Hyla GST Water Filtration Vacuum User Manual

Model: Hyla GST

INTRODUCTION

The Hyla GST is a state-of-the-art water filtration vacuum cleaner designed to provide a superior cleaning experience by purifying the air and effectively removing dust and debris. Its innovative water basin system ensures that collected particles are trapped in water, preventing them from re-entering the air.

Key features include:

- Water filtration for purified and dust-free air.
- LED water basin lighting for visibility during operation.
- Brilliant fluorescent lighting on the power nozzle for enhanced cleaning visibility.
- Includes an extra wet/dry hose and a bare floor tool for versatile cleaning.
- Superior pick-up power, especially effective on pet hair.

PRODUCT COMPONENTS

Image: The Hyla GST water filtration vacuum system, showcasing the main unit, two different floor nozzles, two flexible hoses, and a small brush attachment. All components are black and silver, laid out on a light-colored floor against a white wall.

The Hyla GST system comes with several components designed for comprehensive cleaning:

- **Main Canister Unit:** The core of the system, housing the motor and water basin. Features bright blue lighting that illuminates the water basin during use, allowing you to see the water fill and the cleaning process. The new canister design is stronger and easier to empty.
- **Power Nozzle:** Equipped with brilliant fluorescent lighting, this nozzle is designed for effective cleaning of carpets and other floor types.
- **Wet/Dry Hose:** An additional hose for specialized wet and dry cleaning tasks.
- **Bare Floor Tool:** A dedicated attachment for efficient cleaning of hard floor surfaces.
- **Other Accessories:** Includes various brushes and tools for detailed cleaning.

SETUP

1. **Unpacking:** Carefully remove all components from the packaging. Retain packaging for future storage or transport.
2. **Water Basin Preparation:** Open the main canister unit and fill the water basin with the recommended amount of clean water. Ensure the water level is between the minimum and maximum indicators.
3. **Component Assembly:**
 - Attach the desired hose (standard or wet/dry) to the main canister unit. Ensure a secure connection.
 - Connect the appropriate cleaning tool (power nozzle, bare floor tool, or other accessories) to the end of the hose.
4. **Power Connection:** Plug the power cord into a suitable electrical outlet. The unit is corded and operates on a single

power level.

OPERATING INSTRUCTIONS

The Hyla GST is designed for efficient cleaning of various surfaces, particularly bare floors and general home use. Its water filtration system ensures that dirt and allergens are trapped, providing cleaner air.

1. **Power On:** Press the power button on the main canister unit to start the vacuum. The LED lighting in the water basin will illuminate, indicating operation.
2. **Cleaning Surfaces:**
 - For carpets and rugs, use the power nozzle. Its fluorescent lighting will help illuminate the cleaning path.
 - For hard floors, attach the bare floor tool.
 - Move the cleaning tool slowly and steadily over the surface to allow the vacuum to effectively pick up debris. The Hyla never loses power as it fills, ensuring consistent suction.
3. **Pet Hair:** The Hyla GST offers superior pick-up power on pet hair, making it ideal for homes with pets.
4. **Air Purification:** As you vacuum, the water filtration system cleans the air, trapping dust and allergens. This process also ensures the unit never retains odors.
5. **Monitoring Water Basin:** Observe the water basin through the illuminated display. When the water becomes visibly dirty, it's time to empty and refill.
6. **Power Off:** Once cleaning is complete, press the power button to turn off the unit and unplug it from the electrical outlet.

MAINTENANCE

Regular maintenance ensures the optimal performance and longevity of your Hyla GST vacuum.

1. **Emptying and Cleaning the Water Basin:**
 - After each use, carefully detach the water basin from the main unit.
 - Dispose of the dirty water.
 - Rinse the water basin thoroughly with clean water. The new canister is designed to be easier to empty and clean.
 - Allow the basin to air dry completely before reassembling or storing to prevent odor buildup. The Hyla GST is designed to never retain odors.
2. **Filter Maintenance:** The Hyla GST uses a cartridge filter type. Refer to the specific filter replacement guidelines provided with your unit for optimal air filtration. Regularly check the filter for debris and clean or replace as recommended.
3. **Cleaning Attachments:** Wipe down hoses, nozzles, and other attachments with a damp cloth as needed to remove dust and debris.
4. **Storage:** Store the vacuum and its accessories in a clean, dry place away from direct sunlight and extreme temperatures.

TROUBLESHOOTING

Specific troubleshooting steps are not provided in the available product information. For issues encountered during operation, please consider the following general checks:

- Ensure the power cord is securely plugged into a working electrical outlet.
- Check that the water basin is correctly seated and filled to the appropriate level.

- Verify that all hoses and attachments are securely connected to prevent loss of suction.
- Inspect hoses and nozzles for any blockages and clear them if found.
