1. INTRODUCTION

This manual provides essential information for the Breville BR-1 Mesh Filter Basket, a replacement component designed for specific Breville juicer models. The BR-1 Mesh Filter Basket is crucial for the efficient operation of your juicer, separating pulp from juice to ensure optimal extraction. Proper installation and maintenance are key to extending the life and performance of this part and your juicer.

Image 1.1: The Breville BR-1 Mesh Filter Basket, a replacement part for compatible juicers.

2. COMPATIBILITY

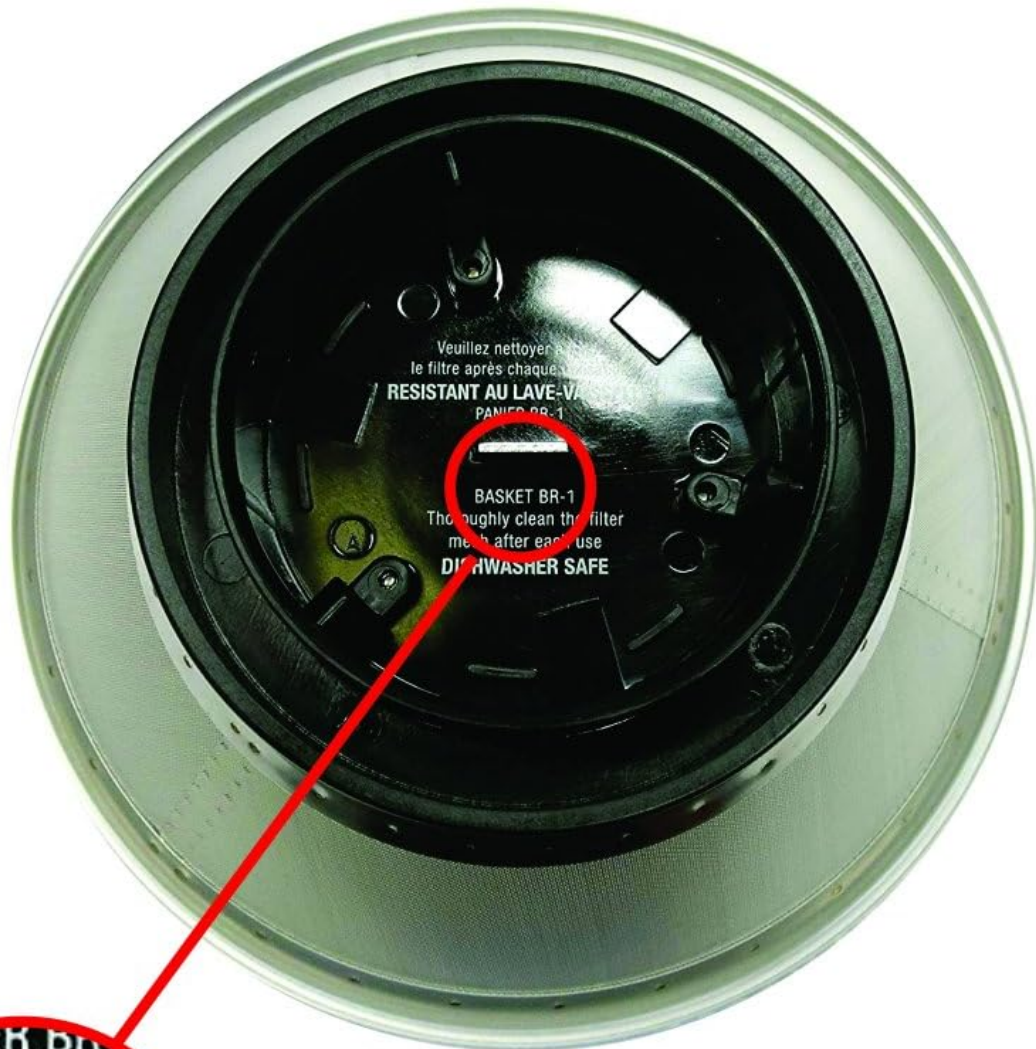

The Breville BR-1 Mesh Filter Basket is specifically designed to fit the following Breville juicer models:

- **Breville JE95XL**
- **Breville JE98XL**
- **Breville BJE200XL**

It is important to verify your juicer model number to ensure proper fit and function. The model number is typically located on the underside of your juicer unit.

