Rolkolsen R-10

Rolkolsen R-10 HD 5.1 Home Theater System User Manual

Model: R-10

INTRODUCTION

This manual provides detailed instructions for the setup, operation, and maintenance of your Rolkolsen R-10 HD 5.1 Home Theater System. Please read this manual thoroughly before using the product to ensure proper functionality and safety.

PACKAGE CONTENTS

Upon opening the package, verify that all components are present:

- 1 x Subwoofer
- 5 x Satellite Speakers (Front Left, Front Right, Center, Surround Left, Surround Right)
- Speaker Cables
- Remote Control
- User Manual (this document)

Image: All components of the Rolkolsen R-10 HD 5.1 Home Theater System, including the subwoofer, satellite speakers, and cables, neatly arranged after unboxing.

SETUP

1. Unpacking and Placement

Carefully remove all components from the packaging. Place the subwoofer in a central location, ideally near your television or main listening area. Position the satellite speakers around your listening position for optimal surround sound experience.

2. Connecting the Speakers

Connect each satellite speaker to the corresponding output on the subwoofer using the provided speaker cables. Ensure correct polarity (positive to positive, negative to negative) for each connection.

- **Front Left/Right:** Position these speakers to the left and right of your television.
- **Center:** Place the center speaker directly above or below your television.
- **Surround Left/Right:** Position these speakers to the sides or slightly behind your main listening position.

3. Power Connection

Connect the subwoofer's power cord to a standard electrical outlet. Ensure the power switch on the subwoofer is in the OFF position before plugging it in.

OPERATING INSTRUCTIONS

1. Powering On/Off

Flip the power switch on the subwoofer to the ON position. The system will enter standby mode. Use the remote control or the power button on the subwoofer to fully power on the system.

2. Volume Control

Adjust the master volume using the 'Volume +' and 'Volume -' buttons on the remote control. Individual speaker levels can be adjusted through the system's menu (if available) for fine-tuning the sound balance.

3. Input Selection

Use the 'Input' or 'Source' button on the remote control to cycle through available audio inputs (e.g., AUX, Optical, Coaxial, etc.). Refer to your television or audio source manual for compatible output options.

4. Sound Modes

The R-10 system supports 5.1 digital surround sound. Depending on your audio source, the system will automatically detect and process the appropriate sound format. Some systems may offer different sound modes (e.g., Stereo, Movie, Music) which can be selected via the remote control.

MAINTENANCE

To ensure the longevity and optimal performance of your Rolkolsen R-10 system, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to wipe down the speaker cabinets and subwoofer. Avoid using liquid cleaners or abrasive materials.
- **Ventilation:** Ensure adequate airflow around the subwoofer and speakers. Do not block ventilation openings.
- **Environment:** Keep the system away from direct sunlight, heat sources, and excessive moisture.
- **Cables:** Periodically check all cable connections to ensure they are secure and free from damage.

TROUBLESHOOTING

Problem	Possible Cause	Solution
No Sound	Power not connected; Incorrect input selected; Volume too low; Speaker cables loose.	Check power connection; Select correct input; Increase volume; Re-secure speaker cables.
Distorted Sound	Volume too high; Poor audio source quality; Damaged speaker cable.	Reduce volume; Try a different audio source; Inspect and replace damaged cables.
Remote Control Not Working	Dead batteries; Obstruction between remote and system; Remote not pointed correctly.	Replace batteries; Remove obstructions; Point remote directly at the system's sensor.

SPECIFICATIONS

HD 5.1 Home Theater R-10
