Solo Stove Solo Stove Solo Pot 900

Solo Stove Solo Pot 900 Instruction Manual

Model: Solo Pot 900

Brand: Solo Stove

1. PRODUCT OVERVIEW

The Solo Stove Solo Pot 900 is a lightweight, durable stainless steel backpacking pot designed for efficient outdoor cooking. It features a convenient pouring spout, clear volume markings in ounces and milliliters, and foldable handles for compact storage. This pot is specifically designed to nest with the Solo Stove Lite, making it an ideal companion for your outdoor adventures.

VOLUME: 30 fl. oz (900ml)

4.7 inches

**Lightweight
7.8 oz**

4.5 inches

The Solo Stove Solo Pot 900 is designed for portability, easily attaching to or fitting inside a backpack for convenient transport during hiking and camping trips.

2. SETUP AND FIRST USE

Before first use, wash the Solo Pot 900 thoroughly with warm, soapy water and rinse completely. Ensure it is dry before storage or use. The pot is designed to nest perfectly with the Solo Stove Lite, allowing for a compact packing solution. Simply place the Solo Stove Lite inside the Solo Pot 900 for efficient space utilization in your pack.

The Solo Pot 900 is designed to nest compactly with the Solo Stove Lite, optimizing space in your gear. The stove fits snugly inside the pot for easy transport.

3. OPERATING INSTRUCTIONS

3.1. Boiling Water and Cooking

Place the Solo Pot 900 directly on top of your Solo Stove Lite or other compatible camping stove. The pot's design allows for efficient heat transfer. Use the internal volume markings to measure liquids accurately. The integrated pouring spout facilitates easy and controlled pouring of hot liquids, reducing spills.

The Solo Pot 900 sits securely on top of a Solo Stove, ready for boiling water or cooking. The flames from the stove efficiently heat the pot's base.

3.2. Using Volume Markings

The interior of the pot features etched volume markings in both ounces (oz) and milliliters (ml), allowing for precise measurement of ingredients or water. This is particularly useful for rehydrating freeze-dried meals or preparing beverages.

A close-up view of the pot's interior, clearly showing the etched volume markings in ounces and milliliters for accurate liquid measurement.

3.3. Pouring Spout

The integrated pouring spout is designed for controlled and drip-free pouring. When pouring, tilt the pot gently to direct the liquid through the spout. This feature is especially useful for serving hot beverages or draining water from cooked food.

A detailed view of the pot's integrated pouring spout, designed for precise and controlled dispensing of liquids without spills.

3.4. Handling Hot Pot

The pot features foldable handles that can be extended for use and folded back for storage. While the handles are designed to stay cool during normal use, always exercise caution and use heat-resistant gloves or a pot holder when handling the pot, especially after prolonged exposure to heat. The lid also has a lockable lift tab for safe removal.

The lid features a sturdy, rubber-coated lift tab that can be locked upright for easy and safe handling when the pot is hot.

4. MAINTENANCE AND CARE

The Solo Pot 900 is made from food-grade 304 Stainless Steel, which is highly durable and easy to clean. After each use, allow the pot to cool completely. Wash with warm, soapy water and a non-abrasive sponge or cloth. For stubborn food residue, soaking the pot for a short period may help. Rinse thoroughly and dry completely before storing to prevent water spots or mineral buildup. The included black nylon stuff sack provides protection during transport and storage.

The pot's foldable handles tuck neatly against the side, making it compact for packing and storage in its included stuff sack.

5. TROUBLESHOOTING

5.1. Lid Not Staying Secure

Ensure the lid is properly aligned with the pot's rim. The lid is designed for a snug fit to retain heat and prevent spills. If the lid feels loose, check for any debris on the rim of the pot or the lid itself that might be preventing a proper seal.

5.2. Handles Getting Too Hot

While the foldable handles are designed to minimize heat transfer, direct and prolonged exposure to high flames can cause them to heat up. Always use caution and consider using heat-resistant gloves or a pot lifter, especially when cooking over an open fire or with a very hot stove. Adjust the pot's position on the stove to keep the handles away from direct flame.

5.3. Discoloration of Stainless Steel

Over time, stainless steel cookware can develop a rainbow-like discoloration due to high heat. This is a normal occurrence and does not affect the pot's performance or safety. It can often be removed with a stainless steel cleaner or a mixture of vinegar and water.

6. SPECIFICATIONS

Feature	Detail
Material	Food Grade 304 Stainless Steel
Capacity	900 Milliliters (30 fl. oz)
Item Weight	7.8 Ounces

Feature	Detail
Dimensions (H x D)	4.5 inches x 4.7 inches
