

Disney 11743

Disney Projectables Mickey Mouse Clubhouse LED Night Light

USER MANUAL

Model: 11743

1. Product Overview

The Disney Projectables Mickey Mouse Clubhouse LED Night Light is designed to provide a soothing guide light and project a colorful image onto a wall, ceiling, or floor. This energy-efficient LED night light features light-sensing technology, activating at dusk and deactivating at dawn. It is cool to the touch, ensuring safety for any room.

2. Setup Instructions

1. **Unpack:** Carefully remove the night light from its packaging.
2. **Plug In:** Insert the night light into a standard 120V AC wall outlet. Ensure it is securely plugged in. The design allows the second outlet to remain free for other devices.
3. **Adjust Projection:** The globe containing the projector lens can be tilted up or down to direct the image onto the desired surface (wall, ceiling, or floor). Adjust the angle until the image is displayed where you want it.

Image 3: A visual representation highlighting the energy-efficient LED, soft red guide light, and the design that keeps the second outlet free.

3. Operating Instructions

The Projectables night light is equipped with a light sensor for automatic operation:

- **Automatic On/Off:** The night light will automatically turn on when the room darkens (at dusk) and turn off when the room becomes sufficiently lit (at dawn). No manual switching is required.
- **Projection:** Once activated, the night light projects a clear image of Mickey Mouse, Goofy, and Donald from the Mickey Mouse Clubhouse onto the chosen surface.

4. Maintenance

- **Cleaning:** To clean the night light, unplug it from the outlet. Wipe the exterior with a soft, dry cloth. Do not use abrasive cleaners or immerse the unit in water.
- **LED Lifespan:** The night light uses long-life, energy-efficient LEDs that are not user-replaceable. The LEDs are designed to last for the lifetime of the product under normal use.

5. Troubleshooting

- **No Light/Projection:**

- Ensure the night light is securely plugged into a functioning 120V AC outlet.
- Check if the room is sufficiently dark. The light sensor requires darkness to activate the unit.
- Test the outlet with another device to confirm it has power.
- **Dim or Blurry Projection:**
 - Ensure the lens is clean and free of dust or smudges.
 - Adjust the angle of the globe to optimize focus and clarity on the projection surface.
 - The clarity of the projection may vary with distance from the surface. Try adjusting the distance if possible.

6. Specifications

Feature	Detail
Model Number	11743
Brand	Disney
Lamp Type	Night Light
Light Source Type	LED
Power Source	Plug-in (120 Volts)
Special Feature	Projection, Light Sensor
Material	Plastic
Product Dimensions	2.8"D x 5.4"W x 7.06"H
Item Weight	2.39 ounces
Certification	UL Listed

Image 5: Display of the UL Listed certification, indicating the product meets safety standards.

7. Warranty and Support

This Disney Projectables LED Night Light comes with a 90-day limited lifetime warranty. For warranty claims or technical support, please refer to the contact information provided on the product packaging or visit the official Disney/Jasco Products Company website.
