

## Acova FAS-185-060

# Acova Fassane Spa FAS Towel Dryer - 1019 W - User Manual

Model: FAS-185-060

## 1. INTRODUCTION

This user manual provides comprehensive instructions for the safe installation, operation, and maintenance of your Acova Fassane Spa FAS hot water towel dryer. Please read this manual thoroughly before installation and use, and retain it for future reference. Proper installation and adherence to these guidelines will ensure optimal performance and longevity of your appliance.

## 2. SAFETY INFORMATION

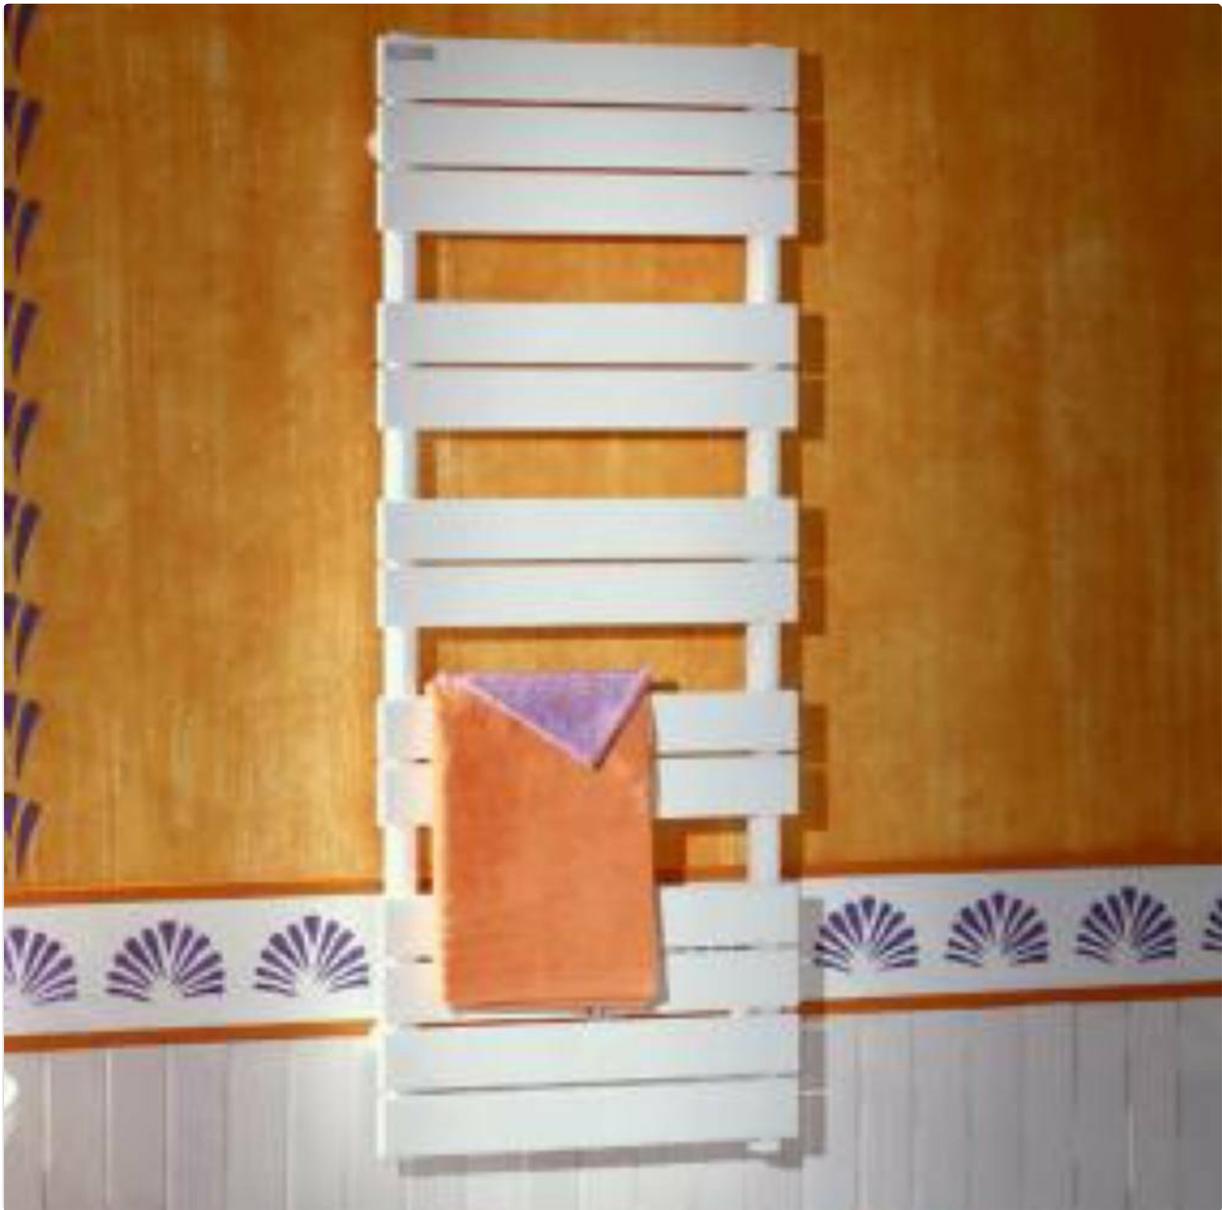

**WARNING: Failure to follow these safety instructions could result in fire, electric shock, injury, or damage to the product or property.**

- Installation must be performed by a qualified professional in accordance with local building and plumbing codes.
- Ensure the towel dryer is securely mounted to a suitable wall structure capable of supporting its weight when filled with water and loaded with towels.
- Do not operate the appliance if it is damaged or malfunctioning.
- Keep children and pets away from the appliance during operation, as surfaces can become hot.
- Do not cover the towel dryer with excessive items, as this can impede heat dissipation and create a fire hazard.
- Regularly inspect the appliance for any signs of leaks or damage.

