## Panasonic EW1211W

# Panasonic Dentacare EW1211W Oral Irrigator User Manual

Model: EW1211W

## INTRODUCTION

Thank you for choosing the Panasonic Dentacare EW1211W Oral Irrigator. This device is designed to enhance your daily oral hygiene routine by effectively removing food debris and plaque from hard-to-reach areas, promoting healthier gums and a cleaner mouth. Please read this manual thoroughly before use to ensure safe and optimal operation.

## SAFETY INSTRUCTIONS

To ensure safe operation and prevent injury or damage, please observe the following safety guidelines:

- **Medical Conditions:** Avoid using this device if you have specific medical conditions. Consult your dentist or doctor if you are unsure.
- **Children:** Keep the device out of reach of children.
- **Electrical Safety:** Follow all electrical safety instructions, as the device is rechargeable and battery-powered. Do not immerse the charging unit in water.

- **Water Temperature:** Do not use water hotter than 40°C (104°F) in the reservoir.
- **Additives:** Only use water or recommended mouthwash in the reservoir. Do not use essential oils, abrasive cleaning agents, or other chemicals that could damage the device.

## PRODUCT OVERVIEW

The Panasonic Dentacare EW1211W oral irrigator features a compact design with multiple settings for personalized oral care.

### Key Features:

- **Adjustable Water Pressure:** Three pressure modes (Jet, Air-In Regular, Air-In Soft) to suit individual needs.
- **Two Water Jet Types:** Powerful Jet for targeted cleaning and Gentle Air-In for gum massage.
- **Removable Water Tank:** 130 ml capacity, easily detachable for refilling and cleaning.
- **Waterproof Design (IPX7):** Allows for easy cleaning under running water.

## SETUP

- 1. Charging the Device:** Ensure the device is fully charged before its first use. Place the irrigator on its charging base. The charging indicator will illuminate. A full charge typically takes approximately 8 hours.

Image: The Panasonic Dentacare EW1211W oral irrigator securely placed on its compact charging base.

- 2. Filling the Water Tank:** The water tank is fully removable for easy filling. Open the tank cover and fill the 130 ml reservoir with lukewarm water or a dentist-recommended mouthwash. Close the cover securely.

- 3. Attaching the Nozzle:** Insert the nozzle firmly into the opening on the top of the irrigator until it clicks into place.
- 4. Selecting Pressure Mode:** Before turning on the device, select your desired pressure mode (Jet, Air-In Regular, or Air-In Soft) using the 'SELECT' button.

## OPERATING INSTRUCTIONS

- 1. Positioning:** Lean over a sink and place the nozzle tip into your mouth, aiming it at your gumline at approximately a 90-degree angle.
- 2. Starting the Device:** Press the 'ON/OFF' button to start the water flow.
- 3. Cleaning Technique:** Slowly guide the nozzle along your teeth and gums, focusing on the spaces between teeth, gum pockets, and around orthodontic appliances if applicable. Allow the water to flow into the sink.

5. **Nozzle Rotation:** The nozzle can be rotated to easily reach all areas of your mouth.

Image: A hand rotating the nozzle of the Panasonic Dentacare EW1211W oral irrigator, illustrating its adjustable design for reaching all areas of the mouth.

6. **Duration:** Continue until the water tank is empty, which typically provides about 35 seconds of operation in Air-In Regular mode. Refill if further cleaning is desired.
7. **Turning Off:** Press the 'ON/OFF' button to stop the device.

## MAINTENANCE AND CLEANING

Regular cleaning and maintenance will prolong the life of your oral irrigator and ensure hygienic use.

- **After Each Use:**
  - Empty any remaining water from the tank.
  - Rinse the device with warm water and a mild detergent.
  - To prevent bacterial growth, avoid water stagnation in the reservoir.
- **Nozzle Replacement:** Replace the nozzle every 3-6 months, or more frequently if it appears damaged or worn.

Image: A hand cleaning the detachable nozzle of the Panasonic Dentacare EW1211W oral irrigator, emphasizing the importance of regular hygiene.

- **Storage:** Store the device in a dry and well-ventilated area to prevent mold and mildew.
- **Waterproof Cleaning:** The device is IPX7 waterproof, allowing it to be safely rinsed under running water for thorough cleaning.

## TROUBLESHOOTING

If you encounter any issues with your Panasonic Dentacare EW1211W oral irrigator, please refer to the following common solutions:

Problem	Possible Cause	Solution
Device does not turn on.	Battery is low or depleted.	Place the device on the charging base and allow it to charge fully.
Weak water pressure.	Water tank is low or empty; nozzle is clogged; selected mode is "Air-In Soft".	Refill the water tank. Clean the nozzle. Select a stronger mode like "Jet" or "Air-In Regular".
Water leaks from the device.	Water tank cover is not securely closed; nozzle is not properly attached.	Ensure the water tank cover is tightly closed. Re-attach the nozzle firmly until it clicks.

If the problem persists after attempting these solutions, please contact Panasonic customer support for further assistance.
