

Genius SW-G2.1 3000

# Genius GX-Gaming SW-G2.1 3000 Speaker System User Manual

Model: SW-G2.1 3000 | Brand: Genius

## 1. INTRODUCTION

The Genius GX-Gaming SW-G2.1 3000 is a 2.1 channel speaker system designed to enhance audio experiences for gaming, music, and movies. It features a powerful subwoofer for deep bass and two satellite speakers for clear mid and high-range sounds. The system includes a dedicated control box for convenient adjustments and multiple input options for various devices.

## 2. PACKAGE CONTENTS

Please verify that all items listed below are included in your package:

- One (1) Wooden Cabinet Subwoofer
- Two (2) Satellite Speakers
- One (1) Control Box
- One (1) Stereo RCA to 3.5mm Audio Cable
- One (1) 3.5mm Plug Audio Cable
- One (1) Microphone Jack Cable
- One (1) Headphone Jack Cable
- One (1) Multi-language User Manual

## 3. PRODUCT FEATURES

- **Total Output Power:** 70 Watts (RMS)

- **Subwoofer:** Wooden cabinet with a 6.5-inch driver for deep bass
- **Satellite Speakers:** Two curvaceous speakers with 3-inch metal drivers for clear mid and high tones
- **Control Box:** Independent controls for volume and bass adjustment
- **Connectivity:** Two input jacks (3.5mm standard and two RCA) for PC, TV, DVD, and game devices
- **Audio Jacks:** Dedicated microphone jack for online communication and headphone jack for private listening
- **Frequency Response:** 35 Hz ~ 20K Hz
- **Signal-to-Noise Ratio:** 85 dB
- **Power Saving Mode:** Automatically enters sleep mode after 1 minute of inactivity. To resume, ensure audio input device volume is at least 50%.

## 4. SETUP INSTRUCTIONS

---

1. **Positioning Speakers:** Place the subwoofer on a stable surface, preferably on the floor, for optimal bass. Position the satellite speakers on either side of your listening area, facing you.
2. **Connect Satellite Speakers:** Connect the cables from the two satellite speakers to the corresponding output ports on the subwoofer.
3. **Connect Control Box:** Plug the control box cable into the designated port on the subwoofer.
4. **Connect Audio Source:**
  - For PC, MP3/CD players: Use the 3.5mm audio cable to connect your device's audio output to the 3.5mm input on the control box.
  - For Game Consoles, DVD Players, TV: Use the stereo RCA to 3.5mm cable. Connect the RCA ends to your device's audio output and the 3.5mm end to the corresponding input on the control box.
5. **Connect Power:** Plug the subwoofer's power cord into a standard electrical outlet (110V or 220V AC, depending on your region).
6. **Power On:** Turn on the power switch, usually located on the subwoofer. The system is now ready for use.

## 5. OPERATING INSTRUCTIONS

---

- **Volume Control:** Use the large knob on the control box to adjust the overall volume of the speaker system.
- **Bass Control:** Use the dedicated bass knob on the control box to increase or decrease the subwoofer's bass output.
- **Microphone Usage:** Connect a microphone to the MIC jack on the control box for online communication.
- **Headphone Usage:** Plug your headphones into the headphone jack on the control box for private listening. This will mute the speakers.
- **Power Saving Mode:** If the system enters sleep mode due to inactivity, ensure your audio input device's volume is set to 50% or higher, then adjust the system's volume using the control box to resume audio.

## 6. MAINTENANCE

---

- **Cleaning:** Use a soft, dry cloth to clean the surfaces of the speakers and control box. Avoid using liquid cleaners or abrasive materials.
- **Placement:** Keep the speakers away from direct sunlight, heat sources, and excessive moisture. Ensure adequate ventilation around the subwoofer.
- **Cable Management:** Ensure all cables are securely connected and not tangled or pinched to prevent damage.
- **Storage:** If storing the system for an extended period, disconnect it from power and store it in a cool, dry place.

## 7. TROUBLESHOOTING

- **No Sound:**
  - Ensure the power cable is securely plugged in and the power switch is on.
  - Check all audio cables are correctly connected between the source device, control box, and subwoofer.
  - Verify the volume knob on the control box is turned up.
  - Ensure the audio source device (PC, TV, etc.) is playing audio and its volume is not muted or too low.
  - If in Power Saving Mode, increase the audio source device's volume to at least 50%.
- **Distorted Sound:**
  - Reduce the volume on both the speaker system and the audio source device.
  - Adjust the bass level on the control box.
  - Ensure speaker cables are not damaged or loosely connected.
- **One Speaker Not Working:**
  - Check the connection of the non-working satellite speaker to the subwoofer.
  - Test with another audio source or swap the satellite speaker connections (if possible) to isolate the issue.
