## Philips HP6519/01

# Philips HP6519/01 Epilator Instruction Manual

## INTRODUCTION

---

This manual provides essential information for the safe and effective use of your Philips HP6519/01 Epilator. Please read these instructions carefully before first use and keep them for future reference. Following these guidelines will help you achieve optimal results and maintain the longevity of your device.

## PRODUCT FEATURES

---

The Philips HP6519/01 Epilator is designed for efficient and comfortable hair removal, offering several features to enhance your experience:

- **Skin Care System:** Protects the skin against pulling and maximizes hygiene.
- **Hypo-allergenic and Silver-ion Discs:** Advanced technology for gentle hair removal and radiant skin.
- **Massage Attachment:** Gently vibrating massage bar stimulates and soothes the skin for a more pleasant epilation process.
- **Sensitive Area Cap:** Specifically adapted for more sensitive skin, allowing for gentle epilation in delicate areas.
- **Gentle Tweezing Discs:** Designed to remove hair without pulling the skin.
- **Fully Washable Epilation Head:** Ensures optimal hygiene and easy cleaning under running water.
- **Two Speed Settings:** Speed 1 for extra gentle epilation and Speed 2 for extra efficient epilation, allowing you to choose according to your needs.

- **Wet and Dry Usage:** Can be used on dry skin or in the shower for added comfort.
- **Exfoliation Brush:** Unique Philips design with hypo-allergenic bristles for optimal hygiene, suitable for wet & dry use.

## SETUP AND CHARGING

---

Your Philips HP6519/01 Epilator is designed for cordless operation for up to 40 minutes. It can also be used with the power cable if the battery runs out. To ensure your epilator is always ready for use, follow these charging instructions:

1. **Check Battery Status:** If the LED light flashes red, the battery is low and you have only a few minutes of power left. Once these minutes are up, the light will stay red continuously, indicating it's time to charge.
2. **Connect Charger:** Simply plug the power supply into a wall socket and connect the epilator to the power supply.
3. **Charging Indicator:** The white LED light will flash to show that the epilator is charging.
4. **Full Charge:** When the battery is fully charged, the white light stays on continuously for approximately 20 minutes and then goes out.
5. **Travel Compatibility:** Philips epilator power plugs automatically select the correct voltage, making them suitable for travel. Ensure the plug fits the local socket.

## OPERATING INSTRUCTIONS

---

### Skin Preparation

Proper skin preparation is crucial for effective and comfortable epilation:

- **Exfoliation:** The day before epilation, gently exfoliate your body. This removes dead skin cells, revealing softer, more radiant skin and helping to reduce ingrown hairs.
- **Clean Skin:** For best results, epilate after taking a shower to ensure your skin is clean.
- **Dry Skin:** Always ensure your skin is completely dry after showering before beginning dry epilation.

### Epilation Technique

Follow these steps for efficient hair removal:

1. **Turn On:** Switch on the epilator.
2. **Glide Against Hair Growth:** Gently glide the epilator over your skin in steady, slow movements, always moving against the direction of hair growth.
3. **Maintain Contact:** Ensure the epilator head is held straight for good skin contact.
4. **Light Pressure:** You do not need to use much pressure; the epilator is designed to do the work for you.
5. **Stretch Skin:** For sensitive areas or to ensure all hairs are captured and to reduce discomfort, gently stretch your skin a little.
6. **Regular Epilation:** Regular epilation helps reduce pain over time as hair grows in cycles, leading to fewer hairs growing back simultaneously.

## Speed Settings

Your epilator features two speed settings:

- **Speed 1:** For extra gentle epilation, ideal for sensitive areas or first-time users.
- **Speed 2:** For extra efficient epilation, suitable for larger areas or when you need faster results.

Choose the speed that best suits your comfort level and the body part you are epilating.

## CLEANING AND MAINTENANCE

Maintaining your epilator's cleanliness is essential for hygiene and optimal performance:

1. **Clean After Each Use:** Always clean the epilator head after each use to remove all hairs and debris.
2. **Washable Head:** Philips epilators are designed for quick and easy cleaning. Simply detach the epilation head and rinse it under running water.
3. **Remove Hairs:** While rinsing, roll the epilation head with your finger to ensure all hairs are thoroughly removed.
4. **Dry Thoroughly:** After washing, dry the epilation head completely before reattaching or storing.
5. **Use Cleaning Brush:** Use the included cleaning brush to remove any stubborn hairs or debris from the epilator head and body.
6. **Personal Use:** For hygiene purposes, do not share your epilation head with anyone else.
