descaling product designed for steamers). Follow the descaling product's instructions or run the steamer with the vinegar solution until it's empty. Rinse thoroughly with distilled water.
- **Storage:** Store the steamer in a dry, cool place. Ensure the water tank is empty before storing to prevent mildew or mineral buildup.

## 7. TROUBLESHOOTING

---

If you encounter issues with your Jiffy Steamer, refer to the following common solutions:

- **No Steam:**
  - Check if the unit is plugged in and the power switch is ON.
  - Ensure the water tank is filled with water.
  - Allow sufficient time (approx. 1 minute) for the unit to heat up.
- **Water Spitting from Steam Head:**
  - This can occur if the hose is kinked or if there is excessive condensation. Straighten the hose.
  - Ensure the water tank is not overfilled.
  - If using tap water, switch to distilled water to reduce mineral buildup.
- **Weak Steam:**
  - The water tank might be low. Refill with distilled water.
  - Mineral buildup may be affecting performance. Perform a descaling procedure.

## 8. SPECIFICATIONS

---

<b>Brand</b>	Jiffy Steamer
<b>Model Number</b>	0221
<b>Style</b>	Plastic Steam Head
<b>Color</b>	Gray
<b>Wattage</b>	1300 watts
