Oreck LWPK6DW

Oreck Advanced Filtration Vacuum Bags for Magnesium Upright

Model: LWPK6DW

Brand: Oreck

PRODUCT OVERVIEW

The Oreck Advanced Filtration Vacuum Bags are designed specifically for use with the Oreck Magnesium upright vacuum cleaner. This pack contains six high-quality replacement bags, each engineered to provide advanced filtration and an 8-quart capacity for efficient dust collection.

Each bag features a Saniseal automatic closing dust seal, which helps to contain dust and debris securely within the bag, preventing it from escaping back into your home environment during disposal.

INSTALLATION INSTRUCTIONS

Follow these steps to correctly install a new Oreck Advanced Filtration Vacuum Bag into your Oreck Magnesium upright vacuum:

1. **Power Off:** Ensure your Oreck Magnesium vacuum cleaner is unplugged from the power outlet before beginning installation.
2. **Access Bag Compartment:** Locate and open the vacuum bag compartment door on your Oreck Magnesium upright. Refer to your vacuum's user manual if you are unsure of its location.
3. **Remove Old Bag (if applicable):** If a used bag is present, carefully remove it. The Saniseal feature will automatically close the bag opening to minimize dust exposure. Dispose of the used bag responsibly.
4. **Insert New Bag:** Take a new Oreck Advanced Filtration Vacuum Bag. Align the bag's collar with the bag dock inside the compartment.

5. **Secure Bag:** Gently push the bag's collar firmly into the bag dock until it snaps securely into place. Ensure there are no gaps to prevent dust leakage.
6. **Close Compartment:** Close the vacuum bag compartment door. Ensure it latches completely.
7. **Ready for Use:** Your Oreck Magnesium upright vacuum is now ready for use with the new bag installed.

OPERATING WITH ORECK VACUUM BAGS

Once installed, the Oreck Advanced Filtration Vacuum Bags work seamlessly with your Oreck Magnesium upright vacuum. The advanced filtration system helps capture fine dust particles and allergens, contributing to cleaner air in your home.

The 8-quart capacity allows for extended cleaning sessions before a bag change is required. For optimal performance, ensure the bag is properly seated and the compartment door is closed before operating the vacuum.

MAINTENANCE AND REPLACEMENT

Regular replacement of your vacuum bag is essential for maintaining the cleaning efficiency and filtration performance of your Oreck Magnesium upright vacuum.

- **When to Replace:** Replace the vacuum bag when it is full, or when you notice a decrease in suction power. A full bag can restrict airflow and reduce cleaning effectiveness.
- **Disposal:** When removing a full bag, the Saniseal automatic closing dust seal will activate, trapping dust and debris inside. This minimizes contact with dust during disposal.
- **Storage:** Store unused bags in a cool, dry place away from direct sunlight to preserve their material integrity.

TROUBLESHOOTING

If you encounter issues with your Oreck Advanced Filtration Vacuum Bags, consider the following:

- **Bag Not Fitting:** Ensure you are using the correct model of vacuum bag (LWPK6DW) designed for the Oreck Magnesium upright. Verify that the bag's collar is correctly aligned and fully inserted into the bag dock until it snaps.
- **Reduced Suction:** Check if the vacuum bag is full and requires replacement. Also, ensure the bag is installed correctly and the compartment door is fully closed and sealed.
- **Dust Leakage:** This typically indicates an improperly installed bag or a damaged bag. Re-install the bag, ensuring a tight seal. If the bag is damaged, replace it immediately.

SPECIFICATIONS

Model Number	LWPK6DW
Compatible Devices	Oreck Magnesium Upright Vacuum Cleaner
Material	Advanced Filtration Material
Capacity	8 Quarts
Number of Items	6 Bags per Pack
Item Dimensions (Pack)	16.1 x 2.5 x 9.1 inches
Item Weight (Pack)	8.01 Ounces
