BabyDan Premier Walk Thru Pressure Gate Instruction Manual

MODEL: 60117-2690-21

Introduction

The BabyDan Premier Walk Thru Pressure Gate is designed to provide a secure barrier for children and pets within your home. This gate features a true pressure-fit system, eliminating the need for drilling or permanent fixtures. It is engineered for ease of use by adults while maintaining high safety standards for children.

Safety Information

- This gate is a **true pressure-fit safety gate**, meaning it mounts securely without drilling or the use of wall cups.
- An **extra safety pressure indicator** is built into the slim-line handle to confirm correct installation.
- The gate is **not suitable for installation at the top of stairs** due to the presence of a bottom bar which can pose a trip hazard. It is recommended for use in doorways and at the bottom of stairs.
- Tested and approved according to the latest European (EN 1930:2011) and American (ASTM F1004) safety standards.
- Suitable for children from birth up to 24 months.

Certified Safety

EN 1930:2011
ASTM F1004

Complies with the latest, highest and strictest safety standards. Both European and American standards.

MADE IN
DENMARK
PREMIUM QUALITY

Designed and manufactured in Denmark from European steel to ensure Danish quality and less climate impact.

Approved by independent experts from market leading test labs like TÜV SÜD.

Setup and Installation

The BabyDan Premier Gate is designed for straightforward installation. No drilling, screws, tape, or wall cups are required, preserving your walls and doorframes. The gate utilizes a pressure-fit mechanism for secure placement.

Measuring for Best Fit

Before installation, accurately measure your opening. The basic gate fits openings from 28.9 inches (73.5 cm) up to 31.3 inches (79.6 cm). With separate extensions, it can cover openings up to 46.9 inches (119.3 cm).

