   - Verify that your Wi-Fi router is powered on and functioning correctly.
   - Restart your Panasonic device and your Wi-Fi router.
   - Re-enter your Wi-Fi network password through your device's network settings to ensure it is correct.
2. **Slow or Intermittent Connection:**
   - Check the distance between your Panasonic device and your Wi-Fi router. Excessive distance or physical obstructions (walls, furniture) can degrade signal quality.
   - Try repositioning the DY-WL5 adapter using its 1-meter cable to achieve better signal reception.
   - Minimize interference from other electronic devices (e.g., cordless phones, microwaves) operating on similar frequencies.
   - Ensure your router's firmware is up to date.
3. **Specific App Not Working (e.g., YouTube):**
   - Verify that other internet services are working on your Panasonic device. If only one app is affected, the issue may be with the app itself or the service provider.
