

## AEM 1-1000

# AEM 1-1000 Synthetic Air Filter Cleaner with Trigger Sprayer - 32 oz. Instruction Manual

## INTRODUCTION

The AEM 1-1000 Synthetic Air Filter Cleaner is designed to effectively loosen and dissolve dirt and grime buildup on synthetic air filters. This cleaner allows for easy rinsing with water, ensuring your filter remains clean and performs optimally. It is specifically formulated for AEM Dryflow air filters and is suitable for other synthetic air filter types.

- Rinse filter with water after using
- Loosens and dissolves dirt and grime
- Designed for AEM Dryflow air filters
- Country of Origin: United States

## SAFETY INFORMATION

### DANGER: CORROSIVE

KEEP OUT OF REACH OF CHILDREN. SEE BACK LABEL FOR ADDITIONAL INFORMATION.

### First Aid Treatment:

- **If in eyes:** Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice and attention or call Poison Control Center at 1-800-222-1222 immediately.
- **If on skin:** Wash with plenty of soap and water. If skin irritation occurs: Get medical advice and attention.
- **If swallowed:** Call a Poison Control Center or doctor immediately. Do not induce vomiting.

Contains: Tetrasodium EDTA, Diethylene glycol monobutyl ether.

Wear eye and face protection. Wash face, hands and any exposed skin thoroughly after handling.

## DRYFLOW® AIR FILTER CLEANER

DISSOLVES ROAD GRIME FOR EASY CLEANING

### AIR FILTER CLEANING

Spray a generous amount of cleaner onto both sides of the filter.  
Allow to soak in for 20 minutes. Rinse the filter element with water  
from the clean side out in order to flush the dirt out of the filter.  
After rinsing, gently shake off excess water. Allow filter to dry.  
The filter should be dry, or just slightly damp before re-installing.

DANGER: CORROSIVE  
KEEP OUT OF REACH OF CHILDREN

Causes serious eye damage. Wear face protection. Do not swallow. Handle with care.

### FIRST AID TREATMENT

If swallowed, rinse mouth, call a Poison Control Center, doctor or Chemtrec at +1 (800) 424-9300 immediately. Do not induce vomiting. If in eyes, rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

Contains: Tetrasodium EDTA; Diethylene glycol monobutyl ether.

## OPERATING INSTRUCTIONS: CLEANING YOUR SYNTHETIC AIR FILTER

Follow these steps to clean your AEM Dryflow or other synthetic air filter using the AEM 1-1000 cleaner:

1. **Preparation:** Remove the air filter from your vehicle. Gently tap the filter to dislodge any loose dirt or debris.
2. **Apply Cleaner:** Liberally spray the AEM 1-1000 cleaner onto both sides of the air filter element. Ensure thorough coverage.
3. **Soak:** Allow the cleaner to soak into the filter for approximately 20 minutes. Do not allow the cleaner to dry on the air filter.
4. **Rinse:** Rinse the filter element with cool, low-pressure water. Always rinse from the clean side (inside) out to flush dirt and cleaner residue out of the filter. Continue rinsing until all traces of the cleaner are gone and the water runs clear.
5. **Excess Water Removal:** Gently shake off any excess water from the filter.
6. **Drying:** Allow the filter to air dry completely. Do not use compressed air or heat to dry the filter, as this can damage the filter media. Place it in a well-ventilated area, ideally in sunlight, to expedite drying.
7. **Re-installation:** Once completely dry, re-install the clean air filter into your vehicle.

**Note:** AEM Dryflow air filters are synthetic and do not require oiling after cleaning. If you are cleaning a different type of synthetic filter, consult its manufacturer's instructions regarding post-cleaning treatment.
