# De'Longhi Milk Pitcher Connector User Manual

Model: 5513214821 | For ESAM 5500 - ESAM 6700 Series Coffee Machines

## 1. INTRODUCTION

This manual provides essential information for the installation, maintenance, and troubleshooting of your De'Longhi Original Milk Pitcher Connector. This component is crucial for the proper functioning of the milk frothing system on compatible De'Longhi coffee machines, ensuring optimal performance for your cappuccino and latte preparations.

## 2. COMPATIBILITY

The De'Longhi Milk Pitcher Connector (Model 5513214821) is specifically designed for the following De'Longhi ESAM series coffee machines:

- EABI6600 Delonghi EABI6600 Primadonna
- EN690.T Delonghi Nespresso LATTISSIMA
- ESAM5500 Delonghi ESAM5500 Perfecta Cappuccino
- ESAM5500.L Delonghi ESAM5500.L Perfecta Burl Wood
- ESAM5500.M Delonghi ESAM5500.M Perfecta Cappuccino
- ESAM5500.P Delonghi ESAM5500.P Perfecta Leather
- ESAM5500.R Delonghi ESAM5500.R Perfecta Burl Wood
- ESAM5500.S Delonghi ESAM5500.S Perfecta Cappuccino
- ESAM5500.T Delonghi ESAM5500.T Perfecta Titanium
- ESAM5500.W Delonghi ESAM5500.W Perfecta Cappuccino
- ESAM5600 Delonghi ESAM5600 Perfecta
- ESAM5600.S Delonghi ESAM5600.S Perfecta Cappuccino
- ESAM6600 Delonghi ESAM6600 Primadonna
- ESAM6620 Delonghi ESAM6620 Primadonna
- ESAM6700 Delonghi ESAM6700 Prima Donna Avant

Please verify your machine's model number to ensure compatibility before installation.

## 3. INSTALLATION

Follow these steps to correctly install or replace the Milk Pitcher Connector:

1. **Preparation:** Ensure your coffee machine is turned off and unplugged from the power outlet. Allow the machine to cool down if it has recently been in use.
2. **Locate the Old Connector:** Identify the current milk pitcher connector on your machine. It is typically located on the side where the milk carafe attaches.
3. **Remove the Old Connector:** Carefully detach the old connector. Depending on your specific model, this may involve pressing a release button or gently pulling it away from the machine. Avoid excessive force.
4. **Inspect the Area:** Before installing the new connector, ensure the connection point on the coffee machine is clean and free from any milk residue or debris.
5. **Install the New Connector:** Align the new De'Longhi Milk Pitcher Connector with the connection point on the machine. Push it firmly until it clicks securely into place. Ensure it is seated correctly and does not wobble.
6. **Visual Confirmation:** Refer to the images below for visual guidance on the connector's appearance and proper attachment.

