3-IN-ONE Multi-Purpose Oil with Telescoping Spout - Instruction Manual

Model: 100703

INTRODUCTION

The 3-IN-ONE Multi-Purpose Oil with Telescoping Spout is a versatile lubricant designed for a wide range of applications. Since 1894, 3-IN-ONE oil has been trusted for its ability to lubricate, penetrate rust, and clean various mechanisms and surfaces. This particular product features a unique telescoping spout for precise application in hard-to-reach areas.

PRODUCT FEATURES

- **Multi-Purpose Formula:** Lubricates moving parts, penetrates and loosens rusted components, and cleans surfaces.
- **Telescoping Marksman Spout:** Extends more than 6 inches to provide pinpoint accuracy for applying oil in tight or difficult-to-access spaces.
- **Long-Lasting Protection:** Provides durable lubrication and corrosion prevention.
- **Convenient Bottle Size:** 4 fluid ounces (118 mL) for easy handling and storage.

USAGE INSTRUCTIONS

1. **Preparation:** Ensure the surface or mechanism to be treated is clean and free from excessive dirt or debris.
2. **Extend Spout:** Gently pull the red telescoping spout upwards until it reaches the desired length. The spout can extend over 6 inches for precision.
3. **Apply Oil:** Aim the tip of the spout directly at the area requiring lubrication, rust penetration, or cleaning. Squeeze the bottle gently to dispense a small amount of oil. For optimal results, apply only a few drops as needed.
4. **Retract Spout:** After use, push the telescoping spout back down into the cap until it is fully retracted. This helps prevent leakage and keeps the spout clean.
5. **Wipe Excess:** If any excess oil is present, wipe it away with a clean cloth to prevent accumulation and potential mess.

Note: The telescoping spout is designed for precise application. Avoid over-squeezing the bottle to prevent excessive oil discharge, which can lead to mess and waste.

MAINTENANCE AND STORAGE

- **Storage:** Store the bottle upright in a cool, dry place away from direct sunlight and heat sources.
- **Cap Security:** Always ensure the cap is tightly closed and the telescoping spout is fully retracted after each use to prevent leaks and contamination.
- **Spout Cleaning:** If the spout becomes clogged, gently clean the tip with a thin wire or needle.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Oil leaks from spout/cap when stored or used.	Spout not fully retracted; cap not tightened; bottle stored horizontally; temperature changes causing expansion.	Ensure spout is fully retracted and cap is tightly secured. Store bottle upright. Avoid storing in areas with significant temperature fluctuations.
Difficulty dispensing oil or inconsistent flow.	Spout tip is clogged; air bubble in the spout.	Gently clear the spout tip with a thin wire. Tap the bottle lightly to dislodge any air bubbles.
Excessive oil dispensed.	Bottle squeezed too hard.	Apply less pressure when squeezing the bottle. The telescoping spout allows for precise, small drops.
