## Shark XF769

# Shark VX33 XF769 Replacement Vacuum Filters - Instruction Manual

## INTRODUCTION

---

This manual provides instructions for the installation, maintenance, and care of your Shark VX33 XF769 Replacement Vacuum Filters. These filters are designed to maintain the performance of your compatible Shark cordless hand vacuum by effectively capturing dust and debris.

## COMPATIBILITY

---

The Shark VX33 XF769 replacement filters are compatible with the following Shark Cordless Hand Vacuum models:

- Shark SV769 Pet Perfect Hand Vacuums
- Shark SV7728
- Shark SV728NC, SV728N-1
- Shark SV736, SV738, SV738C, SV738CV
- Shark SV749, SV748C
- Shark SV726N, SV728N
- Shark SV719
- Shark SV736R, SV736CR

- Shark SV70CR, SV70, SV70Z
- Shark SV90, SV90Z

These filters are also known by part numbers XSB769N, XSB769, XF769, XSB726, and XSB736N.

## INSTALLATION

---

To ensure optimal performance and proper fit, follow these steps for installing your new filter:

1. **Remove the Dust Cup:** Detach the dust cup from your Shark cordless hand vacuum according to your vacuum's specific instructions.
2. **Remove the Old Filter:** Carefully remove the existing filter from inside the dust cup. Dispose of the old filter responsibly.
3. **Insert the New Filter:** Place the new Shark VX33 XF769 filter into the dust cup. Ensure the filter material is pointed towards the nose of the vacuum and press it firmly all the way into the pod until it is securely seated.
4. **Reattach the Dust Cup:** Reattach the dust cup to the hand vacuum, ensuring it clicks securely into place.

## MAINTENANCE AND CLEANING

---

Regular cleaning of your washable filter is essential for maintaining your vacuum's suction power and extending the filter's lifespan. It is recommended to clean the filter every 30 days.

1. **Remove Filter:** Follow the initial steps for installation to remove the filter from the dust cup.
2. **Rinse:** Rinse the filter under running tap water until the water runs clear. Do not use soap or detergents.
3. **Air Dry Completely:** Shake off excess water and allow the filter to air dry completely for at least 24 hours before reinserting it into the vacuum. It is crucial that the filter is 100% dry to prevent damage to the vacuum motor. Do not use a hairdryer or other heating methods to dry the filter.
4. **Replacement:** These filters are designed to be washable and reusable. However, for optimal performance, it is recommended to replace the filter after 3-4 washes or when you notice a significant decrease in suction power, even after cleaning.

## TROUBLESHOOTING

---

If you experience reduced suction or unusual noises from your vacuum after filter installation or cleaning, consider the following:

- **Filter Not Fully Dry:** Ensure the filter is completely dry before reinstallation. A damp filter can impede airflow and potentially damage the motor.
- **Improper Installation:** Verify that the filter is pressed firmly and correctly seated within the dust cup, with the filter material facing the correct direction.
- **Filter Clogged:** If the filter is old or has been washed multiple times, it may be permanently clogged. Consider replacing it with a new filter.
- **Other Blockages:** Check the vacuum's nozzle, hose, and dust cup for any other blockages that might be affecting suction.

## SPECIFICATIONS

---

<b>Product Name</b>	Shark VX33 XF769 Replacement Vacuum Filters
<b>Part Numbers</b>	XF769, XSB769N, XSB769, XSB726, XSB736N
<b>Compatibility</b>	Shark SV769 and other specified cordless hand vacuum models
<b>Reusability</b>	Reusable (Washable)
<b>Recommended Cleaning</b>	Every 30 days
<b>Recommended Replacement</b>	After 3-4 washes or when performance degrades
<b>Number of Pieces</b>	3
<b>Product Dimensions</b>	6 x 6 x 5 inches

<b>Item Weight</b>	7 ounces
