

TRENDnet TPE-TG80G

TRENDnet TPE-TG80G 8-Port Gigabit PoE+ Switch User Manual

1. INTRODUCTION

This manual provides comprehensive instructions for the TRENDnet TPE-TG80G 8-Port Gigabit PoE+ Switch. This device is designed to provide reliable, high-speed network connectivity with Power over Ethernet capabilities. It features a compact, fanless design suitable for various installation environments.

Figure 1: TRENDnet TPE-TG80G 8-Port Gigabit PoE+ Switch

2. PACKAGE CONTENTS

Verify that all items are present and in good condition. If any items are missing or damaged, please contact your retailer for assistance.

- TRENDnet TPE-TG80G 8-Port Gigabit PoE+ Switch
- Quick Installation Guide

- Power adapter (54 V DC, 2.77 A)

3. PRODUCT OVERVIEW

3.1 Front and Back Panels

The TRENDnet TPE-TG80G switch features 8 Gigabit PoE+ ports and LED indicators for monitoring network activity and power status.

Front and Back

Figure 2: Front and Back Panels with LED Indicators and Ports

3.2 LED Indicators

The front panel includes LED indicators to provide visual status of the switch and its ports:

- **POWER LED:** Indicates the power status of the switch.
- **PoE MAX LED:** Illuminates when the total PoE power budget is nearing its maximum capacity.
- **LINK/ACT LEDs (per port):** Indicates a network link and data activity for each port.
- **PoE STATUS LEDs (per port):** Indicates Power over Ethernet status for each port (e.g., PoE enabled, PoE error).

3.3 Dimensions

The compact design of the TPE-TG80G allows for flexible placement in various environments.

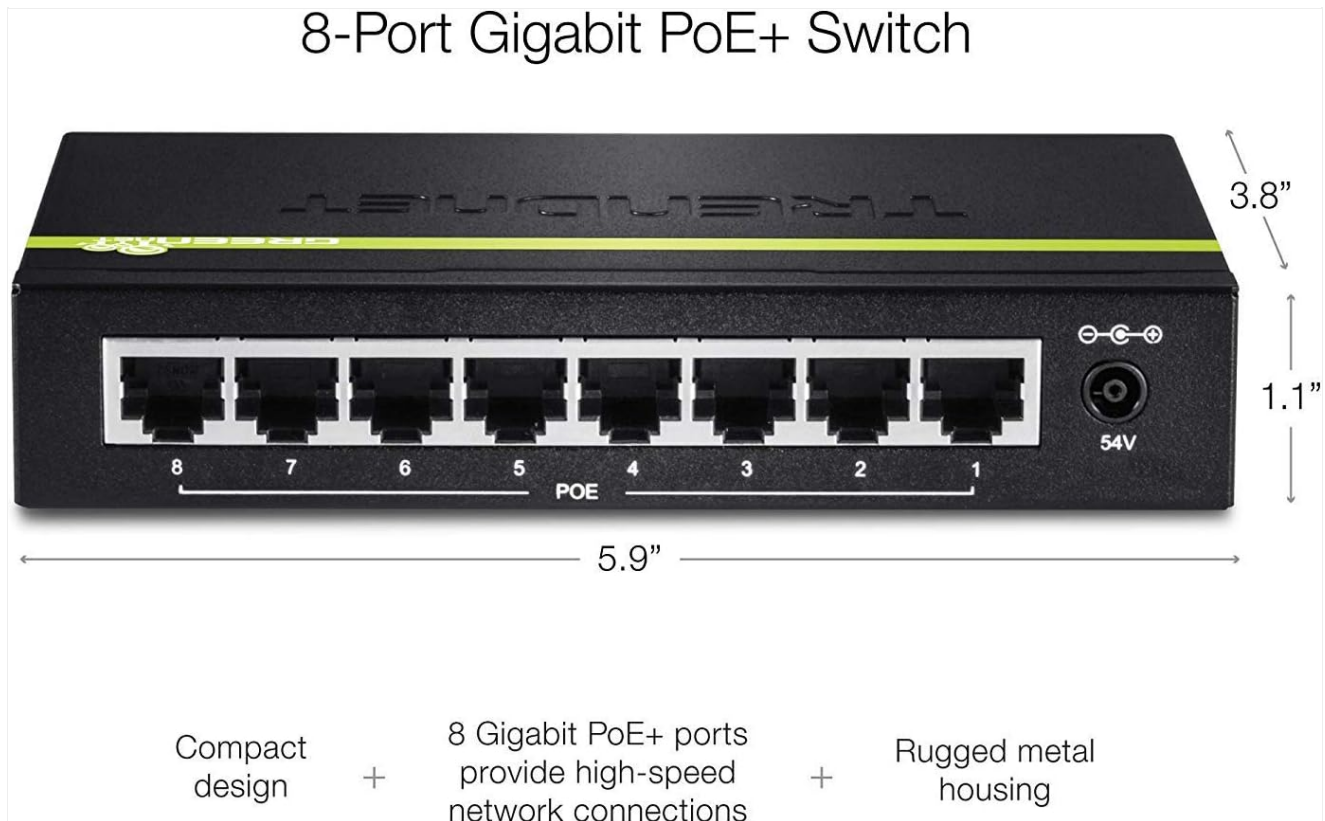

Figure 3: Product Dimensions (5.9"L x 3.8"W x 1.1"H)

