

Transcend 32GB SDHC

Transcend 32GB SDHC Flash Memory Card User Manual

Model: 32GB SDHC

INTRODUCTION

This manual provides essential instructions for the proper use, installation, and maintenance of your Transcend 32GB Secure Digital High Capacity (SDHC) Flash Memory Card. Please read this manual thoroughly to ensure optimal performance and longevity of your memory card.

PRODUCT OVERVIEW

The Transcend 32GB SDHC Flash Memory Card is designed for reliable data storage in compatible devices such as digital cameras, camcorders, and other portable electronics. It offers ample storage capacity for high-resolution photos, full HD videos, and other digital files.

A close-up view of the Transcend 32GB Secure Digital High Capacity (SDHC) flash memory card, featuring its black and orange design, capacity, and SDHC logo.

Highest Quality

Stability

Reliability

Durability

The Transcend 32GB SDHC card displayed with text overlays emphasizing its 'Highest Quality', 'Stability', 'Reliability', and 'Durability', indicating robust performance.

SETUP AND INSTALLATION

Follow these steps to properly install your SDHC memory card into a compatible device.

1. **Identify the SD Card Slot:** Locate the memory card slot on your digital camera, camcorder, or other device. Refer to your device's manual if you are unsure.
2. **Orient the Card:** Hold the Transcend SDHC card with the label facing up (or as indicated by your device's manual) and the metal contacts facing towards the device.
3. **Insert the Card:** Gently slide the card into the slot until it clicks into place. Do not force the card, as this may damage the card or the device.
4. **Initial Formatting (Optional but Recommended):** For first-time use or if experiencing issues, it is recommended to format the card using your device's internal formatting function. This ensures optimal compatibility and performance. **Warning:** Formatting will erase all data on the card. Back up any important files before formatting.

Wide Compatibility

DSLR Cameras
HD Camcorders

A hand holding the compact 32GB SDHC card, with a digital camera visible in the background, accompanied by text stating 'Wide Compatibility' for DSLR cameras and HD camcorders.

OPERATING INSTRUCTIONS

Once installed, your Transcend SDHC card is ready for use.

Saving Data

- **Photography/Videography:** When the card is inserted into a camera or camcorder, it will automatically be used to store photos and videos captured by the device.
- **File Storage:** For other devices, files can be saved directly to the card as per the device's operating instructions.

Transferring Data to a Computer

1. **Using a Card Reader:** Insert the SDHC card into a compatible card reader connected to your computer. The card will appear as a removable drive.
2. **Direct Device Connection:** Connect your camera or device directly to your computer using a USB cable. The

device may offer options to access the memory card's contents.

3. **Copy Files:** Drag and drop or copy/paste files from the memory card to your computer's hard drive.

High Speed
Data Transfer

Speed up to 100 MB/s

A hand inserting a 32GB SD card into a laptop's card reader slot, with graphics indicating high-speed data transfer up to 100 MB/s, highlighting efficient file management.

Write-Protect Switch

The small switch on the side of the SDHC card is a write-protect lock. Sliding the switch down (towards the 'LOCK' position) prevents new data from being written to the card and existing data from being deleted or modified. Slide the switch up to unlock the card and enable writing.

MAINTENANCE AND CARE

Proper care extends the life of your memory card and protects your data.

- **Handle with Care:** Avoid bending, dropping, or applying excessive force to the card.
- **Protect Contacts:** Do not touch the metal contacts on the back of the card. Keep them clean and free from

dust or moisture.

- **Storage:** Store the card in a protective case when not in use to prevent physical damage and exposure to static electricity.
- **Temperature and Humidity:** Avoid exposing the card to extreme temperatures, direct sunlight, or high humidity.
- **Data Backup:** Regularly back up important data from your memory card to a computer or other storage device to prevent data loss.
- **Safe Removal:** Always safely eject the memory card from your computer or device before physically removing it to prevent data corruption.

TROUBLESHOOTING

If you encounter issues with your Transcend SDHC card, consider the following common solutions:

- **Card Not Recognized:**
 - Ensure the card is fully inserted into the slot.
 - Check the write-protect switch; if it's in the 'LOCK' position, the device may not recognize it for writing.
 - Try the card in another compatible device or card reader to rule out a device issue.
 - Clean the metal contacts gently with a soft, dry cloth.
- **Slow Performance:**
 - Ensure your device supports the speed class of the card.
 - The card may be nearly full; transfer some data to free up space.
 - Reformat the card (after backing up data) to optimize its file system.
- **Data Corruption/Error Messages:**
 - Avoid removing the card during data transfer or when the device is actively accessing it.
 - If possible, try to recover data using data recovery software before attempting to format.
 - If the card consistently shows errors, it may be damaged and require replacement.

SPECIFICATIONS

Feature	Detail
Brand	Transcend
Flash Memory Type	SDHC (Secure Digital High Capacity)
Memory Storage Capacity	32 GB
Hardware Interface	SDHC, Secure Digital Card
Compatible Devices	Camera (e.g., Fujifilm FinePix HS25EXR), DSLR Cameras, HD Camcorders
Item Weight	0.01 Ounces
Special Feature	Lightweight
UPC	744596972227
Item Model Number	FinePix HS25EXR-SD32GB

SUPPORT AND WARRANTY INFORMATION

For technical support, product registration, or warranty claims, please visit the official Transcend website or contact their customer service. Keep your purchase receipt as proof of purchase.

Transcend may offer data recovery plans. For details on available protection plans, please refer to the product's purchase page or Transcend's official resources.

TS4GSDHC80I

Industrial High Capacity Secure Digital Card

Rev1.1

Description

Secure Digital Card is a compact, slim and high capacity storage media with copyright protection. Designed in advanced SD specification Ver.3.0, Transcend SDHC80I card now reaches a new performance milestone. Based on 0.16um process controller and high quality SLC (Single-Level-Cell) NAND Flash chip, Transcend SDHC80I card can provide high performance, low power consumption yet excellent reliability. Performance up to speed class 10. Manufactured with industrial SLC NAND Flash chip. Operating Temperature -40 ~ 85°C

Features

- RHEL compliant product
- Card ID marked PC / AHS
- Operating Voltage 2.7 ~ 3.6V
- Operating Temperature -40 ~ 85°C
- Standby 10,000 hours/extended cycles
- Compatible with SD Specification Ver. 3.0
- Mechanical Write Protection Switch
- Performance up to speed class 10
- Supports Copy Protection for Protected Media (CPM) for SD Audio
- Embedded data error correction
- Form Factor: 24mm x 32mm x 2.1mm

Transcend

Perform the incredible

Perfect for 4K, 3D and Full HD recordings

Memory Cards I SD 500S / SD 300S

Transcend's SDXC/SDHC 500S and 300S memory cards provide the performance and capacity necessary to harness the full power of your UHS-I compliant devices, such as digital cameras, DSLR cameras, and camcorders. In addition to the incredible transfer speeds, featuring the UHS Video Speed Class 30 (V30) standard allows for a smooth and uninterrupted 4K video capturing.

Compatible with multiple devices

UHS-I Video Speed Class 30 (V30) and the UHS Video Speed Class 30 (V30) standards

Up to 40MB/s transfer speeds (SDXC/SDHC)

Protection against extreme conditions

Exceptional reliability and long life data retention
