Turtle Wax T-465R

Turtle Wax ICE Paste Polish Wax - Instruction Manual

Model: T-465R

INTRODUCTION

The Turtle Wax ICE Synthetic Paste Polish Wax is engineered with a proprietary blend of silicone polymers. This advanced formulation is designed to deliver an exceptionally high gloss shine to your vehicle's finish, coupled with long-lasting durability. It forms an invisible barrier that provides superior waterproof protection, enhancing the appearance and longevity of your car's paintwork.

What's Included

The package contains:

- 1 x Turtle Wax T-465R ICE Paste Polish Wax - 8 oz. (227 g)

Note: Applicator pad and microfiber towel are not included and must be acquired separately for optimal application and removal.

Preparation (Setup)

Before applying Turtle Wax ICE Paste Polish Wax, ensure your vehicle's surface is properly prepared. This involves cleaning and drying the vehicle thoroughly to remove dirt, grime, and contaminants. If the surface is oxidized, pre-clean with a suitable automotive polishing compound, such as Turtle Wax Premium Polishing Compound, to ensure the best results.

The wax can be applied on smooth exterior surfaces including painted surfaces, plastic trim, chrome, door handles, and even headlight & taillight lenses without leaving a white residue.

OPERATING INSTRUCTIONS (APPLICATION)

1. **Wash and Dry:** Ensure your vehicle is clean and dry before application.
2. **Apply Wax:** Moisten an applicator pad with water. Spread a thin, even coat of wax over one section of the vehicle at a time. Allow the product to dry to a light haze.
3. **Remove Polish:** Fold and quarter a clean microfiber towel. Use one side of the microfiber to remove the polish from the car's finish.
4. **Final Buff:** Turn the microfiber towel over to a clean side and wipe to a flawless shine.

Shine Tip: For a more brilliant shine and easier removal, lightly mist ICE Detailer on top of the hazing ICE Paste Wax before buffing.

MAINTENANCE

To maintain the brilliant shine and protection provided by Turtle Wax ICE Paste Polish Wax, regular cleaning and reapplication are recommended. The product offers long-lasting durability, with many users reporting effective protection for up to 6-12 months depending on environmental conditions and washing frequency. For ongoing maintenance, consider using other Turtle Wax ICE products like ICE Spray Wax or ICE Spray Detailer in between full wax applications.

TROUBLESHOOTING

Streaking Issues

If streaking occurs after application, wipe the affected area with a slightly damp microfiber cloth before re-buffing with a dry, clean microfiber towel. Ensure that the wax is applied in thin, even coats and allowed to haze properly before removal. Over-application or insufficient drying time can lead to streaking.

Oxidized Surfaces

If your vehicle's paint surface is oxidized, the wax may not adhere or perform optimally. In such cases, it is recommended to pre-clean the surface with a dedicated automotive polishing compound to remove oxidation and restore the paint's smooth finish before applying the wax.

SPECIFICATIONS

Attribute	Value
Manufacturer	Turtle Wax
Brand	Turtle Wax
Model	T-465R
Item Weight	8 ounces (227 g)
Product Dimensions	5.06 x 2.5 x 5.25 inches
Item Form	Paste
Specific Uses For Product	Automotive Exterior, Polish
Recommended Uses For Product	For Polishing, For Paint Protection
