3. OPERATING INSTRUCTIONS

3.1 Tactile High-Speed, Low-Noise Mechanical Keys

The Logitech G710+ features quiet mechanical keys with superior tactile feedback, designed for faster response rates with less force. Non-clicking key switches and dampening rings under keycaps reduce distracting noise while providing gaming-grade responsiveness.

3.2 High-Performance Gaming Keys

- **110 Anti-Ghosting Keys:** Ensures that every keypress is registered accurately, even during intense gaming sessions with multiple simultaneous inputs.
- **26-Key Rollover:** Allows you to press almost any number of keys plus modifier keys (Control, Alt, Shift) in any order and get exactly what you entered.
- **Durable Performance:** Keys are tested for a long-life performance of up to 50 million keypresses.

3.3 Adjustable Dual-Zone Backlighting

The keyboard features adjustable white LED backlighting with four brightness levels (plus 'Off'). You can adjust the brightness of the WASD and arrow keys independently from the rest of the keyboard, allowing for easy key identification in low-light conditions.

3.4 Programmable G-keys

Six programmable G-keys are located on the left side of the keyboard. These keys can be configured with up to 18 unique functions per game (three macros per G-key) using the Logitech Gaming Software. This allows for single keypresses, complex macros, or intricate LUA scripts to be triggered precisely.

3.5 Instant Media Access and Game Mode

- **Dedicated Media Keys:** Convenient one-touch keys provide immediate control over volume, mute, and media playback.
- **Game/Desktop Mode:** A dedicated button allows you to quickly disable the Windows/Context Menu keys, preventing accidental interruptions during gameplay.

3.6 USB Pass-Through

The keyboard includes a built-in high-speed USB pass-through port. This allows you to quickly plug in a mouse, headset, or other USB device directly into the keyboard without needing to reach for your computer's USB ports.

4. MAINTENANCE

To ensure optimal performance and longevity of your Logitech G710+ keyboard, regular maintenance is recommended:

- **Cleaning:** Use a soft, lint-free cloth to wipe down the keyboard surface. For deeper cleaning, you may carefully remove keycaps using a keycap puller (not included) and clean underneath with compressed air.
- **Cable Management:** Ensure the USB cables are not kinked or under excessive strain.
- **Palm Rest:** Clean the removable palm rest with a damp cloth as needed.

5. TROUBLESHOOTING

If you encounter issues with your keyboard, consider the following basic troubleshooting steps:

- **No Power/Keys Not Responding:** Ensure both USB connectors are securely plugged into your computer. Try different USB ports.
- **Backlighting Issues:** Check the backlighting brightness levels using the dedicated buttons on the keyboard. Ensure the Logitech Gaming Software is installed and updated for full control.

- **G-keys Not Working:** Verify that the Logitech Gaming Software is installed and that macros are correctly configured and assigned to the G-keys.
- **Software Issues:** Reinstall the Logitech Gaming Software from the official Logitech website.