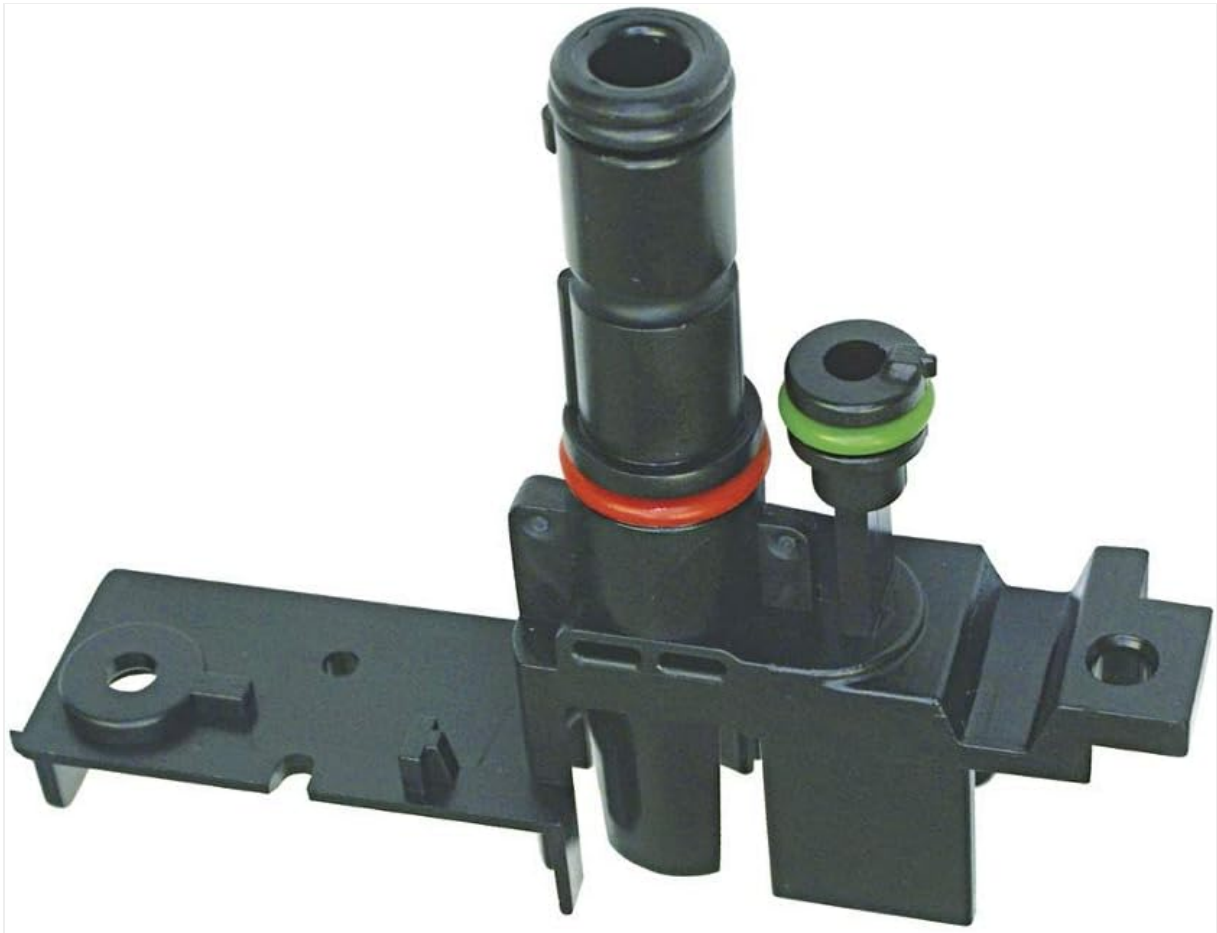

Figure 1: Front view of the De'Longhi Milk Pitcher Connector. This image displays the main body of the connector with its cylindrical attachment points and a red O-ring visible, indicating a secure seal.

Figure 2: Rear view of the De'Longhi Milk Pitcher Connector. This image shows the reverse side of the connector, highlighting its structural design and the various connection points for integration with the coffee machine's milk system.

7. **Test Functionality:** Plug the coffee machine back in and turn it on. Attach the milk carafe and perform a test cycle for milk frothing to ensure the new connector is working correctly and there are no leaks.

## 4. MAINTENANCE

Regular cleaning of the Milk Pitcher Connector is essential for hygiene and to maintain optimal frothing performance. Milk residue can clog the internal channels, leading to poor frothing or blockages.

- **Daily Cleaning:** After each use, detach the milk carafe and the connector. Rinse the connector thoroughly under warm running water to remove any milk residue.
- **Weekly Deep Cleaning:** For a more thorough clean, disassemble the connector if possible (refer to your coffee machine's main manual for specific instructions on disassembling the milk system components). Soak the parts in warm water with a mild detergent or a specialized milk system cleaner. Use a small brush to clean any narrow channels. Rinse all parts thoroughly before reassembling.
- **Descaling:** Periodically descale your coffee machine as per its main instruction manual. While descaling primarily targets mineral buildup, a clean internal system benefits all components, including the milk frother connector.

## 5. TROUBLESHOOTING

If you experience issues with your milk frothing system after installing or while using the connector, consider the following:

- **Poor or No Froth:** This is often caused by milk residue blocking the connector's internal channels. Perform a thorough deep cleaning as described in the Maintenance section. Ensure the milk carafe is also clean.
- **Leaking from Connector:** Check if the connector is securely attached to the machine and the milk carafe. Inspect the O-rings on the connector for any signs of wear or damage. If damaged, the O-rings may need replacement.
- **Connector Not Fitting:** Double-check that you have the correct model connector (5513214821) for your specific De'Longhi ESAM series machine. Ensure there are no obstructions at the connection point on the machine.

- **Unusual Noises:** While some operational noise is normal, excessive or unusual noises during frothing might indicate a blockage or an improperly seated component. Clean the connector and ensure it is correctly installed.

If problems persist after following these steps, please refer to the Support & Warranty section for further assistance.

## 6. SPECIFICATIONS

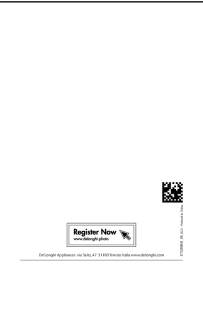

Brand	De'Longhi
Model Number	5513214821
Colour	Black
Product Dimensions	15.24 x 7.62 x 2.54 cm
Material	Titanium, Wood (Note: This material description from the source data seems unusual for a plastic connector. The actual product appears to be plastic. Please verify with manufacturer if exact material is critical.)
Item Weight	13.6 g
Special Feature	Milk Frother Component

## 7. SUPPORT & WARRANTY

For technical support, warranty information, or to purchase replacement parts, please contact De'Longhi customer service directly or visit their official website. Keep your proof of purchase handy when contacting support.

De'Longhi products are manufactured to high-quality standards. Specific warranty terms and conditions may vary by region and product type. Refer to the warranty documentation included with your original coffee machine or contact De'Longhi for details regarding this accessory.
