

Contigo West Loop 2.0

Contigo West Loop 2.0 Stainless Steel 24oz Travel Mug User Manual

Model: West Loop 2.0 (2074786)

1. INTRODUCTION

Welcome to your Contigo West Loop 2.0 Stainless Steel Travel Mug. This manual provides essential information for the proper use, care, and maintenance of your new travel mug.

The Contigo West Loop Travel Mug is designed for on-the-go individuals, featuring high-grade 18/8 stainless steel construction and Thermalock double-walled vacuum insulation. This technology keeps beverages hot for up to 7 hours and cold for up to 20 hours. The patented AUTOSEAL lid prevents spills and leaks, and its one-handed operation makes it convenient for daily use.

2. INITIAL SETUP

2.1 Unpacking

Carefully remove the travel mug from its packaging. Retain all packaging materials for future reference or if the product needs to be returned.

2.2 First Use Cleaning

Before first use, wash all parts of the travel mug thoroughly.

- Unscrew the lid from the mug body.
- Open the AUTOSEAL mechanism on the lid (refer to 'Lid Operation' for details).
- Wash the lid and mug body with warm, soapy water.
- Rinse thoroughly.
- Allow all parts to air dry completely before reassembling.

3. OPERATING INSTRUCTIONS

3.1 Filling Your Mug

Unscrew the lid from the mug body. Fill the mug with your desired beverage, ensuring not to overfill. Leave approximately 1 inch (2.5 cm) of space from the top rim to prevent spills when attaching the lid.

Image: The Contigo West Loop Travel Mug, ready to be filled.

3.2 Securing the Lid

Align the lid with the mug body and screw it on tightly until secure. Ensure the AUTOSEAL button is facing forward for comfortable one-handed operation.

3.3 AUTOSEAL Technology

The AUTOSEAL lid automatically seals between sips. To drink, press the AUTOSEAL button. Release the button to seal the mug.

3.4 Locking Feature

For added security during transport, slide the lock switch located next to the AUTOSEAL button to the locked position. This prevents accidental pressing of the button.

3.5 Temperature Retention

Your Contigo West Loop mug features Thermalock vacuum insulation:

- Keeps beverages hot for up to 7 hours.
- Keeps beverages cold for up to 20 hours.

4. CARE AND MAINTENANCE

4.1 Cleaning the Lid

The AUTOSEAL lid is designed for easy cleaning. It pivots completely open for thorough washing.

The lid is top-rack dishwasher safe. For hand washing, use warm, soapy water and a brush to reach all areas.

4.2 Cleaning the Body

The stainless steel body should be hand washed with warm, soapy water. Do not place the stainless steel body in the dishwasher as it may affect the vacuum insulation.

4.3 Drying and Storage

Ensure all parts are completely dry before reassembling and storing to prevent odor or mildew. Store with the lid slightly ajar to allow air circulation.

5. TROUBLESHOOTING

5.1 Leaks or Spills

- Ensure the lid is screwed on tightly and correctly aligned.
- Verify the AUTOSEAL button is fully released and the lock switch is engaged if desired.
- Check the lid gasket for any damage or misalignment.

5.2 Poor Temperature Retention

- Ensure the lid is securely fastened.
- Avoid opening the mug unnecessarily, as this releases heat/cold.
- Pre-heat or pre-chill the mug with hot or cold water for 5-10 minutes before adding your beverage for optimal performance.

5.3 Difficulty Cleaning

- Ensure the lid mechanism is fully pivoted open for access to all internal components.
- Use a small brush for hard-to-reach areas.
- For stubborn stains or odors, a mixture of baking soda and water can be used.

6. SPECIFICATIONS

Feature	Detail
---------	--------

Feature	Detail
