Konus SPORTY 10x50 WA

Konus 10x50 Sporty Fixed Focus Binoculars 2256 Instruction Manual

Model: SPORTY 10x50 WA

1. INTRODUCTION

Thank you for choosing the Konus 10x50 Sporty Fixed Focus Binoculars. These binoculars are designed for ease of use and provide a clear, wide-angle view, ideal for various outdoor activities such as hunting, shooting, and sports observation. This manual provides essential information for the proper setup, operation, and maintenance of your binoculars.

2. PRODUCT FEATURES

- **10x Magnification:** Brings distant objects 10 times closer.
- **50mm Objective Lenses:** Large objective lenses gather ample light for bright images.

- **Fixed Focus System:** Designed for quick, effortless viewing without manual focusing.
- **Wide-Angle Design:** Provides a broad field of view, enhancing observation.
- **Rubberized Body:** Offers a secure grip and added protection against impacts.
- **Tripod Mountable:** Allows for stable, extended viewing sessions (tripod adapter sold separately).
- **Waterproof:** Designed to withstand various weather conditions.

3. PACKAGE CONTENTS

Upon unpacking, please ensure all items are present:

- Konus 10x50 Sporty Fixed Focus Binoculars
- Neck Strap
- Carrying Case
- Lens Cleaning Cloth
- Instruction Manual

4. SETUP

4.1. Attaching the Neck Strap

1. Thread the ends of the neck strap through the strap lugs located on each side of the binocular body.
2. Secure the strap by feeding it back through the buckle, ensuring it is tightly fastened.
3. Adjust the strap length for comfortable carrying around your neck.

4.2. Adjusting Interpupillary Distance

The interpupillary distance (the distance between the centers of your pupils) varies among individuals. To achieve a single, clear circular field of view:

1. Hold the binoculars up to your eyes.
2. Grasp each barrel firmly and move them closer together or further apart until you see a single, perfectly round image.
3. Note this setting for future use.

Image 2: Rear view of the binoculars, illustrating the eyepieces and the central hinge for interpupillary adjustment.

5. OPERATION

5.1. Using Fixed Focus Binoculars

These binoculars feature a fixed focus system, meaning there is no manual focus wheel to adjust. They are designed to provide a clear image for objects beyond a certain minimum distance, typically around 20 meters (65 feet) to infinity, without requiring any adjustment. This makes them ideal for observing fast-moving subjects or for users who prefer simplicity.

5.2. Observing

1. Adjust the interpupillary distance as described in Section 4.2.
2. Bring the binoculars to your eyes and look through the eyepieces.
3. Point the binoculars at your desired subject. For objects within the fixed focus range, the image should appear clear.
4. If you wear eyeglasses, you may find it more comfortable to use the binoculars with your glasses on, as the fixed focus design often accommodates this.

Image 3: Angled view of the binoculars, demonstrating their general appearance during use.

6. MAINTENANCE

6.1. Cleaning Lenses

To maintain optical clarity, keep lenses free of dust and smudges.

- Use the provided lens cleaning cloth or a soft, lint-free cloth.
- For stubborn smudges, a small amount of lens cleaning fluid can be applied to the cloth (never directly to the lens).
- Avoid touching the lens surfaces with your fingers.

6.2. Storage

- Store binoculars in their carrying case when not in use to protect them from dust and impacts.
- Keep binoculars in a cool, dry place, away from direct sunlight and extreme temperatures.
- Avoid storing in areas with high humidity to prevent mold growth on lenses.

7. TROUBLESHOOTING

- **Blurry Image:** Ensure the object is within the fixed focus range (typically beyond 20 meters). Verify interpupillary distance is correctly set.
- **Double Image:** Adjust the interpupillary distance until a single, circular field of view is achieved.
- **Dark or Obscured View:** Check that lens caps are removed from both objective and eyepiece lenses. Ensure lenses are clean.

8. SPECIFICATIONS

Feature	Specification
Brand	Konus
Model	SPORTY 10x50 WA
Magnification	10x
Objective Lens Diameter	50 mm
Focus Type	Fixed Focus
Special Features	Wide-angle design
Water Resistance Level	Waterproof
Mounting Type	Tripod mountable
Material	Rubber
Color	Black
Product Dimensions (L x W x H)	30 x 30 x 30 cm
Product Weight	770 grams
Manufacturer	Konus, USA
Country of Origin	Italy

9. WARRANTY AND SUPPORT

For detailed information regarding warranty coverage, terms, and conditions, please refer to the documentation provided with your purchase or visit the official Konus website. For technical support or service inquiries, please contact Konus customer service directly.
