Glideaway LB44

Glideaway LB44 Low Profile Bed Frame Instruction Manual

Model: LB44
Brand: Glideaway

Introduction

Thank you for choosing the Glideaway LB44 Low Profile Bed Frame. This frame is designed to provide a sturdy and reliable foundation for your mattress and box spring, while also lowering the overall bed height by approximately 3.5 inches. It is compatible with Queen, King, and California King size beds, offering versatility and a modern aesthetic. Please read this manual carefully before assembly and use to ensure proper setup and long-term satisfaction.

Safety Information

Your safety is paramount. Please adhere to the following guidelines:

- Exercise **caution around sharp edges** during assembly to prevent injury.
- Ensure **proper and complete assembly** of all components to prevent instability and potential collapse.
- Do not overload the bed frame beyond the combined weight capacity of your mattress and box spring.
- Regularly check all bolts and connections to ensure they remain tight and secure.
- Keep small parts away from children during assembly.

Components List

Before beginning assembly, verify that all parts are present and undamaged. If any parts are missing or damaged, please contact customer support.

- Side Rails (2)
- Center Support Bar(s)
- Cross Supports
- Legs/Feet with plastic bumpers

- Headboard Attachment Brackets (2)
- Hardware Pack (bolts, nuts, washers, wrench)

Setup and Assembly

Assembly is required for this bed frame. While instructions are typically provided on the product packaging, here are general steps to guide you:

1. Unpack all components and lay them out on a clean, flat surface. Identify each part using the components list.
2. Attach the headboard attachment brackets to the designated end of the side rails, if not pre-attached.
3. Connect the two side rails using the provided cross supports. Ensure the keyhole slots align correctly and the connections are secure.
4. Insert and secure the center support bar(s) into their designated slots or brackets.
5. Attach all legs/feet to the frame. Ensure the plastic bumpers are firmly in place to protect your flooring.
6. Tighten all bolts and connections using the provided wrench. Double-check all connections for stability.
7. Carefully move the assembled frame to its desired location.

This image displays the complete Glideaway LB44 Low Profile Bed Frame. It is a black metal frame designed to support a mattress and box spring, featuring a low-profile design to reduce overall bed height. The frame includes side rails, cross supports, and multiple legs for stability. Headboard attachment brackets are visible at one end.

Operating Instructions

The Glideaway LB44 bed frame is designed for straightforward use:

- Place your box spring directly onto the assembled bed frame.
- Position your mattress on top of the box spring.
- The frame is adjustable to fit Queen, King, and California King size box springs and mattresses. Ensure your box spring is centered and fully supported by the frame.
- The low-profile design will reduce the overall height of your bed, making it easier to get in and out, especially with thicker modern mattresses.

Maintenance

To ensure the longevity and continued stability of your bed frame, follow these maintenance tips:

- Periodically (e.g., every 6 months) check all bolts and connections to ensure they are tight. **Loose connections can lead to instability and noise.**
- Clean the metal frame with a soft, damp cloth. Avoid abrasive cleaners or harsh chemicals that could damage the finish.
- Do not drag the bed frame across the floor, especially on carpet, as this can damage the legs or flooring. Lift and move it carefully.

Troubleshooting

If you encounter issues with your Glideaway LB44 bed frame, consider the following:

Problem	Possible Cause	Solution
Frame is wobbly or unstable.	Loose bolts or improper assembly.	Ensure all bolts are tightened securely. Re-check assembly steps to confirm all parts are correctly connected.
Frame does not fit my mattress/box spring (e.g., California King).	Incorrect adjustment or specific foundation dimensions.	The frame is designed to be adjustable. Ensure the cross supports are extended or retracted to the correct length for your bed size. If issues persist, contact customer support.
Missing parts upon arrival.	Packaging error or transit damage.	Do not attempt to assemble. Contact the retailer or Glideaway customer support immediately with your purchase details.
Bed frame makes noise (squeaking).	Loose connections or friction between metal parts.	Tighten all bolts. If noise persists, disassemble and reassemble, ensuring all connections are flush. A small amount of lubricant (e.g., silicone spray) can be applied to contact points if necessary, but avoid getting it on the floor.

Specifications

- **Model:** LB44
- **Brand:** Glideaway
- **Compatible Sizes:** Queen, King, California King
- **Product Dimensions (King):** 75"L x 9"W x 4"H (Note: Dimensions may vary slightly based on adjustment for different bed sizes)
- **Color:** Black
- **Finish Type:** Unfinished
- **Included Components:** Headboard attachment brackets, Slats (cross supports)
- **Assembly Required:** Yes
- **Ground To Item Distance:** Approximately 4.5 Inches
- **UPC:** 702840614279