3. INSTALLATION

Follow these steps to install the BR-1 Mesh Filter Basket into your compatible Breville juicer:

1. **Ensure Safety:** Before beginning, always unplug your juicer from the power outlet to prevent accidental operation.
2. **Disassemble Juicer:** Carefully remove the juicer cover, pulp container, and any other top components according to your specific juicer model's instructions.
3. **Remove Old Filter Basket:** Gently lift out the old mesh filter basket from the motor base. If it is stuck, twist slightly to dislodge it.
4. **Inspect New Basket:** Examine the new BR-1 Mesh Filter Basket for any damage or debris.
5. **Position New Basket:** Place the new BR-1 Mesh Filter Basket onto the motor base, aligning the grooves or tabs on the bottom of the basket with the corresponding slots on the motor base. Press down firmly until it sits securely.
6. **Reassemble Juicer:** Reattach the juicer cover, pulp container, and other components in reverse order of disassembly. Ensure all parts are correctly seated and locked into place before use.

Refer to your juicer's main instruction manual for detailed assembly diagrams specific to your model.

4. OPERATION

The BR-1 Mesh Filter Basket functions as the primary component for separating juice from pulp during the juicing process. Once installed, it works in conjunction with the juicer's cutting disc to extract liquid from fruits and vegetables. Ensure the basket is clean and properly seated before each use to achieve optimal juicing results.

5. MAINTENANCE AND CLEANING

Regular cleaning of the BR-1 Mesh Filter Basket is essential for maintaining juicer performance and hygiene. A clogged or damaged filter can lead to reduced juice yield and inefficient operation.

Cleaning Instructions:

1. **Immediate Cleaning:** After each use, disassemble the juicer and remove the filter basket. Rinse it under running water immediately to prevent pulp from drying and sticking to the mesh.
2. **Brush Cleaning:** Use a cleaning brush (often supplied with your juicer, or a stiff-bristled brush) to gently scrub the fine mesh screen. Pay close attention to any areas where pulp might accumulate.
3. **Soaking (Optional):** For stubborn residue or discoloration, soak the filter basket in warm, soapy water for 10-15 minutes before scrubbing. A solution of water and white vinegar can also help remove mineral deposits.
4. **Dishwasher Safe:** The BR-1 Mesh Filter Basket is dishwasher safe. Place it on the top rack for cleaning. However, hand washing with a brush is often more effective for thoroughly cleaning the fine mesh.
5. **Drying:** Allow the filter basket to air dry completely before reassembling it into the juicer or storing it.

Tips for Longevity:

- Avoid using abrasive cleaners or scouring pads, as these can damage the mesh.
- Regularly inspect the mesh for any signs of wear, tears, or damage. A damaged mesh can affect juicing efficiency.

6. TROUBLESHOOTING

If you experience issues with your juicer after installing the BR-1 Mesh Filter Basket, consider the following:

- **Reduced Juice Yield or Wet Pulp:**
 - Ensure the filter basket is clean and free of clogs.
 - Check if the basket is properly seated and locked into the motor base.
 - Inspect the mesh for any damage or dullness of the cutting blades. If the blades are dull, the basket may need replacement.
- **Difficulty Installing/Removing Basket:**
 - Ensure the juicer is unplugged.
 - Verify that the basket is aligned correctly with the motor base. Do not force it.
 - If the basket is new, it might have a tighter fit initially. A slight twist may help.
- **Unusual Noise During Operation:**
 - Confirm all juicer components, including the filter basket, are correctly assembled and securely in place.
 - Ensure no foreign objects are lodged in the juicer.

If problems persist, consult your juicer's main instruction manual or contact Breville customer support.

7. SPECIFICATIONS

Product Name	BR-1 Mesh Filter Basket
Brand	Breville
Compatible Models	JE95XL, JE98XL, BJE200XL
Part Number	JE98XL/26, JE900/04, BJE200XL/22, JE95XL/26

Item Weight	6.7 ounces
Package Dimensions	6.22 x 6.1 x 2.8 inches
Manufacturer	Breville

8. WARRANTY AND SUPPORT

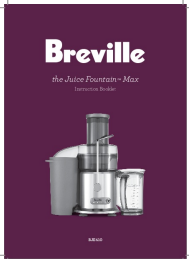

For specific warranty information regarding your Breville BR-1 Mesh Filter Basket or your Breville juicer, please refer to the documentation included with your original juicer purchase or visit the official Breville website. For customer support, technical assistance, or to inquire about other replacement parts, please contact Breville customer service directly.

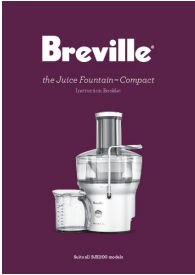

You can typically find contact information on the Breville website or in your juicer's main instruction manual.
