Pro Taper FC-19 B BLUE

Pro Taper Molded 8-inch Handlebar Pad Instruction Manual

Model: FC-19 B Blue

INTRODUCTION

This manual provides essential information for the proper installation, use, and maintenance of your Pro Taper Molded 8-inch Handlebar Pad. Please read this manual thoroughly before installation to ensure correct application and to maximize the lifespan of the product.

SAFETY INFORMATION

- Ensure the handlebar pad is securely installed to prevent movement during operation.
- Regularly inspect the pad for wear, tear, or damage. Replace immediately if any damage is observed.
- This product is designed to provide impact absorption in the event of contact with the handlebars. It is not a substitute for proper riding gear or safe riding practices.
- Keep out of reach of small children.

PACKAGE CONTENTS

- 1 x Pro Taper Molded 8-inch Handlebar Pad (FC-19 B Blue)

SETUP AND INSTALLATION

The Pro Taper Molded Handlebar Pad is designed for straightforward installation on most standard handlebars.

1. **Prepare the Handlebar:** Ensure the handlebar area where the pad will be placed is clean and free of debris.
2. **Position the Pad:** Align the molded pad over the crossbar or center section of your handlebar. The pad is designed to fit snugly.
3. **Secure the Pad:** The pad typically features a slit or opening along its underside. Gently spread the pad open and fit it around the handlebar. Ensure the pad is centered and fully encloses the handlebar. Some pads may include Velcro straps or zip ties for additional security; if present, use them to firmly attach the pad.

4. **Final Check:** Once installed, gently tug on the pad to ensure it is securely fastened and does not rotate or slide freely.

Image: Pro Taper Molded 8-inch Handlebar Pad (FC-19 B Blue).

This image displays the blue Pro Taper molded handlebar pad. The pad is cylindrical with a length of 8 inches, featuring the "PROTAPER" logo prominently displayed in yellow and white lettering against a black background strip, bordered by yellow, on the blue surface. The pad is designed to fit over a motorcycle or ATV handlebar crossbar for rider protection.

USAGE

The Pro Taper Molded Handlebar Pad is a protective accessory designed to cover the handlebar crossbar, reducing the risk of injury from impact during riding. Once installed, no further operational steps are required. Its primary function is passive protection.

MAINTENANCE

- **Cleaning:** Wipe the pad clean with a damp cloth and mild soap as needed. Avoid harsh chemicals or abrasive cleaners, which can damage the material or fade the color.
- **Inspection:** Periodically inspect the pad for any signs of wear, cracks, tears, or discoloration. Pay close attention to the attachment points and the integrity of the foam core.
- **Storage:** If removed, store the pad in a cool, dry place away from direct sunlight to prevent material degradation.
- **Replacement:** Replace the handlebar pad if it shows significant signs of wear, damage, or if its protective qualities appear compromised.

TROUBLESHOOTING

- **Pad is Loose:**
Solution: Re-check the installation. Ensure the pad is fully seated around the handlebar. If applicable, tighten any securing straps or zip ties. If the pad is old or stretched, it may need replacement.
- **Pad is Damaged:**
Solution: A damaged pad may not provide adequate protection. Replace the pad immediately.