4. SETUP

Follow these steps to set up your TRENDnet TPE-TG80G 8-Port Gigabit PoE+ Switch:

1. **Placement:** Position the switch on a flat, stable surface or mount it in a suitable location. Ensure adequate ventilation around the device.
2. **Connect Power:** Connect the included power adapter to the switch's power input port and then plug the adapter into a standard electrical outlet. The POWER LED on the front panel should illuminate.
3. **Connect Network Devices:** Connect your network devices (e.g., computers, network-attached storage, non-PoE devices) to any of the 8 Gigabit ports using standard Ethernet cables.
4. **Connect PoE Devices:** For Power over Ethernet (PoE) compatible devices (e.g., IP cameras, wireless access points), connect them to any of the 8 Gigabit PoE+ ports using Ethernet cables. The switch will automatically detect and provide power to these devices. Each port can supply up to 30W of PoE power, with a total budget of 123W for the switch.

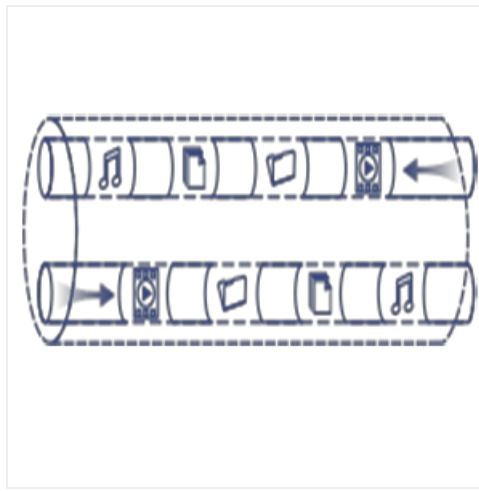

Figure 4: Connecting devices to the Gigabit PoE+ ports and power input

5. OPERATING INSTRUCTIONS

The TRENDnet TPE-TG80G is an unmanaged switch, meaning it operates automatically without requiring configuration. Once powered on and devices are connected, it will facilitate network communication.

5.1 Monitoring with LED Indicators

Observe the LED indicators on the front panel to confirm proper operation:

- A solid **POWER LED** indicates the switch is receiving power.
- A solid **LINK/ACT LED** for a port indicates a successful network connection. A blinking LED indicates data activity.
- A solid **PoE STATUS LED** for a port indicates that a PoE device is connected and receiving power. A blinking LED may indicate a PoE error or power negotiation issue.
- The **PoE MAX LED** will illuminate if the total power draw from connected PoE devices approaches the 123W budget. If this LED is on, consider the total power requirements of your devices to avoid overloading.

5.2 Power over Ethernet (PoE+) Functionality

The switch automatically detects whether a connected device is PoE compatible and supplies the necessary power (up to 30W per port). It supports both PoE (802.3af) and PoE+ (802.3at) standards. Non-PoE devices can also be connected to any port without issue.

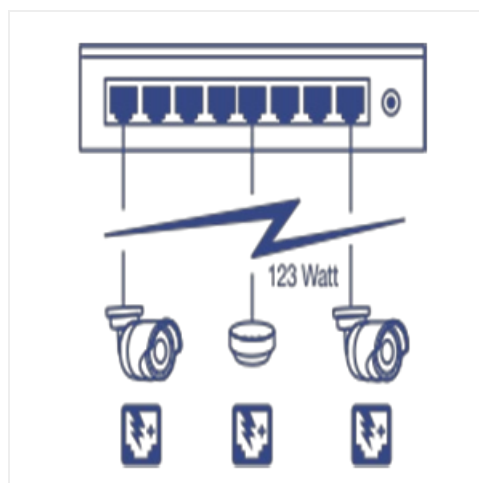

Figure 5: Front panel LED indicators

6. MAINTENANCE

Proper maintenance ensures the longevity and optimal performance of your switch.

- **Cleaning:** Use a soft, dry cloth to clean the exterior of the switch. Do not use liquid or aerosol cleaners.
- **Ventilation:** Ensure that the ventilation openings are not blocked. The fanless design relies on natural airflow for cooling.
- **Environment:** Operate the switch within the specified temperature and humidity ranges to prevent damage.
- **Cable Management:** Keep network cables organized to prevent strain on ports and improve airflow.

