Zojirushi Stainless Steel Food Jar Instruction Manual

Brand: Zojirushi

Model: SW-EAE35AB

1. PRODUCT OVERVIEW

Zojirushi, a brand renowned for its high-quality vacuum insulated products since 1918, presents the Stainless Steel Food Jar. This vacuum-insulated food jar is designed to keep foods and beverages hot or cold for extended periods.

The Zojirushi Stainless Steel Food Jar, 12 Ounces, Aqua Blue.

This durable and sanitary 18/8 stainless steel food jar will not rust, tarnish, or stain, and will not leak harmful chemicals. The interior is polished stainless steel with a nonstick coating, ensuring it is neutral to taste and smell. Its tight-fitted lid features a gasket that seals to minimize leaks and maximize heat retention. A unique lid design includes a vent to release internal pressure, making the lid easier to open when the food jar contains hot foods or beverages. The wide opening of 2.5 inches (approximately 7 cm) facilitates easy filling, cleaning, and allows users to eat directly from the jar.

2. KEY FEATURES

- Eliminates the use of wasteful disposable containers, or the use of a microwave or refrigerator.
- Dimples on the lid make it easier to grab and open.
- Clear-coated finish reduces fingerprints and makes cleanup easy.
- BPA-free container.
- Good for hot meals, soups, oatmeal, cold desserts and beverages, and more.
- Durable and sanitary 18/8 stainless steel construction.
- Polished stainless steel interior with a nonstick coating, neutral to taste and smell.
- Tight-fitted lid with gasket to minimize leaks and maximize temperature retention.

- Unique lid with a vent for pressure release.
- Wide opening (2.5 inches / 7 cm) for easy filling, cleaning, and direct eating.

The Zojirushi food jar is designed for both hot and cold contents.

3. INITIAL SETUP

Before first use, thoroughly wash all parts of the food jar with warm water and mild dish soap. Rinse well and dry completely.

For best results with hot foods, preheat the jar by filling it with boiling water for 5-10 minutes, then empty. For cold foods, pre-chill with cold water. This step significantly improves temperature retention.

4. OPERATING INSTRUCTIONS

4.1 For Hot Foods/Beverages

Fill the preheated jar with your desired hot food or beverage. Ensure the lid is securely tightened to maintain the temperature effectively.

Preheating the food jar with hot water helps maintain the temperature of your food for longer.

4.2 For Cold Foods/Beverages

Fill the pre-chilled jar with your cold food or beverage. Securely tighten the lid to preserve its coldness.

4.3 Cooking Rice (or similar items)

This food jar can be used for 'cooking' rice or other grains using residual heat. Follow these steps:

1. Measure 1/3 cup of rice.
2. Add boiling water to the rice in the jar for a quick rinse, then drain the water.
3. Add 1/2 cup of fresh boiling water to the rice.
4. Securely close the lid.
5. Allow to sit for at least 1.5 hours. The hotter the water, the faster the cooking process.

The food jar is ideal for keeping various meals, like soup, warm.

4.4 Opening the Lid

The lid features a unique vent mechanism to release pressure, especially when containing hot contents. Press the small button on the underside of the lid to release pressure before twisting to open.

The dimpled lid design provides an easy grip for opening and closing.

The lid can be easily removed for filling and cleaning.

5. CARE AND MAINTENANCE

5.1 Cleaning Instructions

This food jar is **hand wash only** and is not dishwasher safe. Use warm water and mild dish soap. The wide opening makes it easy to clean the interior thoroughly.

The wide opening allows for easy access to clean the interior of the jar.

The gasket and other lid components can be removed for thorough cleaning. Ensure all parts are completely dry before reassembling to prevent odors or mold buildup.

5.2 Storage

Store the food jar with the lid slightly ajar to allow air circulation and prevent any lingering odors.

6. TROUBLESHOOTING

6.1 Food Not Staying Hot/Cold

- Ensure the lid is securely tightened.
- Verify the gasket is properly seated and not damaged.
- Pre-heating (for hot) or pre-chilling (for cold) the jar is crucial for optimal temperature retention.
- Avoid opening the jar frequently, as this releases heat/cold.

The vacuum insulation layer is key to maintaining the temperature of contents.

6.2 Lid Difficult to Open

- Press the pressure release button on the underside of the lid before attempting to twist it open, especially with hot contents.

7. PRODUCT SPECIFICATIONS

Specification	Detail
Product Dimensions	3.63"L x 3.63"W x 5"H
Capacity	12 Fluid Ounces (350 Milliliters)
Material	Stainless Steel (18/8), BPA Free
Color	Aqua Blue
Closure Type	Screw
Special Feature	Leak Resistant
Product Care Instructions	Hand Wash Only
Is Dishwasher Safe	No
Is Microwaveable	No
Item Weight	10 ounces
Item Model Number	SW-EAE35AB
UPC	798837703460
