

## Conair BE87MB

# Conair Reflections BE87MB 3-Way Touch Control Lighted Makeup Mirror User Manual

## INTRODUCTION

---

This manual provides comprehensive instructions for the safe and effective use of your Conair Reflections BE87MB 3-Way Touch Control Lighted Makeup Mirror. This double-sided mirror features 1x and 7x magnification, incandescent lighting with three brightness settings, and a matte black finish. Please read all instructions carefully before use.

## IMPORTANT SAFETY INFORMATION

---

For your safety, always unplug the mirror from the electrical outlet before performing any maintenance, cleaning, or when replacing parts. To prevent distorted reflections and potential eye strain, maintain a distance of at least 6 inches from the magnified side of the mirror during use.

## PACKAGE CONTENTS

---

- Conair Reflections BE87MB Lighted Makeup Mirror
- Integrated 5-foot line cord
- One 30-watt clear incandescent bulb (pre-installed)

## SETUP

---

1. Unpack the mirror and all components carefully.
2. Place the mirror on a stable, flat surface, such as a vanity or tabletop.
3. Ensure the mirror is positioned in a location where the 5-foot line cord can reach a standard electrical outlet without tension.
4. Plug the mirror's line cord into a 120V AC household outlet.

## OPERATING INSTRUCTIONS

---

### Adjusting Light Settings

1. To activate the light, gently touch the base of the mirror.
2. Each subsequent touch to the base will cycle through the three brightness settings: low, medium, and high.
3. To turn off the light, continue touching the base until the light extinguishes.

**3-way touch control  
light settings**

Gently adjust to low,  
medium, or high

Image: A hand demonstrates the 3-way touch control by touching the base of the mirror. This action cycles the incandescent light through low, medium, and high brightness levels.

### **Incandescent lighting**

Don't let your daily routine go dark!  
*one 30 watt clear bulb included*

Image: A detailed view of the mirror's incandescent lighting, which provides a soft, even illumination for makeup application and grooming.

### **Using Magnification**

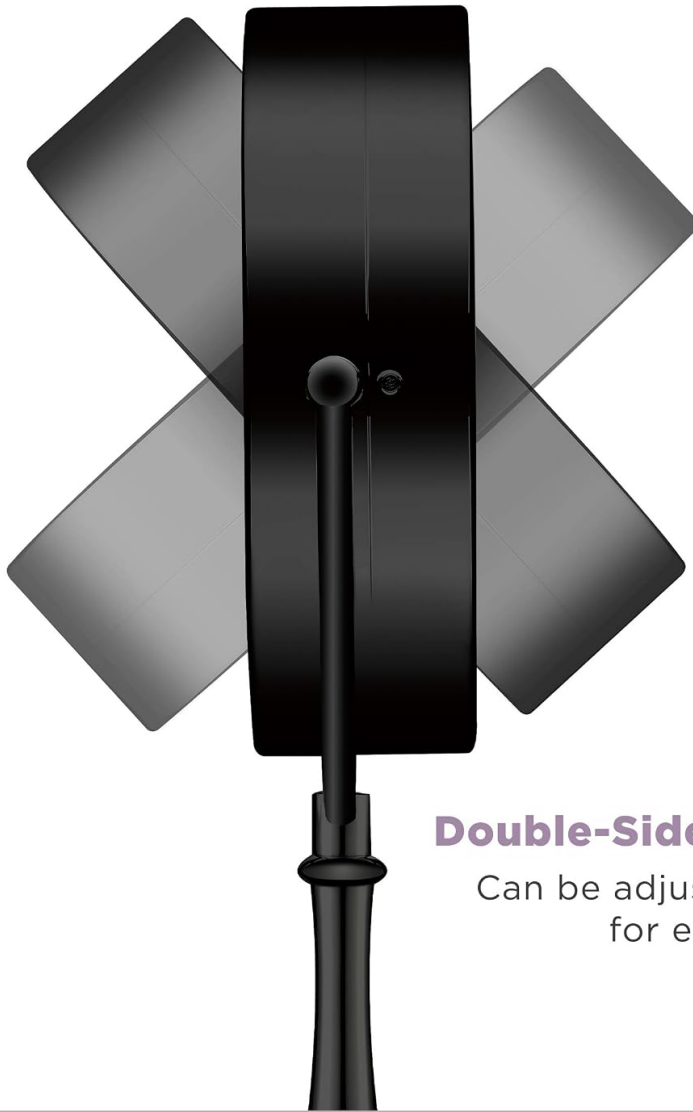

The mirror features a double-sided design with two magnification options:

- **1x Magnification:** Provides a standard, true-to-life reflection.
- **7x Magnification:** Offers a magnified view for detailed tasks such as tweezing or precise makeup application.

To switch between magnifications, grasp the mirror frame and gently rotate the mirror head 360 degrees. The mirror will pivot smoothly to display either the 1x or 7x side.

Image: This illustration compares the 1x and 7x magnification sides of the mirror, demonstrating the clarity and detail provided by the 7x magnification for precise grooming.

### **Double-Sided Lighted Mirror**

Can be adjusted to any angle  
for easy viewing

## **MAINTENANCE**

### **Cleaning the Mirror**

- Always unplug the mirror before cleaning.
- Wipe the mirror surfaces with a soft, damp cloth. A mild glass cleaner can be used if necessary.
- Do not use abrasive cleaners or harsh chemicals, as these may damage the finish or mirror surface.
- Ensure the mirror is completely dry before plugging it back in.

### **Bulb Replacement**

The mirror uses a 30-watt clear incandescent bulb. If the bulb needs replacement:

1. Unplug the mirror from the electrical outlet.
2. Carefully remove the old bulb.
3. Insert a new 30-watt clear incandescent bulb.
4. Plug the mirror back into the outlet.

## TROUBLESHOOTING

Problem	Possible Cause	Solution
Light does not turn on or is dim.	Mirror is not plugged in. Bulb is loose or burned out. Electrical outlet is not functioning.	Ensure the power cord is securely plugged into a working outlet. Check the bulb; tighten if loose or replace if burned out (refer to "Bulb Replacement" in Maintenance section). Test the outlet with another appliance.
Touch control is unresponsive.	Temporary electrical interference. Power interruption.	Unplug the mirror for 30 seconds, then plug it back in to reset the touch sensor. Ensure the base is clean and dry.
Reflection appears distorted.	Too far from the magnified mirror.	Ensure your face is within 6 inches of the magnified mirror for a clear, undistorted image.

## SPECIFICATIONS

Feature	Detail
Model Number	BE87MB
Magnification	1x / 7x
Lighting Type	Incandescent
Light Settings	Low, Medium, High (3-way touch control)
Mirror Diameter	8.5 inches (approx.)
Overall Dimensions (L x W)	17.38"L x 7.5"W
