## Monster 3206117

# Monster 3.5mm Stereo Audio Cable User Manual

Model: 3206117

## PRODUCT OVERVIEW

The Monster 3.5mm Stereo Audio Cable is designed to connect various audio devices with a 3.5mm jack. This 6-foot (1.8m) cable features durable 3.5mm stereo plugs with strain relief, ensuring a reliable connection for your audio needs. It is ideal for connecting portable media players, such as iPods, MP3 players, portable CD/DVD players, or any mini stereo audio device, to car stereos, multi-media speakers, or stereo receivers.

Image: The Monster 3.5mm Stereo Audio Cable, black in color, coiled and displayed within its retail packaging. The packaging highlights "3.5 mm to 3.5 mm Stereo Plug Cable" and "6ft / 1.8m" length, along with a "Lifetime Limited Warranty" badge.

## SETUP INSTRUCTIONS

---

- Identify Ports:** Locate the 3.5mm audio output jack on your source device (e.g., MP3 player, smartphone, portable CD player) and the 3.5mm audio input jack on your receiving device (e.g., car stereo, multimedia speaker, home stereo receiver). These jacks are typically small, circular ports.
- Connect Source:** Insert one end of the Monster 3.5mm Stereo Audio Cable firmly into the 3.5mm audio output jack of your source device.
- Connect Receiver:** Insert the other end of the cable firmly into the 3.5mm audio input jack of your receiving device.
- Secure Connection:** Ensure both plugs are fully inserted to prevent audio distortion or loss of signal. The durable plugs with strain relief are designed for a secure fit.

*Note:* Always ensure your devices are powered off or at a low volume before connecting or disconnecting audio cables to prevent sudden loud noises or potential damage to speakers.

## OPERATING INSTRUCTIONS

---

Once the Monster 3.5mm Stereo Audio Cable is properly connected between your source and receiving devices, operation is straightforward:

- Power On Devices:** Turn on both your audio source device and your audio receiving device.
- Select Input:** On your receiving device (e.g., car stereo, home receiver), select the correct audio input source. This is often labeled "AUX," "Line In," or similar. Refer to your receiving device's manual if you are unsure.
- Play Audio:** Begin playing audio from your source device.
- Adjust Volume:** Adjust the volume on both your source device and your receiving device to a comfortable listening level. It is generally recommended to set the source device's volume to a high level (e.g., 75-90%) and control the overall volume using the receiving device.

## MAINTENANCE AND CARE

---

To ensure the longevity and optimal performance of your Monster 3.5mm Stereo Audio Cable, follow these simple maintenance guidelines:

- Storage:** When not in use, coil the cable loosely. Avoid tight coiling or sharp bends, which can damage the internal wires.
- Cleaning:** If the cable or connectors become dirty, gently wipe them with a soft, dry cloth. Do not use harsh chemicals or abrasive cleaners.
- Handling:** Always grasp the plug itself when connecting or disconnecting the cable, rather than pulling on the cable cord. This prevents strain on the cable's internal connections and the strain relief.
- Environment:** Store the cable in a dry environment, away from extreme temperatures and direct sunlight.

## TROUBLESHOOTING

---

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
No audio output.	<ul style="list-style-type: none"> <li>• Cable not fully inserted.</li> <li>• Incorrect input selected on receiving device.</li> <li>• Volume too low on source or receiving device.</li> <li>• Source device not playing audio.</li> <li>• Damaged cable.</li> </ul>	<ul style="list-style-type: none"> <li>• Ensure both ends of the cable are fully seated in their respective jacks.</li> <li>• Verify the correct input (e.g., AUX, Line In) is selected on your receiving device.</li> <li>• Increase volume on both the source and receiving devices.</li> <li>• Confirm audio is playing from the source device (e.g., check headphones directly).</li> <li>• Try a different cable to rule out cable damage.</li> </ul>
Static or distorted audio.	<ul style="list-style-type: none"> <li>• Loose connection.</li> <li>• Interference.</li> <li>• Damaged cable.</li> </ul>	<ul style="list-style-type: none"> <li>• Reseat both ends of the cable.</li> <li>• Move the cable away from other electronic devices that might cause interference.</li> <li>• Inspect the cable for visible damage. If damaged, replace the cable.</li> </ul>

## SPECIFICATIONS

- **Brand:** Monster
- **Model Number:** 3206117
- **Manufacturer Part Number:** 140285-00
- **UPC:** 050644623837
- **Cable Type:** Audio (AUX)
- **Connector Type:** 3.5mm Stereo Audio
- **Connector Gender:** Male-to-Male
- **Cable Length:** 6 feet (1.8 meters)
- **Color:** Black