## 3. PACKAGE CONTENTS

Verify that all components are present and undamaged before proceeding with installation:

- FASSANE SPA symmetric hot water towel dryer
- Chromed 1/8" adjustable air vent
- Mounting brackets and hardware (may be included or sold separately, refer to packaging)

*Figure 1: An image showing the white Acova Fassane Spa FAS hot water towel dryer installed on an orange wall. A folded orange and purple towel hangs on one of its bars.*

## 4. SETUP AND INSTALLATION

Installation of this hot water towel dryer requires plumbing expertise. It is strongly recommended that installation be carried out by a certified plumber to ensure proper connection to your central heating system and compliance with all safety standards.

### 4.1 Pre-Installation Checks

1. Unpack all components and inspect for any damage.
2. Ensure the wall where the towel dryer will be mounted is structurally sound and can support the weight of the unit when filled with water.
3. Confirm the location allows for easy access to plumbing connections and the air vent.

### 4.2 Mounting the Towel Dryer

1. Mark the drilling points on the wall according to the provided mounting template (if applicable) or the dimensions of the mounting brackets.
2. Drill holes and insert appropriate wall plugs.

3. Secure the mounting brackets to the wall.
4. Carefully lift and attach the towel dryer to the mounting brackets, ensuring it is level and securely fastened.

## 4.3 Plumbing Connections

1. Connect the towel dryer to the flow and return pipes of your central heating system. Use appropriate valves and seals to prevent leaks.
2. Install the chromed 1/8" adjustable air vent at the highest point of the towel dryer.
3. Once connections are secure, slowly fill the heating system and check for any leaks at all connection points.

## 5. OPERATING INSTRUCTIONS

---

The Acova Fassane Spa FAS towel dryer operates as part of your home's central heating system. Its operation is typically controlled by your main heating thermostat or individual radiator valves.

- **Turning On/Off:** The towel dryer will heat up when your central heating system is active. To turn it off independently (if equipped with a thermostatic radiator valve - TRV), adjust the TRV to its lowest setting or off position.
- **Temperature Control:** If your towel dryer is fitted with a TRV, you can adjust the heat output by rotating the valve. Higher settings will allow more hot water to flow through, increasing the surface temperature.
- **Drying Towels:** Hang towels evenly over the bars. Avoid overloading the dryer, as this can reduce its efficiency and heat output.

## 6. MAINTENANCE

---

Regular maintenance ensures efficient operation and extends the lifespan of your towel dryer.

### 6.1 Cleaning

- Ensure the towel dryer is cool before cleaning.
- Wipe surfaces with a soft, damp cloth. For stubborn marks, use a mild, non-abrasive cleaner.
- Do not use abrasive sponges, harsh chemicals, or solvents, as these can damage the finish.

### 6.2 Bleeding the Radiator (Air Vent)

If your towel dryer feels cold at the top but warm at the bottom, it likely has air trapped inside, reducing its efficiency. This can be resolved by bleeding the radiator.

1. Ensure your central heating system is on and the towel dryer is hot.
2. Locate the chromed 1/8" adjustable air vent at the top of the unit.
3. Using a radiator key or a flat-head screwdriver (depending on the vent type), slowly turn the vent counter-clockwise until you hear a hissing sound (air escaping).
4. Keep a cloth or small container underneath to catch any water that may escape.
5. Once water starts to flow steadily from the vent (without air), close the vent by turning it clockwise.
6. Check the pressure of your central heating system and top it up if necessary after bleeding.

## 7. TROUBLESHOOTING

---

Problem	Possible Cause	Solution
Towel dryer not heating up.	Central heating system is off. Thermostatic radiator valve (TRV) is closed. Air trapped in the system.	Ensure central heating is active. Open the TRV. Bleed the radiator (see Section 6.2).
Towel dryer is cold at the top, warm at the bottom.	Air trapped inside the unit.	Bleed the radiator (see Section 6.2).
Water leaking from connections.	Loose connections or faulty seals.	Immediately turn off the central heating system and contact a qualified plumber.

## 8. SPECIFICATIONS

**Brand:** Acova

**Model:** FAS-185-060

**Product Type:** Hot Water Towel Dryer

**Nominal Power Output:** 1019 W (as per product title)

**Color:** White

**Included Components:** FASSANE SPA symmetric hot water towel dryer, Chromed 1/8" adjustable air vent

**Dimensions (L x W x H):** 1 x 1 x 1 cm (Note: These dimensions appear to be incorrect based on typical product size and image. Please refer to product packaging for accurate measurements.)

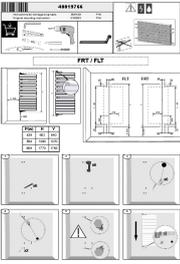

**Weight:** 20 Kilograms

**Batteries Required:** No

## 9. WARRANTY AND SUPPORT

For warranty information, please refer to the documentation provided with your purchase or contact your retailer. For technical support or spare parts inquiries, please contact Acova customer service or your authorized dealer. Keep your proof of purchase for any warranty claims.