How to measure for best fit

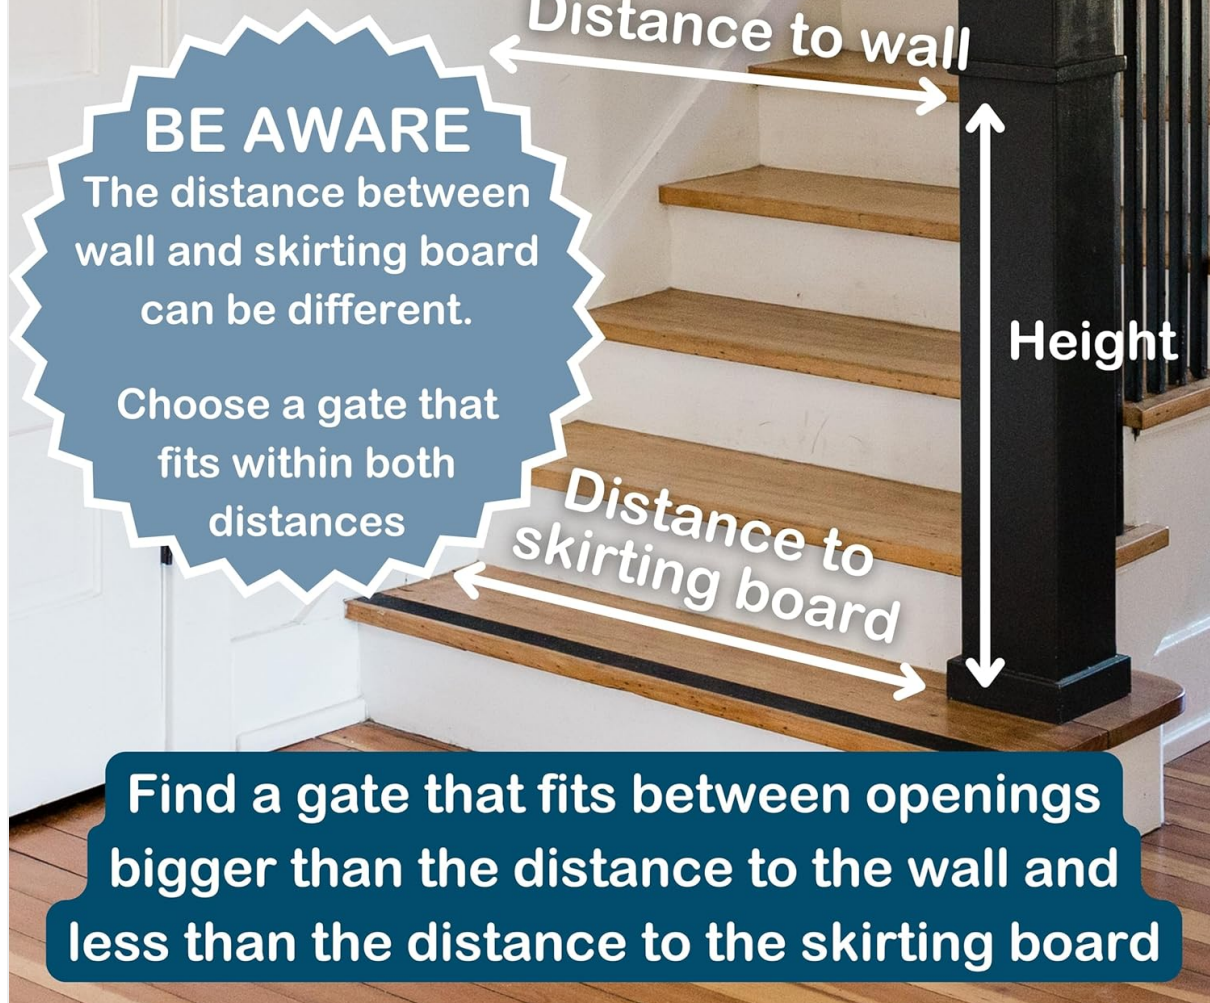

Image: Guide on how to measure an opening for proper gate fit, considering wall and skirting board distances.

Installation Steps

1. Unpack all components and ensure all parts are present.
2. Position the gate within the desired opening.
3. Adjust the pressure bolts until the gate is firmly secured. The built-in safety indicator will confirm correct tension.
4. Ensure the gate opens and closes smoothly and the locking mechanism engages properly.

Operating the Gate

The gate is designed for convenient operation by adults while remaining secure against children.

Opening the Gate

To open the gate, an adult can operate the slim-line handle with one hand. This involves pressing a button on the back of the handle and lifting the gate slightly to disengage the lock. The gate can then swing open in either direction, providing flexibility for movement through the opening.

Closing the Gate

To close, simply push the gate shut until the locking mechanism clicks into place. Always ensure the gate is securely latched after passing through.

Maintenance

To ensure the longevity and proper function of your BabyDan Premier Gate, regular maintenance is recommended:

- **Cleaning:** Wipe the gate regularly with a damp cloth and mild soap. Avoid using abrasive cleaners or harsh chemicals, as these can damage the paint finish.
- **Inspection:** Periodically check all components, including the pressure bolts, locking mechanism, and hinges, for any signs of wear or damage. Ensure the safety indicator is still functioning correctly.
- **Tightening:** If the gate feels loose, re-tighten the pressure bolts until the safety indicator shows correct tension.

Troubleshooting

If you encounter any issues with your BabyDan Premier Gate, consider the following:

- **Gate feels loose:** Re-check the tension of all four pressure bolts. Ensure the safety indicator is showing the correct installation status.
- **Gate does not latch:** Verify that the gate is installed squarely within the opening and that the

pressure is evenly distributed. Adjust the pressure bolts as needed.

- **Difficulty opening/closing:** Ensure no obstructions are preventing the gate from swinging freely. Check the locking mechanism for any debris.

If problems persist after attempting these steps, please contact BabyDan customer support for further assistance.

Specifications

Feature	Detail
Model Number	60117-2690-21
Mounting Type	Pressure Mount
Material	Metal
Color	Silver
Basic Gate Dimensions (W x H)	28.9" - 31.3" (73.5 cm - 79.6 cm) x 28.5" (72 cm)
Max Width with Extensions	Up to 46.9" (119.3 cm)
Item Weight	11.55 pounds (5.25 kg)
Age Range	Birth to 24 months
Standards Compliance	EN 1930:2011, ASTM F1004
Origin	Made in Denmark
UPC	885119914949, 885509828900

Extensions

The BabyDan Premier Gate is compatible with separate extensions to accommodate wider openings. These extensions are made of metal and integrate seamlessly with the main gate structure, allowing for a secure fit in various doorways and hallways up to 46.9 inches (119.3 cm).

Always ensure that any extensions used are genuine BabyDan products and are installed according to their specific instructions to maintain the gate's safety and stability.

Warranty and Support

For warranty information, product support, or to purchase additional extensions, please refer to the official BabyDan website or contact BabyDan customer service directly. Keep your purchase receipt as proof of purchase.
