3. SETUP AND INSTALLATION

Proper installation is crucial for the performance and longevity of your washing machine.

3.1 Unpacking

Carefully remove all packaging materials, including the transport bolts at the rear of the machine. Retain packaging for future transport if needed.

3.2 Location

Open the door and load laundry loosely into the drum. Do not overfill; ensure there is enough space for the clothes to tumble freely. Close the door firmly.

4.2 Adding Detergent and Additives

Pull out the detergent dispenser drawer. Add the appropriate amount of detergent to the main wash compartment and any fabric softener or pre-wash detergent to their respective compartments. Refer to detergent packaging for dosage recommendations.

Depending on the selected program, you may be able to adjust temperature, spin speed, or add extra options like pre-wash or extra rinse using the touch controls on the panel.

Regular maintenance ensures optimal performance and extends the lifespan of your washing machine.

5.1 Cleaning the Detergent Dispenser

Periodically remove and clean the detergent dispenser drawer under running water to remove any detergent residue.

5.2 Cleaning the Drum

Run a maintenance wash cycle (e.g., a hot wash with no laundry and a descaling agent) regularly to clean the drum and remove any build-up.

5.3 Cleaning the Filter

Locate the drain pump filter, usually at the bottom front of the machine. Open the cover, place a shallow container underneath to catch water, and carefully unscrew the filter. Clean any lint or debris and reinsert it securely.
