Quechua B0085USGSK

Quechua Portable-Shower User Manual

Model: B0085USGSK

Brand: Quechua

1. INTRODUCTION

This manual provides comprehensive instructions for the safe and effective use of your Quechua Portable-Shower. Designed for outdoor enthusiasts, this portable shower offers convenience and comfort during camping, hiking, and other outdoor activities. Key features include its compact design, 8-liter volume capacity, and UV protection, making it a reliable companion for your adventures.

2. SAFETY INFORMATION

Please read all safety warnings and instructions before using the product to prevent injury or damage.

- Do not fill the shower with boiling water. Use water at a comfortable temperature (maximum 50°C / 122°F) to avoid burns.
- Ensure the shower is securely hung or placed on a stable, flat surface before use to prevent tipping.
- Keep out of reach of children when not in use. Adult supervision is recommended during use by children.
- Inspect the shower unit, hose, and connections for any signs of damage before each use. Do not use if damaged.
- Avoid exposing the unit to sharp objects that could puncture the material.

3. PACKAGE CONTENTS

Verify that all components are present in your package:

- Quechua Portable-Shower Unit (main reservoir)
- Shower Hose with Shower Head
- Carry Strap (integrated or separate)
- Skirt (protective base/cover)

4. SETUP GUIDE

Follow these steps to prepare your Quechua Portable-Shower for use:

1. **Unpack:** Carefully remove all components from the packaging.

2. **Fill Reservoir:** Open the cap at the top of the shower unit. Fill the reservoir with up to 8 liters of water. Ensure the water temperature is safe for showering. Close the cap securely.
3. **Attach Hose:** Connect the shower hose to the outlet port at the bottom of the reservoir. Ensure a tight and secure connection to prevent leaks.
4. **Position:** Hang the portable shower using its integrated handle or strap from a sturdy support, or place it on a flat, stable surface. Ensure the shower head can reach the desired area.

This image shows the complete Quechua Portable-Shower unit, including the main black cylindrical reservoir with green accents, the clear hose, and the white shower head. The Quechua logo is visible on the side of the reservoir.

5. OPERATING INSTRUCTIONS

Once set up, operating your portable shower is straightforward:

1. **Open Valve:** Locate the flow control valve on the shower head or hose. Turn the valve to the 'ON' position to start the water flow.
2. **Adjust Flow:** The flow rate can be adjusted by partially opening or closing the valve.
3. **Shower:** Use the shower head as you would a standard shower.
4. **Close Valve:** After use, turn the flow control valve to the 'OFF' position to stop the water flow and conserve water.

6. MAINTENANCE AND CARE

Proper maintenance will extend the life of your Quechua Portable-Shower:

- **Cleaning:** The product care instructions specify 'Hand Wash'. After each use, drain any remaining water completely. Rinse the inside of the reservoir and the hose with clean water.
- **Drying:** Allow all components to air dry thoroughly before storage to prevent mold and mildew.
- **Storage:** Store the portable shower in a cool, dry place, away from direct sunlight and extreme temperatures. Ensure it is completely dry and free of moisture before packing away.
- **Inspection:** Periodically check the hose, connections, and reservoir for any signs of wear, cracks, or leaks.

7. TROUBLESHOOTING

Refer to this section for common issues and their solutions:

Problem	Possible Cause	Solution
No water flow or very low pressure.	Reservoir is empty or nearly empty; hose is kinked; valve is closed.	Refill the reservoir; straighten the hose; ensure the flow valve is fully open.
Water leaking from connections.	Hose not securely attached; O-ring missing or damaged.	Ensure all connections are tightened properly; check for and replace any damaged O-rings.
Water not heating up (if applicable).	Insufficient sun exposure (for solar models); water too cold initially.	Ensure the black side of the reservoir is exposed to direct sunlight for several hours; use pre-warmed water if solar heating is not sufficient.

8. SPECIFICATIONS

Feature	Detail
Brand	Quechua
Model Number	B0085USGSK
Item Weight	450 g (0.99 Pounds)
Material	Polyester
Volume Capacity	8 Litres
Dimensions (approx.)	Diameter 21 cm
Special Feature	Portable
Installation Type	Free Standing
Product Care Instructions	Hand Wash

9. WARRANTY AND SUPPORT

For warranty information, product support, or to inquire about replacement parts, please contact Quechua customer service through their official website or the retailer where the product was purchased.

Please have your product model number (B0085USGSK) and purchase date ready when contacting support.
