### SmartSign K-7197-HI-24x24

## SmartSign "P Symbol" Parking Sign Instruction Manual

Model: K-7197-HI-24x24

### PRODUCT OVERVIEW

The SmartSign "P Symbol" Parking Sign is a durable and highly visible sign designed for identifying parking zones. Constructed from 3M High Intensity Grade Reflective Aluminum, it ensures clear visibility in various lighting conditions, including low light and darkness. This manual provides essential information regarding its features, installation, and care.

### KEY FEATURES

- **3M Authorized Materials:** Utilizes official 3M reflective films and inks, meeting DOT requirements for outdoor parking and traffic signs.
- **High Intensity Reflectivity:** Features 3M High Intensity reflective aluminum, which is three times more reflective than Engineer Grade, ensuring excellent visibility, especially from an angle.
- **Durable Aluminum Construction:** Made from heavy-duty, rustproof 80 mil thick aluminum, providing a 10+ year outdoor durability rating backed by a 3M warranty.
- **Laminated Graphics:** Graphics are protected from weather and abuse, allowing for easy cleaning of graffiti and

extending the sign's lifespan compared to unlaminated signs.

- **Easy Installation:** Comes with pre-punched and pre-cleared mounting holes for straightforward attachment to U-channel posts, square or round galvanized posts, wooden posts, and chain link fences.
- **Safe Design:** Features rounded, burr-free corners for safe handling during installation and use.

## MATERIAL AND REFLECTIVITY DETAILS

The "P Symbol" Parking Sign is manufactured using 80 mil thick aluminum, which is approximately 2 millimeters thick, comparable to the thickness of a US nickel. This robust material ensures the sign's integrity and resistance to bending, unlike thinner, flimsier alternatives.

Reflectivity is crucial for sign visibility, especially at night. This sign utilizes High Intensity Grade reflective material, which provides superior reflectivity compared to standard Engineer Grade. For areas with high visual distractions, Diamond Grade aluminum offers the highest level of reflectivity.

## Manufacturing Process Overview

SmartSign employs a screen printing process to ensure a thick application of fade-resistant inks, resulting in crisp borders and vibrant designs. All inks and reflective films are supplied by 3M, a leader in the industry. After printing, signs are dried at 200 degrees Fahrenheit for approximately five minutes to set the ink, ensuring long-lasting quality.

## INSTALLATION GUIDELINES

The "P Symbol" Parking Sign is designed for straightforward installation. Each sign features pre-drilled holes that are cleared, allowing for easy attachment. The rounded corners enhance safety during handling and mounting.

### Mounting Options:

- U-channel posts
- Square or round galvanized posts
- Wooden posts
- Chain link fences
- Walls or doors

Ensure the mounting surface is stable and capable of supporting the sign's weight. Use appropriate hardware (not included) for secure attachment to prevent dislodgement due to wind or other environmental factors.

## CARE AND MAINTENANCE

The SmartSign "P Symbol" Parking Sign is designed for minimal maintenance due to its durable materials and laminated finish. To maintain its appearance and reflectivity:

- Periodically clean the sign surface with a soft cloth and mild soap and water to remove dirt, dust, or environmental buildup.
- The laminated surface allows for easy removal of graffiti using appropriate cleaning agents without damaging the sign's graphics.
- Avoid using abrasive cleaners or harsh chemicals that could scratch the reflective surface or degrade the lamination.
- Regularly inspect mounting hardware to ensure the sign remains securely fastened.

## SPECIFICATIONS

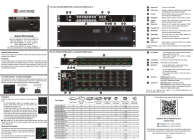

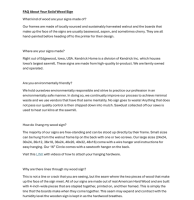

Attribute	Detail
Brand	SmartSign
Model Number	K-7197-HI-24x24
Product Dimensions	24 x 24 x 0.39 inches
Material Type	High Intensity Grade Reflective Sign, 80 mil Aluminum
Size	24" x 24"
Manufacturer	MyParkingSign
