Generic Vacuum Cleaner Hose Handle Suction Control Bleeder Valve Regulator

Model: FA-45111

INTRODUCTION

This manual provides essential information for the proper setup, operation, and maintenance of your Generic Vacuum Cleaner Hose Handle Suction Control Bleeder Valve Regulator. Please read this manual thoroughly before use to ensure optimal performance and longevity of the product.

Figure 1: Generic Vacuum Cleaner Hose Handle Suction Control Bleeder Valve Regulator. This image displays the black, C-shaped component with a ribbed exterior, designed to fit onto a vacuum cleaner hose for suction control.

PRODUCT OVERVIEW

The Generic Vacuum Cleaner Hose Handle Suction Control Bleeder Valve Regulator is designed to provide adjustable suction control for vacuum cleaner hoses. It is compatible with standard 1 1/4" hoses, allowing users to easily regulate airflow and suction power directly at the hose handle. This can be particularly useful for delicate surfaces or when less suction is desired.

SETUP

1. **Identify Hose:** Ensure your vacuum cleaner hose has a standard 1 1/4" diameter handle or connection point where the regulator is to be installed.
2. **Position Regulator:** Slide the bleeder valve regulator onto the vacuum hose handle. The C-shaped opening of the regulator should align with the hose.
3. **Secure Fit:** Gently push the regulator until it sits snugly on the hose. The ribbed exterior provides grip for

adjustment. Ensure it is firmly attached to prevent air leaks during operation.

OPERATING INSTRUCTIONS

Once the regulator is installed, you can adjust the suction level of your vacuum cleaner:

- **To Reduce Suction:** Rotate the regulator to open the bleeder valve. This allows ambient air to enter the hose, reducing the vacuum's suction power at the nozzle.
- **To Increase Suction:** Rotate the regulator to close the bleeder valve. This seals the opening, maximizing the vacuum's suction power.

Adjust the valve as needed for different cleaning tasks and surfaces.

MAINTENANCE

The Generic Vacuum Cleaner Hose Handle Suction Control Bleeder Valve Regulator requires minimal maintenance:

- **Cleaning:** Periodically wipe the regulator with a damp cloth to remove dust and debris. Do not use harsh chemicals or abrasive cleaners.
- **Inspection:** Regularly inspect the regulator for any signs of damage or cracks that could affect its function or cause air leaks.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Suction not adjusting properly	Regulator not fully open/closed; improper fit on hose; internal obstruction.	Ensure the regulator is rotated to its full open or closed position. Check that the regulator is securely fitted to the hose without gaps. Inspect for any debris inside the regulator or hose that might be blocking airflow.
Regulator feels loose on hose	Incorrect hose size; wear and tear.	Verify that your hose is a standard 1 1/4" diameter. If the regulator is worn, replacement may be necessary.

SPECIFICATIONS

Attribute	Detail
Brand	Generic
Model Number	FA-45111
Color	Black
Item Weight	1 Pound (approx.)
Nominal Wall Thickness	1.25 inches
Outside Diameter	1.25 Inches

Attribute	Detail
UPC	616469466570
Compatibility	Standard 1 1/4" Hoses
Date First Available	August 27, 2013

WARRANTY INFORMATION

Specific warranty details for this Generic product are typically provided by the retailer or manufacturer at the time of purchase. Please refer to your purchase documentation, receipt, or the product packaging for information regarding warranty coverage, terms, and conditions. For any warranty claims, retain your proof of purchase.

CUSTOMER SUPPORT

For technical assistance, product inquiries, or support regarding your Generic Vacuum Cleaner Hose Handle Suction Control Bleeder Valve Regulator, please contact the seller or the manufacturer directly. Contact information can usually be found on the product packaging or the retailer's website where the product was purchased.
