

Acctim 14112

Acctim Europa Analogue Alarm Clock 14112 User Manual

Model: 14112

INTRODUCTION

Thank you for purchasing the Acctim Europa Analogue Alarm Clock 14112. This manual provides detailed instructions for setting up, operating, and maintaining your new alarm clock. Please read these instructions carefully before use and retain them for future reference.

PRODUCT FEATURES

- Non-Ticking Sweep Movement for silent operation.
- Energy Efficient Movement.
- Luminous Tipped Hands for visibility in low light.
- Integrated Backlight for temporary illumination.
- Reliable Quartz Movement for accurate timekeeping.
- Alarm with Snooze function.

PACKAGE CONTENTS

- Acctim Europa Analogue Alarm Clock 14112
- User Manual (this document)

Note: 2 x AA batteries are required and are not included in the package.

SETUP

1. Battery Installation

1. Locate the battery compartment cover on the back of the clock.
2. Remove the cover by sliding it down or lifting it off.

3. Insert two (2) AA batteries, ensuring the correct polarity (+ and -) as indicated inside the compartment.
4. Replace the battery compartment cover securely.

2. Setting the Time

1. Locate the time setting knob on the back of the clock. This is typically the larger knob.
2. Rotate the knob in either direction until the hour and minute hands display the correct current time.

Image: Front view of the alarm clock, showing the clock face for time setting.

3. Setting the Alarm

1. Locate the alarm setting knob on the back of the clock. This is usually a smaller knob.
2. Rotate the alarm setting knob until the alarm hand points to your desired alarm time.
3. Ensure the alarm ON/OFF switch (often a small slider on the side or back) is in the 'ON' position to activate the alarm.

OPERATING THE CLOCK

Alarm Function

When the alarm time is reached, the alarm will sound. To stop the alarm, slide the alarm ON/OFF switch to the 'OFF' position.

Snooze and Backlight

Press the large button located on the top of the clock to activate the snooze function. This will temporarily silence the alarm, and it will sound again after a few minutes. Pressing this button also activates the backlight for a few seconds, allowing you to view the time in the dark.

Image: Top view of the alarm clock, indicating the position of the snooze/light button.

Non-Ticking Sweep Movement

The clock features a continuous sweep second hand, ensuring silent operation without the traditional ticking sound, ideal for quiet environments.

MAINTENANCE

Cleaning

To clean the clock, wipe it with a soft, dry cloth. Do not use abrasive cleaners or solvents, as these may damage the finish.

Battery Replacement

When the clock's movement becomes erratic or the backlight dims significantly, it is time to replace the batteries. Follow the battery installation steps outlined in the 'Setup' section.

TROUBLESHOOTING

- **Clock not working:** Ensure batteries are inserted correctly with the right polarity and are not depleted. Replace batteries if necessary.
- **Alarm not sounding:** Check that the alarm ON/OFF switch is in the 'ON' position. Verify that the alarm time is set correctly. Ensure batteries are not low.
- **Backlight not working or dim:** This usually indicates low batteries. Replace the AA batteries.
- **Time inaccuracy:** While the quartz movement is highly accurate, extreme temperatures or very low batteries can affect performance. Ensure the clock is in a stable environment and batteries are fresh.

SPECIFICATIONS

Brand	Acctim
Model Number	14112
Color	White
Display Type	Analog
Movement Type	Quartz
Power Source	Battery Powered (2 x AA batteries, not included)
