## Ledlenser P4 AFS

# Ledlenser P4 AFS Flashlight Instruction Manual

Model: P4 AFS

## 1. PRODUCT OVERVIEW

The Ledlenser P4 AFS is a compact and efficient flashlight designed for inspection tasks. It incorporates the Advanced Focus System, providing a bright and adjustable light beam. Its slim design makes it suitable for accessing confined spaces and detailed examination of technical devices, electrical systems, or motors.

**Figure 1:** The Ledlenser P4 AFS flashlight. This image displays the black, pen-shaped flashlight with a textured body, a metal clip, and the LED Lenser P4 AFS branding visible on the side. The lens is visible at one end.

## 2. SETUP

## 2.1. Battery Installation

1. Unscrew the tail cap of the flashlight by turning it counter-clockwise.
2. Insert the required batteries (typically AAA, refer to specifications for exact type) into the battery compartment, ensuring correct polarity (+/-) as indicated inside the compartment.
3. Screw the tail cap back on clockwise until it is securely tightened. Avoid over-tightening.

**Note:** Always use fresh batteries of the same type and brand for optimal performance. Do not mix old and new batteries or different battery types.

## 3. OPERATING INSTRUCTIONS

---

### 3.1. Turning On/Off

- To turn the flashlight on, press the button located on the tail cap.
- To turn the flashlight off, press the button again.

### 3.2. Adjusting Focus (Advanced Focus System)

The Ledlenser P4 AFS features an Advanced Focus System, allowing for seamless transition from a broad floodlight to a sharply focused spot beam.

- To adjust the focus, slide the head of the flashlight forward or backward.
- Sliding the head forward typically narrows the beam to a focused spot.
- Sliding the head backward typically widens the beam to a floodlight.

## 4. MAINTENANCE

---

### 4.1. Cleaning

- Wipe the exterior of the flashlight with a soft, damp cloth.
- Do not use abrasive cleaners or solvents, as these may damage the finish.
- For the lens, use a lens cleaning cloth to avoid scratches.

### 4.2. Battery Replacement and Storage

- If the flashlight will not be used for an extended period, remove the batteries to prevent leakage and potential damage to the device.
- Store the flashlight in a cool, dry place away from direct sunlight and extreme temperatures.

## 5. TROUBLESHOOTING

---

- **Flashlight does not turn on:**

- Check if batteries are inserted correctly with the correct polarity.
- Replace old or depleted batteries with new ones.
- Ensure the tail cap is securely tightened.

- **Light is dim or flickers:**

- Batteries may be low; replace them.
- Ensure battery contacts are clean and free of corrosion.
