## 2. PRODUCT FEATURES

- **Size:** No. 3, with an approximate diameter of 7.3 inches (18.5 cm).
- **Classification:** Designed as a sign ball and suitable for toddler use.
- **Color:** Red and Black.
- **Material:** Constructed from durable rubber.
- **Construction:** Molded basketball design.
- **Durability:** Made for outdoor play.
- **Grip:** Features deep grooves to enhance grip.

### Basketball Construction Overview

# Basketball Construction

## Legacy™ 素材

スポルディング独自の素材を使用したLegacy™ボールはプレイヤーに優れた湿度コントロールと密着感を与え、優れた柔軟性とハンドリングに対するレスポンスを備えています。Legacyに使用されている中心部分はクッション材フォーム構造になっており耐久性が強化された上に正確なリバウンドと柔軟な感触を可能にしました。これらの他にはない特性を持つLegacyボールはインドアゲームボールの究極の規格になっていくことでしょう。

## クラシック素材

新しく設計されたこの独自素材はドライグリップに優れており、ハイレベルなインドアプレイ用に設計されています。柔軟なカーカス（骨組み）と深い溝のデザインでボールのグリップとプレイヤーのコントロール力が向上しました。スポルディングの革新的なZK素材は最高のパフォーマンスのためのコントロール力向上とあわせてユニークな耐久性を備えています。

### 1 カバー

カバー素材は優れたグリップ力と柔らかな感触を備えており、一方素材の強度と耐摩耗性に対するスポルディングの厳しい基準は保持しています。

### 2 カーカス（骨組み）

カーカスで構造と外形が作られ、内部構成を保護します。

### 3 ワインディング

ナイロン製ワインディングはボールの構造に構造上の完全性と耐久性を加えます。

### 4 ブラダー（空気袋）

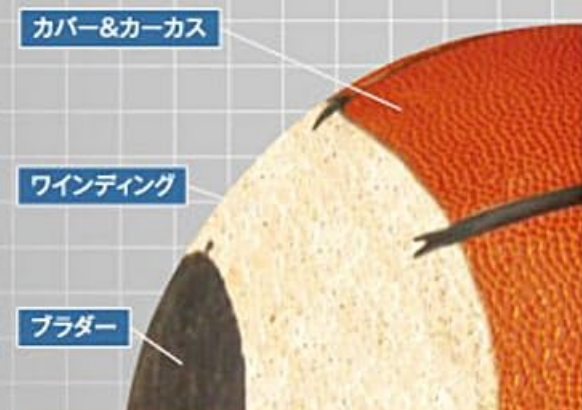

最高級のブチル製ブラダーは適正な空気注入と長期間の空気保有ができるようにボール空気圧を保持します。

## ラミネート加工バスケットボールの構造

ラミネート加工の構造はレザーや合成パネルに使用されています。アスリートに最高のバスケットボールを提供するため、これらのパネルは手作業でラバーのカーカスに固定されます。この素材の汎用性により、プレイヤーはどんなコートでも自分のゲームをすることができます。

## 成型バスケットボールの構造

この技術は屋外用バスケットボールに使用され、より多くの設計機能や幅広い色の選択が可能になります。

Image 2: Diagram illustrating the internal construction of a basketball, showing layers such as the outer cover, winding, carcass, and inner bladder.

The Spalding STORM basketball is constructed with multiple layers for performance and durability:

1. **Cover:** The outermost layer, made of durable rubber, provides grip and protection.
2. **Carcass:** The structural layer beneath the cover, which gives the ball its shape and strength.
3. **Winding:** Nylon threads wound around the bladder and carcass, providing structural integrity and consistent bounce.
4. **Bladder:** The innermost air-retention component, typically made of butyl rubber, designed to hold air pressure for extended periods.

## 3. SETUP: INFLATION

Your Spalding basketball may be shipped deflated or partially deflated. Proper inflation is crucial for optimal performance and to prevent damage.

1. **Locate the Valve:** Find the small rubber valve on the surface of the ball.
2. **Prepare Needle:** Moisten a standard inflation needle (not included) with water or glycerin to prevent damage to the valve.
3. **Insert Needle:** Carefully insert the moistened needle straight into the valve. Avoid forcing the needle or inserting it at an angle.
4. **Inflate:** Using a hand pump (not included), slowly inflate the ball. The recommended pressure is typically printed near the valve, usually between 7-9 PSI (pounds per square inch). Do not overinflate.
5. **Check Pressure:** Use a pressure gauge (not included) to ensure the ball is inflated to the correct PSI. A simple bounce test can also be performed: when dropped from shoulder height, the ball should bounce back to waist height.

## 4. USAGE

The Spalding STORM 65-765Z No. 3 Basketball is designed for outdoor play and is also suitable as a sign ball or for toddlers. Its durable rubber construction and deep grooves provide a reliable grip for various activities.

- **Outdoor Play:** The robust rubber material is built to withstand the rigors of outdoor courts and surfaces.
- **Sign Ball:** Its size and surface make it suitable for autographs or display purposes.
- **Toddler Use:** The No. 3 size is appropriate for young children learning to play basketball.

## 5. MAINTENANCE AND CARE

Proper care will extend the life of your basketball.

- **Cleaning:** Wipe the ball with a damp cloth to remove dirt and grime. For stubborn marks, a mild soap solution can be used, followed by rinsing with a clean damp cloth. Avoid harsh chemicals or abrasive cleaners.
- **Storage:** Store the basketball in a cool, dry place away from direct sunlight and extreme temperatures. Avoid storing it near sharp objects or rough surfaces that could puncture or abrade the material.
- **Inflation:** Periodically check the air pressure and reinflate as needed to maintain optimal performance.

## 6. TROUBLESHOOTING

### Ball Loses Air Quickly

- **Check Valve:** Ensure the inflation needle was inserted correctly and did not damage the valve. A damaged valve may leak air.
- **Inspect for Punctures:** Examine the ball's surface for any visible punctures or cuts. Small leaks may be difficult to locate.
- **Submerge Test:** If a leak is suspected but not visible, inflate the ball and submerge it in water. Bubbles will indicate the location of the leak. If a leak is found, the ball may need to be replaced.

## 7. SPECIFICATIONS

| Attribute | Detail |
|-----------|--------|
