## TIMEX T49867

# Timex Intelligent Quartz Analog Watch T49867 User Manual

MODEL: T49867

Brand: TIMEX

## Introduction

---

This manual provides comprehensive instructions for the Timex Intelligent Quartz Analog Black Dial Men's Watch, model T49867. Please read this manual carefully to understand the features, proper operation, and maintenance of your watch. Retain this manual for future reference.

## 1. Initial Setup

---

### 1.1. Setting the Time

1. Pull the crown (the knob on the side of the watch case) out to the time-setting position.
2. Rotate the crown in either direction to move the hands and set the correct time.
3. Once the time is set, push the crown back into its normal operating position.

### 1.2. Adjusting the Strap

The leather strap features a traditional buckle closure. To adjust, simply thread the strap through the buckle and secure the pin into the desired hole for a comfortable fit on your wrist.

## 2. Operating Your Watch

---

## 2.1. Chronograph Functions

This watch is equipped with a fly-back chronograph feature, allowing for precise timing. The chronograph has a 4-hour auto shut-off to conserve battery life. Refer to the specific instructions for your watch model for detailed operation of the chronograph pushers.

Image: Side view of the Timex T49867 watch case, highlighting the crown and push-buttons used for setting time and operating chronograph functions.

## 2.2. Indiglo Night Light

The Indiglo night light illuminates the watch dial for easy readability in low-light conditions. Typically, this feature is activated by pressing the crown. Hold for a few seconds to maintain illumination.

## 2.3. Date Indicator

The watch includes a date indicator on the dial. To set the date, pull the crown out to the first position (if applicable, or follow specific model instructions) and rotate it until the correct date is displayed. Push the crown back in to secure the setting.

## 2.4. Dual Time Zone Display

This watch supports a dual time zone display, allowing you to track time in two different locations simultaneously. Consult the full instruction manual provided with your watch for detailed steps on setting and utilizing this feature.

## 2.5. Water Resistance

Your Timex T49867 watch is water resistant up to 100 meters (330 feet). This makes it suitable for swimming and snorkeling. However, it is not recommended for scuba diving. Do not operate the crown or pushers while the watch is wet or submerged to prevent water ingress.

Image: Graphic illustrating the water resistance capabilities of the watch, indicating suitability for various water activities up to 100 meters.

## 3. Care and Maintenance

---

### 3.1. Cleaning Your Watch

Wipe your watch regularly with a soft, dry cloth to remove dust and dirt. For more thorough cleaning, a slightly damp cloth can be used, but ensure the watch is dried immediately. Avoid using harsh chemicals, solvents, or abrasive cleaners, as these can damage the watch's finish or seals.

### 3.2. Battery Replacement

Your quartz watch is powered by a battery. When the watch stops or the Indiglo light dims significantly, it may be time for a battery replacement. It is recommended to have the battery replaced by an authorized Timex service center to ensure proper sealing and maintain water resistance.

### 3.3. Leather Strap Care

The genuine leather strap should be protected from prolonged exposure to water, direct sunlight, and extreme temperatures, which can cause drying, cracking, or discoloration. Clean the strap with a soft, damp cloth and allow it to air dry naturally.

### 3.4. Mineral Crystal Glass

The watch features a durable mineral crystal glass, which offers good resistance against scratches and impacts. While robust, it is not entirely scratch-proof. Avoid contact with sharp or abrasive surfaces to maintain its clarity.

Image: Close-up of the watch dial, emphasizing the scratch-resistant mineral crystal glass.

## 4. Troubleshooting

---

### 4.1. Watch Not Running

- Ensure the crown is fully pushed into its normal operating position.
- The battery may need replacement. Refer to Section 3.2.

### 4.2. Indiglo Not Functioning

- A non-functioning Indiglo light can indicate a low battery.
- If the watch is running but Indiglo does not work after battery replacement, there may be an internal fault. Contact customer support.

### 4.3. Inaccurate Time

- Reset the time as described in Section 1.1.
- If the watch consistently loses or gains time, it may require servicing.

For any issues not resolved by these steps, please contact Timex customer support or an authorized service center.

## 5. Product Specifications

---

<b>Brand</b>	TIMEX
<b>Model Number</b>	T49867
<b>Display Type</b>	Analog
<b>Movement Type</b>	Quartz
<b>Dial Color</b>	Black
<b>Case Shape</b>	Round
<b>Case Material</b>	Stainless Steel
<b>Case Diameter</b>	44.1 Millimeters
<b>Case Thickness</b>	13.38 Millimeters

<b>Dial Glass Material</b>	Mineral
<b>Band Material</b>	Leather
<b>Band Color</b>	Black
<b>Band Width</b>	22 Millimeters
<b>Water Resistance Depth</b>	100 Meters
<b>Item Weight</b>	190 Grams (0.42 Pounds)
