

Ricar RAH-6

Ricar Type A Vibrance R-Series & 2000 Series Vacuum Bags Instruction Manual

MODEL: RAH-6

1. Introduction and Overview

This manual provides essential information for the proper use and maintenance of your Riccar Type A RAH-6 vacuum bags. These high-quality bags are designed to effectively capture dust and debris, ensuring optimal performance of your compatible Riccar upright vacuum cleaner. Regular replacement of vacuum bags is crucial for maintaining suction power and air filtration efficiency.

2. Compatibility

The Riccar Type A RAH-6 vacuum bags are specifically designed for use with the following Riccar upright vacuum cleaner models:

- Riccar Vibrance Series
- Riccar R Series
- Riccar 2000 Series

Please verify your vacuum cleaner's model number to ensure proper fit and function.

3. Setup and Installation

Follow these steps to correctly install or replace a vacuum bag in your compatible Riccar upright vacuum cleaner:

1. **Power Off:** Ensure your vacuum cleaner is unplugged from the power outlet before beginning any maintenance.
2. **Access Bag Compartment:** Locate and open the vacuum bag compartment. This is typically found on the front or side of the vacuum's main body.
3. **Remove Old Bag:** Carefully remove the full or old vacuum bag. Most bags feature a self-sealing collar to prevent dust from escaping during removal.
4. **Prepare New Bag:** Take a new Riccar Type A RAH-6 bag from its packaging. Ensure the bag is fully unfolded and the cardboard collar is ready for insertion.
5. **Insert New Bag:** Align the cardboard collar of the new bag with the bag holder inside the compartment. Push firmly until the bag is securely seated. Ensure the bag is not twisted or obstructing the compartment closure.
6. **Close Compartment:** Close the vacuum bag compartment securely.
7. **Power On:** Plug the vacuum cleaner back into the power outlet.

Video 4: Detailed look at RAH Vacuum Bags Type A, demonstrating their construction and how to prepare them for use.

4. Maintenance

To ensure optimal performance and longevity of your vacuum cleaner, adhere to the following maintenance guidelines for your Riccar Type A vacuum bags:

- **Regular Replacement:** Change the vacuum bag when it is approximately two-thirds full, or when you notice a decrease in suction power. Overfilling the bag can reduce cleaning efficiency and strain the vacuum motor.
- **Check for Obstructions:** Periodically check the vacuum's hose and brush roll for any clogs or obstructions that might affect airflow and bag performance.
- **Filter Inspection:** While replacing the bag, take a moment to inspect any other filters in your vacuum (e.g., pre-motor, post-motor filters) and clean or replace them as recommended by your vacuum cleaner's manual.

5. Troubleshooting

If you experience issues with your vacuum cleaner's performance, consider these common troubleshooting steps related to the vacuum bag:

- **Reduced Suction:** If suction power decreases, the bag may be full or an obstruction might be present in the hose or brush roll. Replace the bag or clear any blockages.
- **Dust Leakage:** Ensure the vacuum bag is correctly seated in the bag holder and the compartment door is fully closed. A torn or improperly installed bag can lead to dust escaping.
- **Unusual Odors:** A full bag, especially one containing pet dander or food particles, can cause odors. Replace the bag promptly.

6. Specifications

Feature	Detail
Brand	Riccar
Model Number (Bags)	RAH-6 (Type A)
Compatible Devices	Riccar Vibrance, R Series, 2000 Series Upright Vacuum Cleaners
Material	Paper
Color	White
Item Weight	7.8 ounces
Package Dimensions	16.42 x 6.93 x 1.97 inches

7. Warranty and Support