7. TROUBLESHOOTING

If you encounter issues with your TRENDnet TPE-TG80G switch, refer to the following troubleshooting steps:

- **No Power:**
 - Ensure the power adapter is securely connected to the switch and a working electrical outlet.
 - Verify the power outlet is functional by plugging in another device.
- **No Link/Activity on a Port:**
 - Check the Ethernet cable connection between the switch and the device. Try a different cable.
 - Ensure the connected device is powered on and functioning correctly.
 - Try connecting the device to a different port on the switch.
- **PoE Device Not Receiving Power:**
 - Verify the device is PoE compatible (IEEE 802.3af/at).
 - Check the PoE STATUS LED for the port. If it's off or blinking, there might be a power issue.
 - Ensure the total PoE power budget (123W) is not exceeded. If the PoE MAX LED is on, some devices may not receive power. Disconnect non-essential PoE devices to test.
 - Try a different Ethernet cable, as some cables may not be suitable for PoE.
- **Slow Network Speed:**
 - Ensure all connected devices and cables support Gigabit Ethernet for optimal performance.
 - Check for excessive network traffic or bottlenecks elsewhere in your network.

8. SPECIFICATIONS

Detailed technical specifications for the TRENDnet TPE-TG80G 8-Port Gigabit PoE+ Switch:

Product Dimensions	5.9"L x 3.8"W x 1.1"H
Item Weight	14.1 ounces (400 grams)
Voltage	52 Volts (Input to switch from adapter)
Case Material	Metal
Operating Temperature	0 – 45 °C (32 - 113 °F)
Maximum Power Consumption	123 Watts (PoE Power Budget)

Interface Type	PoE+ (IEEE 802.3at/af)
Data Transfer Rate	2000 Megabits Per Second (Gigabit Full Duplex)
Number of Ports	8 x Gigabit PoE+ ports
Switching Capacity	16 Gbps
Fanless Design	Yes

9. WARRANTY AND SUPPORT

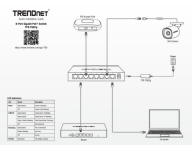

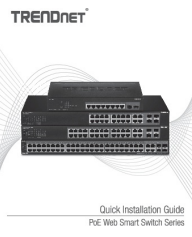

9.1 Lifetime Protection

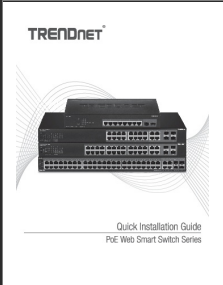

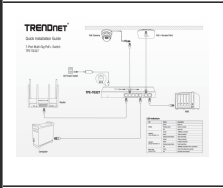

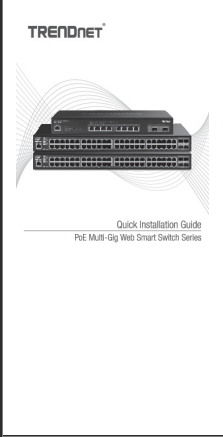

The TRENDnet TPE-TG80G 8-Port Gigabit PoE+ Switch is backed by Lifetime Manufacturer Protection (U.S. and Canada Only). Please refer to the official TRENDnet website for full warranty terms and conditions.

9.2 Technical Support

TRENDnet provides reliable technical support. Our team of advisors and experts are available during normal business hours to assist with any product-related inquiries. Contact information can be found on the official TRENDnet website.

TPE-TG80g

Switch PoE+ 8 porte gigabit
TPE-TG80g (v3.2R)

- 8 porte gigabit PoE+
- Budget di potenza PoE di 120 W
- Capacità di commutazione di 16 Gbps
- Robusto metallo in acciaio
- Installazione Plug and Play

Lo switch PoE+ 8 porte gigabit di TRENDnet, modello TPE-TG80g, offre 8 porte gigabit PoE+ (120 Watt/borsa), una capacità di commutazione di 16 Gbps e un budget di potenza PoE di 120 W. Questo switch, grazie al suo robusto metallo, rende anche l'installazione Plug and Play.

Switch 8-portas Gigabit PoE+

TPE-TG80g (v4.1R)

- 8 portas Gigabit PoE+
- Montante de alimentação PoE de 123 W
- 16 Gbps de capacidade de comutação
- Interruptor de metal resistente
- Instalação Plug and Play

O Switch 8-portas Gigabit PoE+ da TRENDnet, modelo TPE-TG80g, oferece 8 portas Gigabit PoE+ (30 Watts/porta), a 16 Gbps de capacidade de comutação, e um montante de alimentação PoE de 123 Watts. Plug and Play: este interruptor de metal resistente confere para a rede PoE de alta velocidade.

TPE-TG80g

Switch PoE+ Gigabit à 8 ports

TPE-TG80g (v3.0R)

- Puerto PoE+ Gigabit
- Capacité d'alimentation PoE de 123 W
- Capacité de commutation de 16 Gbps
- Switch de métal résistant
- Installation plug and play

Le Switch PoE+ Gigabit à 8 ports de TRENDnet, modèle TPE-TG80g, offre 8 ports PoE+ Gigabit (30 watts/port), une capacité de commutation de 16 Gbps, et une alimentation PoE totale de 123 watts. L'installation plug and play de ce solide switch métallique permet une mise en réseau PoE facile à tout instant.
