2. SETUP

2.1. Battery Installation

Before using your keyboard and mouse, you need to install the included batteries.

1. **For the Keyboard:** Locate the battery compartment on the underside of the keyboard. Open the cover and insert two AAA batteries, ensuring correct polarity (+/-). Close the battery compartment cover.
2. **For the Mouse:** Locate the battery compartment on the underside of the mouse. Open the cover and insert one AA battery, ensuring correct polarity (+/-). Close the battery compartment cover.

2.2. Connecting the USB Unifying Receiver

The Logitech MK330 combo uses a single USB Unifying Receiver to connect both the keyboard and mouse to your

computer.

1. Locate an available USB port on your computer.

2. Insert the USB Unifying Receiver firmly into the USB port.

3. Your computer should automatically detect and install the necessary drivers. This may take a few moments.

4. Once the drivers are installed, the keyboard and mouse should be ready for use.

3. OPERATING YOUR DEVICE

3.1. Keyboard Features

The MK330 keyboard features a full-size layout with a dedicated numeric keypad and a set of convenient shortcut keys for enhanced productivity and media control.

- **Function Keys (F1-F12):** These keys perform standard functions. Some may have secondary functions accessible by pressing the 'Fn' key simultaneously.
- **Media Control Keys:** Dedicated keys for play/pause, volume up/down, mute, and launching media player.
- **Application Shortcut Keys:** Quick access to common applications like email, web browser, and calculator.

11 SHORTCUT KEYS FOR PRODUCTIVITY

3.2. Mouse Features

The included mouse is designed for comfortable, ambidextrous use with precise tracking.

- **Left and Right Click Buttons:** Standard mouse functionality.
- **Scroll Wheel:** For vertical scrolling through documents and web pages. The scroll wheel can also be pressed as a middle click button.
- **Optical Tracking:** Provides smooth and accurate cursor control on various surfaces.

4. MAINTENANCE

4.1. Battery Replacement

When the keyboard or mouse performance degrades (e.g., delayed input, erratic cursor movement), it's likely time to replace the batteries.

- **Keyboard:** Replace with two new AAA alkaline batteries.
- **Mouse:** Replace with one new AA alkaline battery.

Always dispose of used batteries responsibly according to local regulations.

4.2. Cleaning

To maintain optimal performance and hygiene, clean your keyboard and mouse periodically.

- Use a soft, lint-free cloth slightly dampened with water or a mild cleaning solution.
- Avoid excessive moisture and do not submerge the devices in liquid.
- For the keyboard, you can use compressed air to remove debris from between the keys.

5. TROUBLESHOOTING

If you encounter issues with your Logitech MK330 combo, try the following solutions:

- **No Response from Keyboard/Mouse:**

    - Ensure batteries are correctly installed and not depleted. Replace if necessary.
    - Check that the USB Unifying Receiver is securely plugged into a working USB port. Try a different USB port.
    - Move the keyboard and mouse closer to the USB receiver to ensure a strong wireless connection.
    - Restart your computer.

- **Erratic Cursor Movement or Delayed Input:**

    - Replace the mouse batteries.
    - Ensure the mouse optical sensor is clean and free of debris.
    - Use the mouse on a suitable surface (not highly reflective or transparent).
    - Reduce interference by moving other wireless devices away from the receiver.

- **Keyboard Keys Not Working:**

    - Replace the keyboard batteries.
    - Ensure no debris is lodged under the keys.

If problems persist, visit the Logitech support website for further assistance.
