---

### Chair is difficult to fold/unfold:

- Check for any obstructions in the folding mechanism.

- If the mechanism feels stiff, a small amount of silicone-based lubricant can be applied to the pivot points (avoiding wood surfaces) to improve movement.

### Chair feels unstable:

- Verify that the chair is fully unfolded and all locking mechanisms (if any are present in the design) are engaged.
- Ensure the chair is placed on a flat, even surface.
