JERDON JGL10W

JERDON Modern Tri-Fold Makeup Mirror with Lights

Model: JGL10W

Brand: JERDON

INTRODUCTION

Thank you for choosing the JERDON Modern Tri-Fold Makeup Mirror with Lights. This vanity mirror is designed to provide optimal lighting and magnification for your beauty routine. It features multiple light settings to simulate various environments and a convenient built-in electrical outlet. Please read this manual thoroughly before use to ensure safe and proper operation.

SAFETY INFORMATION

This mirror should be handled with care to avoid breakage. Broken glass may cause injury. Keep out of reach of children.

SETUP

1. **Unpacking:** Carefully remove the mirror from its packaging. Inspect for any damage.
2. **Placement:** Place the mirror on a stable, flat surface such as a desk, vanity, or countertop. Ensure there is sufficient space for the side panels to open fully.
3. **Power Connection:** Plug the mirror's power cord into a standard 120V AC electrical outlet.
4. **Adjusting the Stand:** The mirror features an adjustable stand at the back. Gently pull out the stand and position it to achieve your desired viewing angle. Ensure the stand is securely locked in place before use.

5. **Opening Side Panels:** Gently open the two side mirror panels outwards. These panels provide additional viewing angles.

OPERATING INSTRUCTIONS

Powering On/Off

- Locate the power switch on the front base of the mirror, typically on the right side.
- Flip the switch to the "ON" position to illuminate the lights. Flip it to "OFF" to turn them off.

Adjusting Light Settings

The mirror offers four distinct light settings to simulate different environments:

- **Day:** Simulates natural daylight, ideal for everyday makeup application.
- **Office:** Provides a bright, cool light similar to typical office lighting.
- **Evening:** Offers a softer, warmer light suitable for evening events or dimly lit settings.
- **Home:** A balanced light setting for general home use.

To change the light setting, slide the selector switch located on the front base of the mirror to the desired setting (Day, Office, Evening, Home).

Image: Two images side-by-side. The left image shows the mirror with a cooler, brighter light (Office setting), while the right image shows the mirror with a warmer, softer light (Home setting), demonstrating the different illumination options.

Using the Magnification Mirror

- The central mirror panel is double-sided. One side provides 1X magnification for general viewing.
- To access the 5X magnification, gently rotate the central mirror panel 180 degrees horizontally. This side is ideal for detailed tasks such as tweezing or precise makeup application.

Image: A graphic illustrating the 1X and 5X magnification capabilities of the central mirror, with an inset magnifying glass icon highlighting the 5X detail.

Using the Built-in Electrical Outlet

- A convenient electrical outlet is integrated into the front base of the mirror, typically on the left side.
- This outlet can be used to power small appliances such as hair dryers, curling irons, or phone chargers.
- **Note:** Do not exceed the maximum wattage indicated near the outlet (120V 60Hz 1000W MAX).

MAINTENANCE

- **Cleaning the Mirror Surfaces:** Use a soft, lint-free cloth and a non-abrasive glass cleaner to wipe the mirror surfaces. Avoid spraying cleaner directly onto the mirror; instead, apply it to the cloth first.
- **Cleaning the Exterior:** Wipe the exterior of the mirror with a soft, damp cloth. Do not use harsh chemicals or abrasive cleaners, as they may damage the finish.
- **Storage:** When not in use, the side panels can be folded inwards to protect the mirror surfaces and save space. Ensure the mirror is turned off before folding for storage.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Lights do not turn on.	Mirror is not plugged in or power switch is off.	Ensure the power cord is securely plugged into a working electrical outlet and the power switch is in the "ON" position.
Lights are dim or flickering.	Bulbs may be nearing end of life or loose connection.	Check if the light bulbs are securely seated. If issues persist, contact customer support for bulb replacement information.
Electrical outlet is not working.	Overload or internal issue.	Ensure the connected appliance does not exceed the maximum wattage (1000W). Try a different appliance. If the issue continues, discontinue use and contact customer support.

Problem	Possible Cause	Solution
Mirror feels unstable.	Adjustable stand not fully extended or locked.	Ensure the adjustable stand at the back is fully extended and securely locked into one of the notches. Place on a flat, stable surface.

SPECIFICATIONS
