5. MAINTENANCE

5.1 Cleaning Your Device

Use a soft, lint-free cloth to clean the screen and body of your tablet. Avoid using harsh chemicals or abrasive materials, as these can damage the device's finish. For stubborn smudges, slightly dampen the cloth with water.

5.2 Software Updates

Your Nexus 10 tablet may receive software updates periodically to improve performance and add new features. To check for updates, go to **Settings > About tablet > System updates**. Ensure your device is connected to Wi-Fi and has sufficient battery charge before initiating an update.

5.3 Battery Care

To maximize battery life, avoid exposing the tablet to extreme temperatures. It is generally recommended to keep the battery charge between 20% and 80% for optimal long-term health, though occasional full charges and discharges are acceptable.

6. TROUBLESHOOTING

6.1 Common Issues and Solutions

- **Device is unresponsive:** If your tablet freezes or does not respond to touch, press and hold the Power button and the Bluetooth button simultaneously for approximately 30 seconds to perform a forced restart. Note: If a dedicated 'Bluetooth button' is not present, this may refer to a specific combination of existing buttons or a software-initiated reset.
- **Wi-Fi connection issues:** Ensure your Wi-Fi router is working correctly. Try restarting both your tablet and the router. Verify that you have entered the correct Wi-Fi password.
- **Apps crashing:** Try clearing the cache for the problematic app (Settings > Apps > [App Name] > Storage > Clear cache). If the issue persists, consider reinstalling the app.
- **Slow performance:** Close unnecessary background apps. Clear cached data regularly (Settings > Storage > Cached data). Consider performing a factory reset as a last resort (see 6.2).

6.2 Factory Reset

A factory reset will erase all data from your tablet and restore it to its original factory settings. This can resolve persistent software issues but should only be performed after backing up important data. To perform a factory reset, go to **Settings > Backup & reset > Factory data reset**.
