

Futaba R2008SB

Futaba R2008SB 8-Channel 2.4GHz S-FHSS Receiver User Manual

Model: R2008SB (FUTL7608)

1. INTRODUCTION

This manual provides essential information for the proper setup, operation, and maintenance of your Futaba R2008SB 8-Channel 2.4GHz S-FHSS Receiver. Please read this manual thoroughly before using the receiver to ensure safe and efficient operation.

The Futaba R2008SB is an advanced 2.4GHz S-FHSS receiver designed for use with Futaba S-FHSS or FHSS transmitters. It features S.Bus compatibility and Dual Antenna Diversity for reliable signal reception, and is capable of handling high voltage applications.

2. KEY FEATURES

- **Dual Antenna Diversity:** Seamlessly selects the best reception between two receiver antennas for enhanced signal reliability.
- **High Voltage Operation:** Equipped to handle applications with voltage ranging from 4.8V to 7.4V, suitable for various aircraft models.
- **Frequency Hopping Spread Spectrum (FHSS) Design:** Shifts frequencies hundreds of times per second, minimizing signal conflicts and interruptions.
- **S.Bus and Conventional Servo Compatibility:** Works with both S.Bus and traditional conventional servos, offering versatile connectivity options.

3. SPECIFICATIONS

Modes	S-FHSS or FHSS
Voltage Input	4.8V-7.4V battery or regulated output from ESC
Compatible Batteries	NiCd, NiMH, LiPo, Lilon, or LiFe
Dimensions (L x W x H)	0.98 x 1.69 x 0.55 inches (24.9 x 42.8 x 14.0 mm)

Weight	0.34 oz (9.5 g)
Model Number	FUTL7608
ASIN	B007KMNWJ2

Note: The R2008SB is capable of 4 channels only when operating in FHSS mode.

4. SETUP AND BINDING

4.1 Initial Inspection

Before installation, carefully inspect the receiver for any visible damage. Ensure the antennas are intact and properly connected.

4.2 Installation

Mount the R2008SB receiver in your model using vibration-absorbing material (e.g., foam tape) to protect it from vibrations. Position the two antennas at a 90-degree angle to each other to maximize signal reception and utilize the dual antenna diversity feature effectively. Avoid placing antennas near conductive materials or large metal objects that could shield the signal.

Image 1: Futaba R2008SB receiver showing its compact size and dual antenna configuration. The receiver has ports for channels 1-8 and an S.BUS port.

4.3 Binding Procedure

To bind the R2008SB receiver to your Futaba S-FHSS or FHSS transmitter, follow these steps:

1. Turn on your Futaba S-FHSS/FHSS transmitter and select the appropriate model memory. Ensure the transmitter is in S-FHSS or FHSS mode.
2. Connect a battery (4.8V-7.4V) to the R2008SB receiver. The LED on the receiver will begin to blink red.
3. Press and hold the **Link/Mode button** on the receiver for approximately 2 seconds. The LED will change from blinking red to solid green, indicating successful binding.
4. Release the button. The receiver is now bound to your transmitter.
5. Turn off both the transmitter and receiver, then turn them back on to confirm the binding. The receiver LED should

immediately show a solid green light.

If the LED blinks red after turning the receiver back on, the binding was unsuccessful. Repeat the procedure.

Image 2: Close-up view of the Futaba R2008SB receiver highlighting the LED indicator and the 'SW' (Switch/Link) button, which is used for binding.

5. OPERATION

5.1 Powering On

Always turn on your transmitter first, then power on the receiver. This ensures the receiver establishes a connection with the transmitter before any control inputs are active.

5.2 S.Bus System

The R2008SB features an S.Bus output port, allowing for a single cable connection to S.Bus compatible servos or S.Bus decoders. This simplifies wiring and reduces clutter in your model. Refer to your S.Bus servo or decoder manual for specific setup instructions.

5.3 Conventional Channel Outputs

The receiver also provides conventional channel outputs (1-8) for standard PWM servos. Connect your servos directly to the corresponding channel ports. Note that in FHSS mode, only 4 channels are available.

5.4 Range Check

Before each flight or operation, perform a range check to ensure proper signal integrity. Consult your transmitter's manual for the specific range check procedure. Typically, this involves activating a range check mode on the transmitter and walking a specified distance away from the model while observing servo response.

6. MAINTENANCE

- **Cleaning:** Keep the receiver clean and free from dust, dirt, and moisture. Use a soft, dry cloth for cleaning. Avoid using solvents or harsh chemicals.
- **Antenna Care:** Regularly inspect the receiver antennas for any nicks, cuts, or kinks. Damaged antennas can significantly reduce range and signal quality. Do not cut or modify the antennas.

- **Storage:** When not in use, store the receiver in a cool, dry place, away from direct sunlight and extreme temperatures.
- **Connection Check:** Periodically check all connections to the receiver, including servo leads and power input, to ensure they are secure and free from corrosion.

7. TROUBLESHOOTING

Problem	Solution
Receiver LED blinks red after binding attempt.	Binding was unsuccessful. Ensure your transmitter is in S-FHSS or FHSS mode and repeat the binding procedure carefully. Check battery voltage.
No response from servos.	Verify the receiver is properly bound (solid green LED). Check power supply to the receiver and servos. Ensure servo connections are correct and secure. Confirm transmitter is powered on and operating correctly.
Reduced range or intermittent signal.	Check antenna placement and ensure they are not shielded by carbon fiber or metal. Inspect antennas for damage. Perform a range check. Ensure no other 2.4GHz devices are causing interference nearby.
Receiver not powering on.	Check battery connection and voltage. Ensure the battery is charged and connected with correct polarity.

8. WARRANTY INFORMATION

The Futaba R2008SB 8-Channel 2.4GHz S-FHSS Receiver comes with a **one-year limited warranty** from the date of purchase. This warranty covers defects in materials and workmanship under normal use. It does not cover damage caused by misuse, accident, modification, or unauthorized repair.

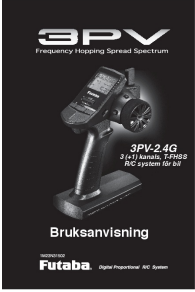

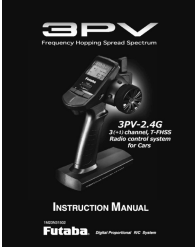

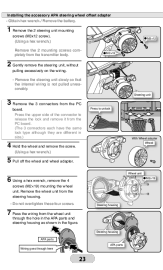

For warranty claims or service, please retain your proof of purchase and contact Futaba customer support or your authorized dealer.

9. CUSTOMER SUPPORT

If you encounter any issues not covered in this manual or require further assistance, please contact Futaba customer support. Visit the official Futaba website for contact details and additional resources.

For the latest information and updates, please refer to the official Futaba product page or support channels.
