PHONE RECORDER - RECORD FROM CELL PHONE OR ANY TELEPHONE CALL USING YOUR VOICE RECORDER

Brand: Generic | Model: SEL-UTRD

Product Overview

The Generic Phone Recorder is a versatile device designed to enable recording of telephone and cell phone conversations directly to your voice recorder, PC, or laptop. This pickup device connects to any digital or cassette voice recorder equipped with a 3.5mm microphone input, transforming it into a telephone call recorder. Its sensitive lavalier microphone is engineered to capture both sides of a conversation clearly, making it suitable for recording interviews and phone calls.

This image displays the Generic Phone Recorder pickup device. It features a black 3.5mm audio jack on one end, connected by a black cable to a black earpiece designed to fit into the ear. The cable is coiled and secured with a small

Setup Instructions

1. **Identify Microphone Input:** Locate the 3.5mm microphone input jack on your digital or cassette voice recorder, PC, or laptop. This is typically labeled "Mic In" or with a microphone icon.
2. **Insert Earpiece:** Gently place the soft earpiece of the Phone Recorder into your ear, similar to how you would wear a standard headphone earbud. Ensure it is comfortable and securely positioned.
3. **Connect Plug:** Insert the 3.5mm plug of the Phone Recorder firmly into the microphone input jack of your recording device.
4. **Prepare Recording Device:** Turn on your voice recorder or open the recording software on your PC/laptop and ensure it is ready to record.

Operating Instructions

Once the Phone Recorder is set up, follow these steps to record your conversations:

1. **Initiate Recording:** Start the recording function on your voice recorder or recording software.
2. **Make or Answer Call:** Proceed to make an outgoing call or answer an incoming call on your telephone or cell phone.
3. **Conversation Capture:** The earpiece microphone will capture both sides of the phone conversation and transmit it to your recording device.
4. **End Recording:** Once the conversation is complete, stop the recording on your device and save the audio file as desired.

***Note:** For optimal recording quality, ensure the earpiece is properly seated in your ear and the recording device's input levels are adjusted correctly.*

Maintenance

- **Cleaning:** Gently wipe the earpiece and cable with a soft, dry cloth. Avoid using harsh chemicals or abrasive materials.
- **Storage:** When not in use, store the device in a cool, dry place, away from direct sunlight and extreme temperatures. Avoid tangling the cable.
- **Handling:** Do not pull on the cable to disconnect the plug. Always grasp the plug itself.

Troubleshooting

Problem	Possible Cause / Solution
No recording or very low audio.	<ul style="list-style-type: none">◦ Ensure the 3.5mm plug is fully inserted into the microphone input of your recording device.◦ Verify that your voice recorder or software is set to record and its input volume is adequate.◦ Check if the earpiece is properly seated in your ear during the call.

Problem	Possible Cause / Solution
Poor audio quality or static.	<ul style="list-style-type: none"> ◦ Ensure the earpiece is clean and free of debris. ◦ Minimize background noise during recording. ◦ Test with a different recording device to rule out issues with your recorder. ◦ Check for any damage to the cable or plug.
Clicking sound in recording.	<ul style="list-style-type: none"> ◦ This can sometimes be caused by electromagnetic interference. Try moving away from other electronic devices or power sources. ◦ Ensure the connection to your recording device is secure.
